## How Old Is The Universe:

**How Old Is the Universe?** David A. Weintraub, 2011 Tells the story of how astronomers solved one of the most compelling mysteries in science and along the way introduces readers to fundamental concepts and cutting edge advances in modern astronomy From publisher description *The World Is Not Six Thousand Years Old—So What?* Antoine Bret, 2014-04-07 Why do so many think the Bible teaches that the universe is six thousand years old There are many good biblical and historical reasons to read Genesis 1 nonliterally and there are many good scientific reasons to think the universe is much older Out of this misconception some will lose faith while others won't find it This book was written for a large audience gathering in a little more than one hundred pages the main biblical historical and astrophysical reasons to recognize that the universe is far more than six thousand years old Contrary to some common views scientists do not simply assume physical laws have been the same in the past They observe it **Science and Religion: Fifty Years After Vatican**

**II** Kenan Osborne, Ki Wook Min, 2014-01-31 In the past one hundred years two major realities have changed both science and religion The world of science has been enriched by quantum physics the computation of the age of the universe archaeological data in the Middle East and a scientific stress on historical writing The world of religion has been enriched by the establishment of the World Council of Churches and the Second Vatican Council In the past fifty years major scientists and major religious leaders have met together again and again In the past fifty years religious leaders from Christianity Islam and Judaism have held a number of thought provoking conferences In this volume these gatherings are reviewed and evaluated Two major religious problems have challenged the science religion discussions namely which God should the scientists agree on the Trinitarian God Allah or Yahweh Which history of the universe sponsored by these three religions should scientists be looking for This volume raises questions and suggests some preliminary forms of serious discussion

**Dominator of the Stars** Ku SeDeCha, 2021-04-14 In the vast universe 100 races coexisted A mutated blood spirit allowed Mu Qing to rise up from earth to fight against the bug clan The purple bamboo forest attracted millions of thunder tribulations and the black Kun Peng flapped its wings crushing countless powerhouses There was only one Imperial Lord in the starry sky **Cosmic Impressions** Walter Thirring, 2007-05-01 Walter Thirring is an internationally renowned scientist who took part in and worked among those involved in many of the scientific developments of the twentieth century His book about the knowledge of the world as illuminated by twentieth century science was originally published in German This is the first English translation and is a book that is easily accessible to readers of popular science books and magazines Professor Thirring starts with cosmology as he examines scientific questions and theories concerning the intricacy of nature and the universe He branches into an exposition of chaos and its connection to the macroscopic world as well as to life sciences touching on such diverse related subjects as the structure of the water molecule He speaks of advances with which he was personally involved and offers priceless vignettes of great scientists with whom he exchanged discussions including Albert

Einstein Werner Heisenberg Erwin Schrödinger and Wolfgang Pauli His study of scientific theory and the intricacy of nature and the universe illuminates his argument for the role of a Creator Reflections on the creation of the universe lead to reflections about the creator he writes And arguing against atheism he points out When we are moved by a fantastic building a cathedral or a mosque and have finally realized what is behind the glorious proportions who would then say Now we don't need the architect anymore There might not even be one that could all just be the random product of circumstance Furthermore in making humankind special in his creation the Creator gave us the responsibility of seeking an understanding of creation and protecting it Tackling complex issues in science and religion Professor Thirring presents a compelling argument for their synthesis His tenure and influence in the scientific field make this argument even more compelling

The Journal of Electrical Workers and Operators, 1924      *Science and Religion* Paul Kurtz, 2013-06-24 In recent years a noticeable trend toward harmonizing the distinct worldviews of science and religion has become increasingly popular Despite marked public interest many leading scientists remain skeptical that there is much common ground between scientific knowledge and religious belief Indeed they are often antagonistic Can an accommodation be reached after centuries of conflict In this stimulating collection of articles on the subject Paul Kurtz with the assistance of Barry Karr and Ranjit Sandhu have assembled the thoughts of scientists from various disciplines Among the distinguished contributors are Sir Arthur C Clarke author of 2001 A Space Odyssey and numerous other works of science fiction Nobel Prize Laureate Steven Weinberg professor of physics at the University of Texas at Austin Neil deGrasse Tyson Princeton University astrophysicist and director of the Hayden Planetarium James Lovelock creator of the Gaia hypothesis Kendrick Frazier editor of the Skeptical Inquirer Steven Pinker professor of psychology at MIT Richard Dawkins zoologist at Oxford University Eugenie Scott physical anthropologist and executive director of the National Center for Science Education Owen Gingerich professor of astronomy at Harvard University Martin Gardner prolific popular science writer the late Richard Feynman Nobel Prize winning physicist and Stephen Jay Gould professor of geology at Harvard University and many other eminent scientists and scholars Among the topics discussed are the Big Bang and the origin of the universe intelligent design and creationism versus evolution the nature of the soul near death experiences communication with the dead why people do or do not believe in God and the relationship between religion and ethics

