Energy Research Abstracts ,1993 **Solar power feed-in tariffs** Great Britain: Parliament: House of Commons: Energy and Climate Change Committee,Great BritainParliament. House of CommonsEnvironmental Audit Committee,2011-12-22 This report finds that the Government is undermining confidence in energy policy and hurting the UK solar industry by rushing through panicked changes to Feed in Tariffs FiTs without adequate notice to consumers and installers alike The tariff rates for domestic sized solar panels are to be reduced from 43 3p to 21p per kilowatt hour of electricity produced from April 2012 However installations had to be completed and registered on the scheme by 12 December 2011 to receive the higher 43 3p rate for the full 25 years contract The suddenness of these changes means that some households have been forced to cancel planned solar panels and face losing their deposits Many local authority and community renewable energy schemes have been cancelled Plans to require homes to meet a C rated energy efficiency standard before they can receive solar FiTs will limit access to wealthier households and 86 per cent of homes would need to be better insulated before they could qualify for the scheme under the Government s proposals The report calls on the Government to develop a system to review and adjust FiT rates in an orderly and timely way consider alternative energy efficiency requirements to avoid devastating the industry design a community tariff that takes in to account the wider impacts on community groups and social housing projects investigate how the FiTs scheme could be used to encourage solar panel manufacturing in the UK require electricity suppliers to provide annual returns on how much FiTs have added to annual energy bills

Transforming Markets in the Built Environment Susan Roaf,2012-08-06 There is an urgent need to build human capacity to make the often vulnerable and exposed buildings and communities we live and work in more resilient to the changing social economic and physical environments around us Extensive research has been done over the last decades on both mitigation and adaptation to climate change in the built environment but the outputs of much of this

research have failed to result in the wider uptake of effective greenhouse gas emission reduction solutions This volume introduces credible fresh thinking on how this may be done For the first time an emerging generation of research is brought together that is directly concerned with understanding influencing and leading the transformation of markets and thinking in the built environment Chapters cover defining values setting targets consumer motivation selling existing ideas better developing new design principles paradigms and programmes optimizing solutions to ensure that when change does happen it does so in the right direction Papers are contributed by leading experts in fields ranging from philosophy the social political and physical sciences engineering architecture mathematics and complexity science The resulting volume will be essential reading for all those involved with changing the mindsets of a generation on the need to and ways to build resilience to rapid change and transforming markets in the built environment *Review of Non-oil and Gas Research Activities in the Houston-Galveston-Gulf Coast Area* United States. Congress. House. Committee on Science. Subcommittee on Energy, 2004 The Complete Book of Colleges, 2012 Edition Princeton Review (Firm), 2011-08-15 Presents a comprehensive guide to 1 571 colleges and universities and includes information on academic programs admissions requirements tuition costs housing financial aid campus life organizations athletic programs and student services Annual Report New South Wales. Ministry of Energy and Utilities, 1999 **Solar Energy Conversion Systems in the Built Environment** Ion Visa, Anca Duta, Macedon Moldovan, Bogdan Burduhos, Mircea Neagoe, 2020-01-08 This book focuses on solar energy conversion systems that can be implemented in the built environment at building or at community level The quest for developing a sustainable built environment asks for specific solutions to provide clean energy based on renewable sources and solar energy is considered one of the cleanest available energy on Earth The specific issues raised by the implementation location are discussed including the climatic profile distorted by the buildings the available surface on the buildings for implementation etc This book also discusses the seasonal and diurnal variability of the solar energy resource in parallel with the variability of the electrical and thermal energy demand in the built environment particularly focusing on the residential buildings Solutions are proposed to match these variabilities including the development of energy mixes with other renewables e g geothermal or biomass for thermal energy production Specific solutions including case studies of systems implemented on buildings all over the world are presented and analyzed for electrical and for thermal energy production and the main differences in the systems design are outlined The conversion efficiency thus the output and the main causes of energy losses are considered in both cases The architectural constraints are additionally considered and novel solar energy convertors with different shapes and colors are presented and discussed The durability of the solar energy conversion systems is analyzed considering the specific issues that occur when these systems are implemented in the built environment based on practical examples general conclusions are formulated and specific aspects are discussed in relation to experimental results and literature data With renewables implemented in the built environment likely to expand in the near

future this book represents welcome and timely material for all professionals and researchers that are aiming to provide efficient and feasible solutions for the sustainable built environment
