Houston We Have A Narrative Why Science Needs Story:

Houston, We Have a Narrative Randy Olson, 2015-09-16 Ask a scientist about Hollywood and you'll probably get eye rolls. But ask someone in Hollywood about science and they'll see dollar signs. Movie makers know that science can be the source of great stories with all the drama and action that blockbusters require. That's a huge mistake, says Randy Olson. Hollywood has a lot to teach scientists about how to tell a story and ultimately how to do science better. With Houston We Have a Narrative he lays out a stunningly simple method for turning the dull into the dramatic. Drawing on his unique background which saw him leave his job as a working scientist to launch a career as a filmmaker, Olson first diagnoses the problem. When scientists tell us about their work they pile one moment and one detail atop another moment and another detail, a stultifying procession of and and and. What we need instead is an understanding of the basic elements of story, the narrative structures that our brains are all but hardwired to look for, which Olson boils down brilliantly to And But Therefore or ABT. At a stroke the ABT approach introduces momentum, And conflict, But and resolution. Therefore the fundamental building blocks of story. As Olson has shown by leading countless workshops worldwide, when scientists' eyes are opened to ABT the effect is staggering: suddenly they're not just talking about their work, they're telling stories about it. And audiences are captivated. Written with an uncommon verve and enthusiasm and built on principles that are applicable to fields far beyond science, Houston We Have a Narrative has the power to transform the way science is understood and appreciated and ultimately how it's done.

Craft of Scientific Films Lauren Murphy, Michael Alley, 2023-08-31 This book the first of its kind helps scientists and engineers of all stages and disciplines share their work in a new way with movies Today much of scientific communication is embedded in papers and presentations but these documents don't often extend outside of a specific academic field By adding movies as a medium of communication scientists and engineers can better communicate with their colleagues while also increasing their reach to students professors peers potential collaborators and the public Scientific films help translate complex technical topics into more accessible and consumable messages By following Lauren Murphy's filmmaking formula planning shooting and editing readers will create their very own scientific films that look professional and polished Using tools as simple as a smartphone readers can develop short personal stories with no cost or experience needed This book will guide readers through all steps of the movie making process to a finished product Readers will evolve their creative thinking skills and use their movies to improve classroom presentations network across student organizations present at conferences recruit students for their labs secure grant money and more Adding a movie to your body of work can be the tool that sparks interest in audiences to learn more driving traffic to your publications research projects and websites This book will help you develop new skills to become a better communicator while spreading your ideas and research to new audiences

Transmedia Knowledge for Liberal Arts and Community Engagement Jon McKenzie, 2019-07-27 This book sets forth a pedagogy for renewing the liberal arts by combining critical thinking media activism and design thinking Using the StudioLab approach the author seeks to democratize the social and technical practices of digital culture just as nineteenth century education sought to democratize literacy This production of transmedia knowledge from texts and videos to comics and installations moves students between seminar studio lab and field activities The book also wrestles with the figure of Plato and the very medium of knowledge to re envision higher education in contemporary societies issuing a call for community engagement as a form of collective thought action Presented Discourse in Popular Science Olga

Pilkington, 2018-07-03 In Presented Discourse in Popular Science Olga A Pilkington explores the forms and functions of the voices of scientists in books written for non professionals This study confirms the importance of considering presentation of discourse outside of literary fiction popular science uses presented discourse in ways uncommon for fiction yet not conventional for non fiction either This analysis is an acknowledgement of the social consequences of popularization Discourse presentation of scientists reconstructs the world of the scientific community as a human space but also projects back into it an image of the scientist the public wants to see At the same time Pilkington's findings strengthen the view of popularization that rejects the notion of a strict divide between professional and popular science **Telling Science**

Stories Martin W. Angler, 2020-03-13 A practical manual for anyone who wants to turn scientific facts into gripping science stories this book provides an overview of story elements and structure guidance on where to locate them in scientific papers and a step by step guide to applying storytelling techniques to writing about science In this book Martin W Angler outlines

basic storytelling elements to show how and where fledgling science storytellers can find them in scientific output. Journalistic techniques like selection through news values and narrative interviews are covered in dedicated chapters. A variety of writing techniques and approaches are presented as a way of framing science stories in ways that are informative and compelling in different media from short films to news articles. Practical examples, selected interviews and case studies complement each chapter with exercises and experimentation suggestions included for deeper understanding. Review questions at the end of each chapter cement the newly gained knowledge to make sure readers absorb it with links to articles and online tools inviting further reading. A valuable resource for students of journalism and science communication as well as professional journalists, scientists and scientists in training who want to engage with the public or simply improve their journal papers. This book is a one stop shop on science storytelling with a clear focus on providing practical techniques and advice on how to thrive as science writers and communicate science in all of its complexity.

The Language of Popular Science Olga A. Pilkington, 2019-01-09 If you read or write popular science you might sometimes wonder how do the authors manage to make subjects that once put you to sleep in science class both so entertaining and approachable. The use of language is key. Based on analyses of popular science bestsellers, this linguistic study shows how expert popularizers use the voices and narratives of scientists to engage readers, demonstrating the power of science and portraying researchers as champions of knowledge. By doing so they often blur the lines between nonfiction and fiction, inviting readers to take part in thought experiments and turn ordinary scientists into omnipotent heroes.

Science Journalism Martin W. Angler, 2017-06-14 *Science Journalism: An Introduction* gives wide ranging guidance on producing journalistic content about different areas of scientific research. It provides a step by step guide to mastering the practical skills necessary for covering scientific stories and explaining the business behind the industry. Martin W. Angler, an experienced science and technology journalist, covers the main stages involved in getting an article written and published from choosing an idea, structuring your pitch, researching and interviewing to writing effectively for magazines, newspapers and online publications. There are chapters dedicated to investigative reporting, handling scientific data and explaining scientific practice and research findings to a non specialist audience. Coverage in the chapters is supported by reading lists, review questions and practical exercises. The book also includes extensive interviews with established science journalists, scholars and scientists that provide tips on building a career in science journalism, address what makes a good reporter and discuss the current issues they face professionally. The book concludes by laying out the numerous available routes into science journalism such as relevant writing programs, fellowships, awards and successful online science magazines. For students of journalism and professional journalists at all levels, this book offers an invaluable overview of contemporary science journalism with an emphasis on professional journalistic practice and success in the digital age.

Narrative and Cognition in Literature and Science Michael Sinding, Aura Heydenreich, Klaus Mecke, 2025-07-21 This volume explores cognitive perspectives on how science and

narrative shape one another Narrative is a principle of cognition and cognition is fundamental to narrative This duality enables a deeper mapping of the feedback between story and the natural sciences Science as a culturally organized and systematic mode of knowing the world may seem opposed to narrative thinking Yet they are deeply interwoven Scientists tell many kinds of stories across genres and media In thought experiments lab experiments written arguments and histories and philosophies of fields they recount and interpret unfoldings of events at often uncanny scales from particle collisions to the evolution of life to cosmic expansion Science stories go beyond science Early science is entwined with myth religion and magic We still mythologize beneficent or evil geniuses the promises and perils of technology Teachers journalists politicians and lawyers all tell science stories for their own purposes Literary artists use scientific ideas and forms reimagining physical forces causality and time in storyworlds themes and figures This is the first cognition focused multi disciplinary analysis of these narrative science relations
