How Buildings Learn:

How Buildings Learn Stewart Brand, 1994 Buildings have often been studied whole in space but never before have they been studied whole in time Architects and architectural historians are interested only in a building's original intentions Most are dismayed by what happens later when a building develops its own life responsive to the life within To get the rest of the story to explore the years between the dazzle of a new building and its eventual corpse Stewart Brand went to facilities managers and real estate professionals to preservationists and building historians to photo archives and to futurists He inquired What makes some buildings come to be loved He found that all buildings are forced to adapt but only some adapt gracefully *How Buildings Learn* is a masterful new synthesis which proposes that buildings adapt best when constantly refined and reshaped by their occupants and that architects can mature from being artists of space to becoming artists of time A rich resource and point of departure as stimulating for the general reader and home improvement hobbyist as for the building professional the book is sure to generate ideas provoke debate and shake up habitual thinking From the connected farmhouses of New England to I M Pei's Media Lab from satisficing to form follows funding from the evolution of bungalows to the invention of Santa Fe Style from Low Road military surplus buildings to a High Road English classic like Chatsworth this is a far ranging survey of unexplored essential territory More than any other human artifact buildings improve with time if they're allowed *How Buildings Learn* shows how to work with time rather than against it

How Buildings Learn Stewart Brand, 1997 Stewart Brand puts forward the radical proposal adapt best when constantly refined and reshaped by their occupants and that architects can mature from being artists of time

How Buildings Learn Stewart Brand, 1995-10-01 A captivating exploration of the ever evolving world of architecture and the untold stories buildings tell When a building is finished being built that isn't the end of its story More than any other human artifacts buildings improve with time if they're allowed to Buildings adapt by being constantly refined and reshaped by their occupants and in that way architects can become artists of time rather than simply artists of space From the connected farmhouses of New England to I M Pei's Media Lab from the evolution of bungalows to the invention of Santa Fe Style from Low Road military surplus buildings to a High Road English classic like Chatsworth this is a far ranging survey of unexplored essential territory Discover how structures become living organisms shaped by the people who inhabit them and learn how architects can harness the power of time to create enduring works of art through the interconnected worlds of design function and human ingenuity

How Buildings Learn Stewart Brand, 1995-10-01 Like people buildings change with age forced to adapt to the needs of current occupations This provocative examination of buildings that have adapted well and some that haven't calls for a dramatic rethinking in the way new buildings are designed one that allows structures to grow and change easily with the environment Photos

Learning-Through-Touring Juliet Sprake, 2012-03-26 Learning through Touring uncovers ways in which people interact

with the built environment by exploring the spaces around between and within buildings The key idea embodied in the book is that learning through touring is haptic the learner is a physical cognitive and emotional participant in the process It also develops the concept that tours rather than being finished products are designed to evolve through user participation and over time Part One of the book presents a series of analytical investigations into theories and practices of learning and touring that have then been developed to produce a set of conceptual methods for tour design Projects that have tried and tested these methods are described in Part Two Technologies that have been utilised as portable tools for learning through touring are illustrated both through historical and contemporary practices In all of this there is an underlying belief that what is formally presented to us by authorities is open to self discovery questioning and independent enquiry The book is particularly relevant for those seeking innovative ways to explore and engage with the built environment mobile learning educators learning departments in museums galleries and historic buildings organisations involved in bridging the gap between architecture and public understanding and anyone who enjoys finding out new things about their environment

Subject To Change: Creating Great Products & Services for an Uncertain World Peter Merholz,Todd Wilkens,Brandon Schauer,David Verba,2008-04-15 To achieve success in today s ever changing and unpredictable markets competitive businesses need to rethink and reframe their strategies across the board Instead of approaching new product development from the inside out companies have to begin by looking at the process from the outside in beginning with the customer experience It s a new way of thinking and working that can transform companies struggling to adapt to today s environment into innovative agile and commercially successful organizations Companies must develop a new set of organizational competencies qualitative customer research to better understand customer behaviors and motivations an open design process to reframe possibilities and translate new ideas into great customer experiences and agile technological implementation to quickly prototype ideas getting them from the whiteboard out into the world where people can respond to them In Subject to Change Creating Great Products and Services for an Uncertain World Adaptive Path a leading experience strategy and design company demonstrates how successful businesses can and should use customer experiences to inform and shape the product development process from start to finish

