The Construction of Logical Space Agustín

Rayo, 2013-06-27 Our conception of logical space is the set of distinctions we use to navigate the world. In *The Construction of Logical Space*, Agustín Rayo defends the idea that one's conception of logical space is shaped by one's acceptance or rejection of just is statements, statements like "to be composed of water just is to be composed of H₂O" or "for the number of the dinosaurs to be zero just is for there to be no dinosaurs." The resulting picture is used to articulate a conception of metaphysical possibility that does not depend on a reduction of the modal to the non-modal and to develop a trivialist philosophy of mathematics according to which the truths of pure mathematics have trivial truth conditions.

The Little Book of Prophecy and Truth Dan Nordquist, 2008-01-02 From Creation to the Islamic Antichrist and how you can be sure you're one of God's chosen.

And That's the Truth! Carl W. McClure, 2012-09-18 And That's the Truth: Meaningful fiction to stimulate your mind and nurture your soul is a treasury of short fiction stories. Most of the narrators in Part One are animals talking about themselves. You learn how dozens of animals live, eat, and survive through dialogue and description. Look too for inanimate objects to spring to life and talk about themselves: a houseplant, a stop sign, a dollar bill, and others. Part Two gives you traditional fictional stories with lively characters and believable or not-so-believable storylines. All of the stories leave you with a nugget of wisdom or a bit of a chuckle. Sprinkled throughout Part Two are a few short articles of general interest, non-fiction. Whether you read the stories in order or at random, you will come away enriched with inspirational and encouraging accounts that stimulate your mind and nurture your soul.