**God in the Age of Science?** Herman Philipse, 2012-02-23 God in the Age of Science is a critical examination of strategies for the philosophical defence of religious belief The main options may be presented as the end nodes of a decision tree for religious believers The faithful can interpret a creedal statement e.g. God exists either as a truth claim or otherwise If it is a truth claim they can either be warranted to endorse it without evidence or not Finally if evidence is needed should its evidential support be assessed by the same logical criteria that we use in evaluating evidence in science or not Each of these options has been defended by prominent analytic philosophers of religion In part I Herman Philipse assesses these options and argues that the most promising for believers who want to be justified in

accepting their creed in our scientific age is the Bayesian cumulative case strategy developed by Richard Swinburne Parts II and III are devoted to an in depth analysis of this case for theism Using a strategy of subsidiary arguments Philipse concludes 1 that theism cannot be stated meaningfully 2 that if theism were meaningful it would have no predictive power concerning existing evidence so that Bayesian arguments cannot get started and 3 that if the Bayesian cumulative case strategy did work one should conclude that atheism is more probable than theism Philipse provides a careful rigorous and original critique of theism in the world today

Why Are These Books in the Bible and Not Others?: Volume One - Volume One - A Translator's Perspective on the Canon of the Old Testament Gary F. Zeolla, 2016-10-29 This Volume One of a three volume set will study the books included in the Old Testament OT and consider other books that could have been included in it but were not Each of the 39 books in the OT will be reviewed in detail and it will be explained why they were included in the OT Then the debate about the extra books found in Roman Catholic and Eastern Orthodox Bibles as compared to Protestant and Jewish Bibles will be addressed Lastly other books that some wonder why they are not included in the OT will be discussed It will be explained why these books were rejected

Astronomers and Cosmologists Dean Miller, 2014-01-01 In this book a breakdown of the life and work of some of history's pioneers in the study of astronomy and cosmology are thoroughly explored This volume provides excellent biographical sketches for trailblazers in the sciences Articles are devoted to specific scientists covering the contributions to their field specifically addressing how their research discoveries and inventions impacted human understanding and experience This historical review includes scientists from around the world and throughout the centuries with a chapter specifically devoted to the top scientific contributors of the 21st century

**Engineering and Science Series**, 1958 **In the Beginnings** D. V. M. Dill, 2010-06 In the Beginnings is a defense of the biblical Gap Theory of Creation This theory once popular in the late 19th and early to mid 20th centuries has been rejected by many modern day creationists as being without biblical or scientific support This book takes an in depth look at both science and the Bible Its purpose is to show how the Gap Theory better fits the scientific and biblical facts More importantly its main purpose is to reach out to unbelievers who think the Bible teaches things contrary to science True scientific facts and true Biblical truths do not contradict The basic assumption of the author is that God is smart enough and powerful enough and sovereign enough to make His Works and His Words agree Because God reveals His invisible attributes

in His handiwork the author uses both God's Word and His work to share the Gospel of Jesus Christ Dr Steven Dill once a staunch evolutionist began investigating creationism after becoming aware of some scientific facts that seemed incompatible with his own beliefs Taking the position that truth will stand the test he began challenging even his own ideas about the origin of the universe His conclusion was that true scientific facts and true Biblical truths do not contradict and in this book he presents a new look at an old theory that preserves the integrity of both science and the Bible He earned his Bachelor's Degree in Biology in 1979 and his Doctorate of Veterinary Medicine in 1985 at the University of Missouri Columbia He is currently a practicing veterinarian in Jeffersontown Kentucky where he lives with his wife Linda and two dogs Samwise Gamgee and Rosie Cotton His two sons Tom and James have grown into fine young Christian men who make their parents proud