Place and Phenomenology Janet Donohoe,2017-03-17 This cross disciplinary book uses phenomenological method and description to explore questions of place underscoring the significance of phenomenology for place and place for phenomenology The book brings together prominent scholars in phenomenology of place Covering a range of issues from sacred places to embodiment and identity and from environmental art and architecture to limit places the contributors explore theoretical foundations through thinkers such as Heidegger Marion Young Husserl and Leopold among others Phenomenological method and description are brought to bear on concrete places such as rivers the Himalayas modern transit sacred architecture and more The book is accessible and pertinent to on going discussions in human geography architectural theory environmental studies and philosophy of place Provocative and

imaginative the essays provide a much needed look at the contributions of phenomenology to as well as the role of place in contemporary philosophical and environmental discussions *Special Structural Topics* Paul McMullin, Jonathan Price, Sarah Simchuk, 2017-07-20 *Special Structural Topics* covers specialty structural situations for students and professional architects and engineers such as soil mechanics structural retrofit structural integrity cladding design blast considerations vibration and structural sustainability As part of the Architect's Guidebooks to Structures series it provides a comprehensive overview using both imperial and metric units of measurement with more than 150 images As a compact summary of key ideas it is ideal for anyone needing a quick guide to specialty structural considerations Edward Prior Martin Godfrey

Cook, 2015-08-31 Edward Schroder Prior designed the cathedral of the Arts and Crafts Movement St Andrew's Church Roker perfected the popular butterfly plan in his houses and published what is still the seminal work on medieval gothic art in England in 1900 Highly regarded by critics such as Ian Nairn Prior is sometimes considered to have narrowly missed out on a place in the architectural pantheon of his age alongside contemporaries such as Charles Voysey and William Lethaby The result of extensive archival and field research *Edward Prior Arts and Crafts Architect* sheds new light on Prior's architecture life and scholarship Extensively illustrated it showcases Prior's work in colour including many of his architectural drawings and photographs of most of his extant buildings Prior is the missing link of the Arts and Crafts Movement in both a theoretical and a practical sense as he was possibly the only practitioner who genuinely translated the artistic theories of Ruskin and Morris into architectural reality He went on to found the School of Architecture at the University of Cambridge in 1912 Extensively illustrated with 200 colour illustrations including many of his architectural drawings and photographs of most of his extant buildings **Architecture, Theology, and Ethics** Elise M. Edwards, 2024-03-18

Architecture Theology and Ethics Making Architectural Design More Just argues that architecture design and creativity are theological ethical concerns that ought to be considered more deeply by Christians who are committed to social and environmental justice Elise M Edwards discusses the significance of architectural design entering into ongoing conversations in theological ethics and aesthetics She argues that architectural design is not just a professional practice for wealthy clients but rather an activity that everyday people undertake when making choices that shape the spaces they inhabit If Christians think theologically about their agency in these decisions they will discover that architectural design becomes an opportunity to contribute to the flourishing for humanity and God's creation Edwards proposes an approach to architectural design that presents it as prophetic action with the power to shape our world This book then presents five moral commitments that guide design intentions and the process of design towards justice and inclusion Grounded in liberationist feminist and womanist thought *Architecture Theology and Ethics* makes a compelling case for architecture's relevance to Christian ethics and theology

Ecopolis Paul F. Downton, 2008-12-09 From 2008 for the first time in human history half of the world s population now live in cities Yet despite a wealth of literature on green architecture and planning there is to date no single book which draws together theory from the full range of disciplines from architecture planning and ecology which we must come to grips with if we are to design future cities which are genuinely sustainable Paul Downton s *Ecopolis* takes a major step along this path It highlights the urgent need to understand the role of cities as both agents of change and means of survival at a time when climate change has finally grabbed world attention and it provides a framework for designing cities that integrates knowledge both academic and practical from a range of relevant disciplines Identifying key theorists practitioners places and philosophies the book provides a solid theoretical context which introduces the concept of urban fractals and goes on to present a series of design and planning tools for achieving Sustainable Human Ecological Development SHED Combining knowledge from diverse fields to present a synthesis of urban ecology the book will provide a valuable resource for students researchers and practitioners in architecture construction planning geography and the traditional life sciences

