Comprehensive Supramolecular Chemistry II George W. Gokel, Len Barbour, 2017-06-22 Comprehensive
Supramolecular Chemistry II Second Edition Nine Volume Set is a one stop shop that covers supramolecular chemistry a field
that originated from the work of researchers in organic inorganic and physical chemistry with some biological influence The
original edition was structured to reflect in part the origin of the field However in the past two decades the field has changed
a great deal as reflected in this new work that covers the general principles of supramolecular chemistry and molecular
recognition experimental and computational methods in supramolecular chemistry supramolecular receptors dynamic
supramolecular chemistry supramolecular engineering crystallographic engineered assemblies sensors imaging agents
devices and the latest in nanotechnology Each section begins with an introduction by an expert in the field who offers an
initial perspective on the development of the field Each article begins with outlining basic concepts before moving on to more
advanced material Contains content that begins with the basics before moving on to more complex concepts making it
suitable for advanced undergraduates as well as academic researchers Focuses on application of the theory in practice with
particular focus on areas that have gained increasing importance in the 21st century including nanomedicine nanotechnology
and medicinal chemistry Fully rewritten to make a completely up to date reference work that covers all the major advances
that have taken place since the First Edition published in 1996 **Sensory Processing Across the Lifespan: A 25-Year
