Allan Jones,Robert V. Osgood,2015-03-31 From King Cane to the Last Sugar Mill focuses on the technological and scientific advances that allowed Hawai i s sugar industry to become a world leader and Hawaiian Commercial Sugar Company HC S to survive into the twenty first century The authors both agricultural scientists offer a detailed history of the industry and its contributions balanced with discussion of the enormous societal and environmental changes due to its aggressive search for labor land and water Sugarcane cultivation in Hawai i began with the arrival of Polynesian settlers expanded into a commercial crop in the mid 1800s and became a significant economic and political force by the end of the nineteenth century Hawai i s sugar industry entered the twentieth century heralding major improvements in sugarcane varieties irrigation systems fertilizer use biological pest control and the use of steam power for field and factory operations By the 1920s the industry was among the most technologically advanced in the world Its expansion however was not without challenges Hawai i s annexation by the United States in 1898 invalidated the Kingdom s contract labor laws reduced the plantations hold on labor and resulted in successful strikes by Japanese and Filipino workers The industry survived the low sugar prices of the Great Depression and labor shortages of World War II by mechanizing to increase productivity The 1950s and 1960s saw science driven gains in output and profitability but the following decades brought unprecedented economic

pressures that reduced the number of plantations from twenty seven in 1970 to only four in 2000 By 2011 only one plantation remained Hawai i s last surviving sugar mill HC S with its large size excellent water resources and efficient irrigation and automated systems remained generally profitable into the 2000s Severe drought conditions however caused substantial operating losses in 2008 and 2009 Though profits rebounded local interest groups have mounted legal challenges to HC S s historic water rights and the public health effects of preharvest burning While the company has experimented with alternative harvesting methods to lessen environmental impacts HC S has yet to find those to be economically viable As a result the future of the last sugar company in Hawai i remains uncertain

Anticancer Drug Development Guide Beverly A. Teicher, Paul A. Andrews, 2004-02-01 This unique volume traces the critically important pathway by which a molecule becomes an anticancer agent The recognition following World War I that the administration of toxic chemicals such as nitrogen mustards in a controlled manner could shrink malignant tumor masses for relatively substantial periods of time gave great impetus to the search for molecules that would be lethal to specific cancer cells We are still actively engaged in that search today The question is how to discover these anticancer molecules Anticancer Drug Development Guide Preclinical Screening Clinical Trials and Approval Second Edition describes the evolution to the present of preclinical screening methods The National Cancer Institute s high throughput in vitro disease specific screen with 60 or more human tumor cell lines is used to search for molecules with novel mechanisms of action or activity against specific phenotypes The Human Tumor Colony Forming Assay HTCA uses fresh tumor biopsies as

sources of cells that more nearly resemble the human disease There is no doubt that the greatest successes of traditional chemotherapy have been in the leukemias and lymphomas Since the earliest widely used in vivo drug screening models were the murine L 1210 and P388 leukemias the community came to assume that these murine tumor models were appropriate to the discovery of antileukemia agents but that other tumor models would be needed to discover drugs active against solid tumors

A Casebook of Inclusive Pedagogical Practices for Second Language Teacher Education Amy B.

Gooden,2021-02-05 This casebook is designed to broaden L2 teacher knowledge thinking and practice with regard to making language and learning accessible to all students Language teachers are especially accountable for promoting socially just inclusive decolonizing and multicultural pedagogical practices and curricula at this critical juncture in history this book is intended to raise language teachers awareness of the importance of critically examining and reflecting on the intersectionality of language education and inclusive pedagogical practices Language teacher educators can use this text in their courses and workshops to build on and extend theoretical foundations while making critical practical connections The 12 cases presented here cover a range of inclusive language teaching and learning issues that practitioners are likely to face in their respective teaching contexts All the cases are based on real life dilemmas faced by practitioners in the field and have been informed by discussions with pre service and in service student teachers The cases represent a range of classroom contexts K 12 ESL sheltered English immersion world foreign language and post secondary EAP private charter and public schools and urban and suburban settings The cases are accompanied by pre and post problem sets and in class discussion questions This volume applies the case based pedagogy often used in some fields to that of second language teacher education to encourage pre and in service teachers to grapple with the types of dilemmas and decisions teachers confront every day The cases here are not intended as exemplars of practice to be emulated or illustrations of existing theories instead they are problem based narratives that resist clear cut answers or solutions and remain open ended to stimulate further investigation and reflection The goal is to mimic the complexity of the classroom where teachers confront a range of pedagogical and learning challenges and the ensuing experience requires critical real time decisions that demand keen professional discernment

Pteridology in the New Millennium S. Chandra,M. Srivastava,2013-04-17 The National

Botanical Research Institute came into being as the 13th among a chain of National Laboratories established during April 1953 under the Council of Scientific and Industrial Research by the Govt of India for advanced research in fields of specialisation which have a direct bearing on socio economic industrial and scientific advancement of the nation Christened initially as National Botanic Gardens the nucleus around which the institution took shape under its founder Director Late Prof K N Kaul was a large herbarium of Indian flora and a centu old botanical garden spread over 35 ha of land on the banks of River Gomti in the heart of Lucknow city It s a matter of great pleasure and profound satisfaction to me that a Golden Jubilee volume entitled Pteridology in the New Millennium is being published and released during the Golden Jubilee year of NBRI in

the honour of Professor B K Nayar who laid the foundation of the Pteridology Laboratory of the NBRI which is now a well equipped laboratory for the study of Indian pteridophytes Professor Nayar is a holistic Botanist as evident through his contributions and publications in almost all the areas of study of Pteridophyta The contribution of Professor Nayar towards the development of modern Pteridology and the role of NBRI in it is indeed great and very important His publications will be valuable for the younger generation of scientists in the field as well as for the more mature research workers and teachers
