How Solidarity Works Welfare Subnationalism:

How Solidarity Works for Welfare, 2015 **How Solidarity Works for Welfare** Prerna Singh, 2015 Drawing on a multi method study from the late nineteenth century to the present of the stark variations in educational and health outcomes within a large federal multiethnic developing country India this book develops an argument for the power of collective identity as an impetus for state prioritization of social welfare **Fair Enough?** Charlotte Cavaillé, 2023-09-21 Fair Enough proposes and tests a new framework for studying attitudes toward redistributive social policies These attitudes the book argues are shaped by at least two motives First people support policies that increase their own expected income Second they support policies that move the status quo closer to what is prescribed by shared norms of fairness In most circumstances saying the fair thing is easier than reasoning according to one's pocketbook But there are important exceptions when policies have large and certain pocketbook consequences people take the self interested position instead of the fair one Fair Enough builds on this simple framework to explain puzzling attitudinal trends in post industrial democracies including a decline in support for redistribution in Great Britain the erosion of social solidarity in France and a declining correlation between income and support for redistribution in the United States Thirsty Cities Selina Ho, 2019-01-10 Why does authoritarian China provide a higher level of public goods than democratic India Studies based on regime type have shown that the level of public goods provision is higher in democratic systems than in authoritarian forms of government However public goods provision in China and India contradicts these findings Whether in terms of access to education healthcare public transportation and basic necessities such as drinking water and electricity China does consistently better than India This book argues that regime type does not determine public goods outcomes Using empirical evidence from the Chinese and Indian municipal water sectors the study explains and demonstrates how a social contract an informal institution influences formal institutional design which in turn accounts for the variations in public goods provision Territories of Inequality Olivier Jacques, Alain Noël, 2025-08-15 The rise of income and wealth inequality and the possibilities of redistribution animate contemporary social and political debates but much of the scholarship on the issue is limited to the individual level There is a spatial dimension to the redistribution of income however and in federations this is especially important In Territories of Inequality leading political scientists propose a territorial approach to inequality and redistribution informed by political economy political geography and a comparative analysis of federalism and multilevel governance Chapters explore the relationship between interpersonal and interregional redistribution the role of progressive or regressive governing coalitions and the foundations of individual preferences for or aversions to interregional redistribution They consider different federations and quasi federations and emphasize the unique situation of Indigenous Peoples who navigate a complex relationship with institutions shaped by colonialism Examining how decentralization and federalism influence policy outcomes and public preferences Territories of Inequality provides new ways to approach the question of redistribution

Everyday Choices Ellen M. Lust, 2022-12-08 Scholars and practitioners seek development solutions through the engineering and strengthening of state institutions Yet the state is not the only or the primary arena shaping how citizens service providers and state officials engage in actions that constitute politics and development These individuals are members of religious orders ethnic communities and other groups that make claims on them creating incentives that shape their actions Recognizing how individuals experience these claims and view the choices before them is essential to understanding political processes and development outcomes This Element establishes a framework elucidating these forces which is key to knowledge accumulation designing future research and effective programming Taking an institutional approach this Element explains how the salience of arenas of authority associated with various communities and the nature of social institutions within them affect politics and development This title is also available as Open Access on Cambridge Core

Deadly Clerics Richard A. Nielsen, 2017-11-09 *Deadly Clerics* explains why some Muslim clerics adopt the ideology of militant jihadism while most do not The book explores multiple pathways of cleric radicalization and shows that the interplay of academic religious and political institutions has influenced the rise of modern jihadism through a mechanism of blocked ambition As long as clerics' academic ambitions remain attainable they are unlikely to espouse violent jihad Clerics who are forced out of academia are more likely to turn to jihad for two reasons jihadist ideas are attractive to those who see the system as turning against them and preaching a jihad ideology can help these outsider clerics attract supporters and funds The book draws on evidence from various sources including large scale statistical analysis of texts and network data obtained from the Internet case studies of clerics' lives and ethnographic participant observations at sites in Cairo Egypt

Representation, Achieved and Astray G. Bingham Powell, 2019-05-09 *Traces* explains and evaluates processes of democratic ideological representation from voter choices through election laws to the formation of parliamentary governments