Environmentalism in Landscape Architecture Michel Conan, 2000 The papers presented in this volume range from proposals for new design approaches historical analysis of the relationship between the practice of landscape architecture and environmentalism to the theories of early practitioners of landscape architecture imbued by an environmentalist outlook The issues above are addressed through topics as eclectic as the design of American zoos the establishment of the Tennessee Valley Authority road design and maintenance in Texas and criticism of relationships between the words and works of select landscape architects This volume provides a fresh approach to encounters between environmentalism and landscape architecture by reframing the issues through self reflection instead of strategic debate **Country Cottages** Karen

Sayer, 2000 This text is about the country cottage It is a thematic social and cultural history of the country cottage as labourer s home as gendered space and as icon of Englishness Design for how People Learn Julie Dirksen, 2012 Products technologies and workplaces change so quickly today that everyone is continually learning Many of us are also teaching even when it s not in our job descriptions Whether it s giving a presentation writing documentation or creating a website or blog we need and want to share our knowledge with other people But if you ve ever fallen asleep over a boring textbook or fast forwarded through a tedious e learning exercise you know that creating a great learning experience is harder than it seems In *Design For How People Learn* you ll discover how to use the key principles behind learning memory and attention to create materials that enable your audience to both gain and retain the knowledge and skills you re sharing Using accessible

visual metaphors and concrete methods and examples *Design For How People Learn* will teach you how to leverage the fundamental concepts of instructional design both to improve your own learning and to engage your audience *Circular Economy and Sustainability* Alexandros Stefanakis, Ioannis Nikolaou, 2021-09-14 The concept of circular economy is based on strategies practices policies and technologies to achieve principles related to reusing recycling redesigning repurposing remanufacturing refurbishing and recovering water waste materials and nutrients to preserve natural resources It provides the necessary conditions to encourage economic and social actors to adopt strategies toward sustainability However the increasing complexity of sustainability aspects means that traditional engineering and management economics alone cannot face the new challenges and reach the appropriate solutions Thus this book highlights the role of engineering and management in building a sustainable society by developing a circular economy that establishes and protects strong social and cultural structures based on cross disciplinary knowledge and diverse skills It includes theoretical justification research studies and case studies to provide researchers practitioners professionals and policymakers the appropriate context to work together in promoting sustainability and circular economy thinking Volume 1 *Circular Economy and Sustainability Management and Policy* discusses the content of circular economy principles and how they can be realized in the fields of economy management and policy It gives an outline of the current status and perception of circular economy at the micro meso and macro levels to provide a better understanding of its role in achieving sustainability Volume 2 *Circular Economy and Sustainability Environmental Engineering* presents various technological and developmental tools that emphasize the implementation of these principles in practice micro level It demonstrates the necessity to establish a fundamental connection between sustainable engineering and circular economy Presents a novel approach linking circular economy concepts to environmental engineering and management to promote sustainability goals in modern societies Approaches the topic on production and consumption at both the micro and macro levels integrating principles with practice Offers a range of theoretical and foundational knowledge in addition to case studies that demonstrate the potential impact of circular economy principles on both economic and societal progress *Loose-Fit Architecture* Alex Lifschutz, 2018-02-05 *Loose Fit Architecture Designing Buildings for Change* September October 2017 Profile 249 Volume 87 No 5 ISBN 978 1119 152644 Guest Edited by Alex Lifschutz The idea that a building is finished or complete on the day it opens its doors is hardwired into existing thinking about design planning and construction But this ignores the unprecedented rate of social and technological change A building only begins its life when the contractors leave With resources at a premium and a greater need for a sustainable use of building materials can we still afford to construct new housing or indeed any buildings that ignore the need for flexibility or the ability to evolve over time Our design culture needs to move beyond the idealisation of a creative individual designer generating highly specific forms with fixed uses The possibilities of adaptation and flexibility have often been overlooked but they create hugely exciting loose fit architectures that emancipate users to create their own versatile
