Tverdek, 2015-12-24 If the natural environment is in the precarious state to which many attest what would this demand of us What duties are suggested by the observation that our collective behavior threatens the planet even if no particular individual intends harm Can we legitimately ask those who sincerely hold little or no interest in the long term viability of the earth s ecosphere to value it in the same way as committed environmentalists do and to act accordingly In *The Moral Weight of Ecology* Public Goods Cooperative Duties and Environmental Politics Edward Tverdek engages these questions and ultimately argues that the demands of ecology upon all of us are in fact quite substantial The book is not however another study in environmental ethics examining what it if anything we owe the natural world Rather *The Moral*

Weight of Ecology addresses the matter from the perspective of political economy and social choice theory Tverdek seeks to disarm both the intuitive libertarian notion that no one should be compelled to value and contribute toward something for which she has little regard as well as the romantic environmentalist assertion that one cannot assign an economic value to nature We must in some way price the natural world Tverdek argues but how we do so necessarily depends on what we believe would be a fair way to distribute the costs and burdens of maintaining it and these moral beliefs must be antecedent to the consumer preferences economists consider the raw data for determining the value of the environment *The End of Night* Paul Bogard, 2013-07-09 A deeply panoramic tour of the night from its brightest spots to the darkest skies we have left A starry night is one of nature's most magical wonders Yet in our artificially lit world three quarters of Americans eyes never switch to night vision and most of us no longer experience true darkness In *The End of Night* Paul Bogard restores our awareness of the spectacularly primal wildly dark night sky and how it has influenced the human experience across everything from science to art From Las Vegas Luxor Beam the brightest single spot on this planet to nights so starlit the sky looks like snow Bogard blends personal narrative natural history science and history to shed light on the importance of darkness what we've lost what we still have and what we might regain and the simple ways we can reduce the brightness of our nights tonight *The Intelligent Eye* David N. Water in the Belly D.L. Snow, 2021. In this parody of all-knowing capitalism, Frank Holmes survived the stock market crash of 2008 by parody-forming a rock and roll band called the Cherry. He is Odysseus in his parody of Homer and Joyce. It's PG-13. Parallel to this plot is the story of a spy, Butch Lautsky. It's a spy novel parody defending the FBI. Universal and evolutionary, the congress can be a lifeguard. Article I, section 10 of the US Constitutional Law is used to attempt to void state government regulations, not federal regulations. Article I of the constitutional law controls congress, not contracts and regulations, unless done right. Republicans like to void regulations, and democrats like to protect people with laws just like in *The Jungle*. But this is only half of the story worth many billions of dollars. Now it's landlords and wall and state contractors. EPA 2015 voided federal regulations. This is the opposite of the 1960s. On the Road. This is at times intimate. I have found a flaw in the constitution itself. Further information are found in the website <http://www.waterinthebelly.com> www.waterinthebelly.com