When People Want Punishment Lily L. Tsai, 2021-08-12 Against the backdrop of rising populism around the world and democratic backsliding in countries with robust multiparty elections this book asks why ordinary people favor authoritarian leaders Much of the existing scholarship on illiberal regimes and authoritarian durability focuses on institutional explanations but Tsai argues that to better understand these issues we need to examine public opinion and citizens' concerns about retributive justice Government authorities uphold retributive justice and are viewed by citizens as fair and committed to public good when they affirm society's basic values by punishing wrongdoers who act against these values Tsai argues that the production of retributive justice and moral order is a central function of the state and an

important component of state building Drawing on rich empirical evidence from in depth fieldwork original surveys and innovative experiments the book provides a new framework for understanding authoritarian resilience and democratic fragility *Why Bother?* S. Erdem Aytaç, Susan C. Stokes, 2019-01-10 Using surveys experiments and fieldwork from several countries this book tests a new theory of participation in elections and protests *Information, Accountability, and Cumulative Learning* Thad Dunning, Guy Grossman, Macartan Humphreys, Susan D. Hyde, Craig McIntosh, Gareth Nellis, 2019-07-11 Throughout the world voters lack access to information about politicians government performance and public services Efforts to remedy these informational deficits are numerous Yet do informational campaigns influence voter behavior and increase democratic accountability Through the first project of the Metaketa Initiative sponsored by the Evidence in Governance and Politics EGAP research network this book aims to address this substantive question and at the same time introduce a new model for cumulative learning that increases coordination among otherwise independent researcher teams It presents the overall results using meta analysis from six independently conducted but coordinated field experimental studies the results from each individual study and the findings from a related evaluation of whether practitioners utilize this information as expected It also discusses lessons learned from EGAP s efforts to coordinate field experiments increase replication of theoretically important studies across contexts and increase the external validity of field experimental research *Precolonial Legacies in Postcolonial Politics* Martha Wilfahrt, 2022-12-22 West Africa s precolonial kingdoms left behind social norms and identities that affect elite behavior and subnational development today **Exclusion by Elections** John D. Huber, 2017-05-02 Exclusion by Elections develops a theory about the circumstances under which class identities as opposed to ethnic identities become salient in democratic politics and links this theory to issues of inequality and the propensity of governments to address it The book argues that in societies with even modest levels of ethnic diversity inequality invites ethnic politics and ethnic politics results in less redistribution than class politics Thus contrary to existing workhorse models in social science where democracies are expected to respond to inequality by increasing redistribution the argument here is that inequality interacts with ethnic diversity to discourage redistribution As a result inequality often becomes reinforced by inequality itself The author explores the argument empirically by examining cross national patterns of voting behaviour redistribution and democratic transitions and he discusses the argument s implications for identifying strategies that can be used to address rising inequality in the world today Conservative Political Parties and the Birth of Modern Democracy in Europe Daniel Ziblatt, 2017-04-17 A bold re interpretation of democracy s historical rise in Europe Ziblatt highlights the surprising role of conservative political parties with sweeping implications for democracy today **Institutions on the Edge** Gretchen Helmke, 2017-01-30 Why does institutional instability pervade the developing world Examining contemporary Latin America *Institutions on the Edge* develops and tests a novel argument to explain why institutional crises emerge spread and repeat in some countries but not in others The book draws on formal bargaining

theories developed in the conflict literature to offer the first unified micro level account of inter branch crises In so doing Helmke shows that concentrating power in the executive branch not only fuels presidential crises under divided government but also triggers broader constitutional crises that cascade on to the legislature and the judiciary Along the way Helmke highlights the importance of public opinion and mass protests and elucidates the conditions under which divided government matters for institutional instability

Making Peace in Drug Wars Benjamin Lessing,2017-12-07 Over the past thirty years a new form of conflict has ravaged Latin America s largest countries with well armed drug cartels fighting not only one another but the state itself In Colombia Mexico and Brazil leaders cracked down on cartels in hopes of restoring the rule of law and the state s monopoly on force Instead cartels fought back with bullets and bribes driving spirals of violence and corruption that make mockeries of leaders state building aims Fortunately some policy reforms quickly curtailed cartel state conflict but they proved tragically difficult to sustain Why do cartels fight states if not to topple or secede from them Why do some state crackdowns trigger and exacerbate cartel state conflict while others curb it This study argues that brute force repression generates incentives for cartels to fight back while policies that condition repression on cartel violence can effectively deter cartel state conflict The politics of drug war however make conditional policies all too fragile

The Politics of Distributing Social Transfers Tom Lavers,2022-03-14 This book provides a systematic analysis of the political processes shaping the distribution of social transfers in six countries in Sub Saharan Africa and South Asia
