Houston of Asia Tilak Doshi,1989 **Houston of Asia** Doshi,2014 **Singapore, the Energy Economy** Weng Hoong Ng,2013-05-24 Singapore might not have survived the 1960s and prospered thereafter had it not built its economy on the foundations of oil refining trading and support for oil and gas exploration and production Cheap oil sound policies and strong government combined to produce the Singapore economic miracle in its first 50 years of self rule independence With the end of cheap oil how will Singapore fare and what is the relevance of its model of development for other countries Singapore s successful launch coincided with a golden period of cheap energy and a pro globalization and free trade environment These three elements are now under threat from rising energy prices and the global financial crisis which started in 2007 that will leave a lasting impact on the world s political and economic landscape If the Singapore model is reaching or has reached its peak what could take its place This book poses questions for not just for Singapore planners but also for anyone interested in modern economics and trade beyond the current era The book also looks into the numerous subsectors within Singapore s broad energy sector and examines the energy sector s links with the other pillars of its economy trade financial offshore marine operations manufacturing and transportation It considers possible threats and challenges Singapore s rising energy intensity its vulnerability to energy supply cut offs the likely impact of peak oil terrorism and environmental climate issues It also looks at China s growing investment and role in Singapore s oil and gas industry The book is a must read for an excellent insight into Singapore s energy economy filled with data information interviews and analyses previously not available to the public

telecommunication and resource extraction projects across Asia the book synthesizes research on infrastructure from six academic fields while making those insights accessible to a wider audience of students professionals and the general public For links to the open access PDF and EPUB editions chapter downloads and detailed information visit the project website <https://infrastructureasia.net>

Singapore in a Post-Kyoto World Tilak K Doshi, 2016-04-29 Singapore had by the 1980s emerged as one of the world's great oil refining and trading centres with the e East of Suez region within its sphere of influence The city state's policy making went against the grain in much of its practice of economic development It ensured that energy products were bought and sold in the domestic market at essentially global prices in contrast to the common practice in developing countries of subsidizing energy fuels for social equity Without a drop of oil of its own Singapore also managed to attract large foreign investments in the capital intensive oil refining and petrochemical manufacturing sectors in an export oriented strategy This was at a time when governments of most newly independent countries were busy trying to promote heavy industry by protectionist trade policies and import substituting industrialization The purpose of this book is two fold It is intended to introduce a host of energy related discussions relevant to a wider group of readers who do not e do energy for a living yet are keenly interested in understanding the many complexities of modern industrial societies which need to balance economic environmental and security priorities of ordinary citizens It is also meant to serve as an introductory assessment of key energy related issues with a particular relevance for small advanced countries such as Singapore
