Garrett,2023-07-17 Changes to Improve Schools is a book about educational reform Richard Garrett has spent ten years researching the U S K 12 system to find things in need of improvements The book has 17 chapters that cover a wide range of topics such as the performance of

American students classroom discipline and apprehensions younger graduates face when deciding to pursue educational fields

The Kids are Smart Enough, So What's the Problem? Richard W. Garrett, 2017-12-06 There is a national crisis in education and it's not the highly debated philosophical discussions or heated political arguments we are used to hearing. Survey data establishes the fact that classrooms throughout the nation suffer from the presence of a small percentage of misbehaving students. Teachers are ill equipped to deal with these disruptive students resulting in lost classroom time and demoralized educators who are perpetually blamed for the student's bad performance. The root cause of these misbehaving children is not a lack of intellectual ability but a lack of character and grit, the important noncognitive skills required for success in life. *The Kids are Smart Enough* is a book of hope with surprisingly practical solutions revealed by listening to teachers learning from data and looking for the root cause. This book will help you to discover how struggling students can be reached and teachers encouraged.

Our Kids Robert D. Putnam, 2016-03-29 The best selling author of *Bowling Alone* offers a groundbreaking examination of the American Dream in crisis, how and why opportunities for upward mobility are diminishing, jeopardizing the prospects of an ever larger segment of Americans.

Make It Stick Peter C. Brown, Henry L. Roediger III, Mark A. McDaniel, 2014-04-14 Drawing on cognitive psychology and other fields, *Make It Stick* offers techniques for becoming more productive learners and cautions against study habits and practice routines that turn out to be counterproductive. The book speaks to students, teachers, trainers, athletes, and all those interested in lifelong learning and self improvement.

On the High Wire George Theoharis, Sharon Dotger, 2015-02-01 The purpose of the work life balance series is to highlight particular challenges that higher education faculty face as they participate in the demands of the academy and try to prevent those demands from invading their personal lives. *On the High Wire* looks at a specific subset of university faculty: education faculty with school aged children and the specific professional/personal balance these faculty need to find. The title *On the High Wire* suggests the precarious nature of the walk for education faculty who are parents of school aged children. We know that our identities are central to how we experience the world and how the world reacts to us. This reality is clearly visible in this book. These multiple identities and roles come into conflict at multiple points and in different ways. This book explores these identities and roles through autoethnographic accounts written by varied education faculty in order to make these tensions visible for the field to address.

The African American Male School Adaptability Crisis (AMSAC) Joe L. Rempson, 2016-03-12 The African American Male School Adaptability Crisis (AMSAC) cannot be solved by the school alone. It is a race problem which can only be solved if we black males provide the leadership in tackling our three major demons which now mainly account for the problem: IQ lag, fatherless families, crime. AMSAC had its origin about 100 years ago when after the death of Washington DuBois gained ascendancy in our African American Garden of Eden and replaced Washington's brains, property, and character with a civil rights agenda. That agenda has led to a civil rights fixation and our second bondage: Victimology, wherein being the victim has become part of our core identity and made us psychological slaves. Rather

than being proud and self reliant disproportionately we have come to see ourselves as victims who are entitled to system help and special treatment This bondage and it is a bondage vitiates our manhood and the energy and drive required to pursue the adaptation pathway paved by Washington but demonized by DuBois Return to that pathway and we can confront and conquer AMSAC and our three major demons Guided by history and the research evidence this book details how Its 20 chapters make for long reading but just by reading the first and last chapters you can get the message The motto of the proposed evidence based experimental program the African American Male Career Pathway Program AMCAP A special appeal is made to black athletes and entertainers to help propagate this motto and support the proposed high school student clubs Student AMCAPs in its implementation

Dilemmas of Educational Ethics Meira Levinson, Jacob Fay, 2019-01-02

Educators and policy makers confront challenging questions of ethics justice and equity on a regular basis Should teachers retain a struggling student if it means she will most certainly drop out Should an assignment plan favor middle class families if it means strengthening the school system for all These everyday dilemmas are both utterly ordinary and immensely challenging yet there are few opportunities and resources to help educators think through the ethical issues at stake Drawing on research and methods developed in the Justice in Schools project at the Harvard Graduate School of Education Dilemmas of Educational Ethics introduces a new interdisciplinary approach to achieving practical wisdom in education one that honors the complexities inherent in educational decision making and encourages open discussion of the values and principles we should collectively be trying to realize in educational policy and practice At the heart of the book are six richly described realistic accounts of ethical dilemmas that have arisen in education in recent years paired with responses written by noted philosophers empirical researchers policy makers and practitioners including Pedro Noguera Howard Gardner Mary Pattillo Andres A Alonso Jamie Ahlberg Toby N Romer and Michael J Petrilli The editors illustrate how readers can use and adapt these cases and commentaries in schools and other settings in order to reach a difficult decision deepen their own understanding or to build teams around shared values