**Belief in God** T. J. Mawson, 2005 Belief in God answers two questions what if anything is it that Jews Christians and Muslims are agreeing about when they join in claiming that there is a God and what if any prospects are there for rationally defending or attacking this claim In the context of a sustained argument for particular answers to these questions Tim Mawson tackles many of the most prominent topics in the philosophy of religion He argues that those who believe that there is a God are best interpreted as believing that there is a being who is essentially personal transcendent immanent omnipotent omniscient eternal perfectly free perfectly good and necessary and non essentially creator of the world and value revealer of Himself and offerer of everlasting life Having explored the meaning and consistency of this conception of God in the first half of the book Mawson goes on to consider whether or not belief or the absence of belief in such a God might be the sort of thing that does not rationally require argument and if not what the criteria for a good argument for or against such a God's existence might be

**BOOK JACKET** **Mortal Grounding** Richard Chambers Prescott, 2008-09-05 To see more manuscripts by Richard Chambers Prescott go to Scribd.com and enter Grascott or PrescottRC This manuscript Mortal Grounding has a simple thought in mind To bring together our modern cosmological knowledge with our understanding of what is consciousness It is something of a task to unite these two styles of comprehension about our existence as much as it is to join quantum physics with general and special relativity The idea is that both want to reach the source the source of what is cosmological and what is consciousness It seems simple enough Cosmology studies the creation searching for the creator of it all whatever that may be Consciousness seems to look more at what is the creator in order to understand creation They are parallel and reversed but both seek to understand re link comprehend or unite with the Mystery This Universe's Given Moment of reaching of conscious mortal becoming grounded on Earth for the brief moment life to death yet in and as a rare something more the rarest star stuff circling back as consciousness that is able to grasp its origin without a direction transposed as times beginning This would be one idea of mortal grounding Some of the subjects taken up in this endeavor of unification are Pure Gravity Spacetime Fluid the Superclustering of Universes Wave Cosmology Non Local Independent Consciousness the question is this Logical or Mystical The text also leans heavily on Tantras explanations

examining the myriad layers of consciousness and their psychological weight the intriguing erotic energy the hidden secrets that are rarely discussed and the nature of freedom according to the belief system of Tantra     The Old Testament in the Light of the Ancient East Alfred Jeremias, Claude Hermann Walter Johns, 1911     *Does God Exist?* Stan W.

Wallace, 2020-09-23 This book presents the most recent debates by leading contemporary philosophers of enduring themes and issues concerning the question of God's existence William Craig and Antony Flew met on the 50th anniversary of the famous Copleston Russell debate to discuss the question of God's existence in a public debate The core of this book contains the edited transcript of that debate Also included are eight chapters in which other significant philosophers Paul Draper R Douglas Geivett Michael Martin Keith Parsons William Rowe William Wainwright Keith Yandell and David Yandell critique the debate and address the issues raised Their substantial and compelling insights complement and further the debate helping the reader delve more deeply into the issues that surfaced In the two final chapters Craig and Flew respond and clarify their positions taking the debate yet one step further The result of these many contributions is a book which provides the reader with a summary of the current discussion and allows one to enter into the dialogue on this central question in the philosophy of religion     Beyond the Firmament Gordon J. Glover, 2007 As debates within the Church over the scientific

details of creation become more frequent the experts seem to grow more entrenched while the rest of us only become more confused Somewhere between the endless arguments over distant starlight and Carbon 14 dating calculating the mathematical improbabilities of things that already exist and parsing ancient Hebrew and Greek somebody needs to ask the simple question If 3 500 years of scientific progress can't help modern Christians figure out Genesis then how could the ancient Israelites possibly have understood it so well What secret did this newly liberated gaggle of Hebrew nomads take with them out of Egypt that holds the key to understanding God's telling of His own creation story Beyond the Firmament challenges all creationist camps whether Young Earth Old Earth or Theistic Evolutionist to step outside of traditional paradigms and recognize how our modern Western post Enlightenment scientific worldview actually blinds us from seeing the simple truth of Creation as it was originally intended and how our failure to grasp the theological significance of the Biblical creation model puts science and faith on a collision course     **Systematic Theology/Historical Theology Bundle**

Wayne A. Grudem, Gregg Allison, 2015-10-27 A collection that includes two of our most exemplary textbooks Systematic Theology and Historical Theology The ebook will provide an introduction to Biblical and Christian doctrine     **Earth Age Debate** Sierra Layne, AI, 2025-02-27 Earth Age Debate tackles the complex and often contentious discussion surrounding the age of the Earth a topic at the intersection of Biblical Studies and Earth Sciences It navigates the contrasting viewpoints arising from literal interpretations of the biblical timeline and the scientific data from geological science particularly radiometric dating Readers may find intriguing the fact that radiometric dating relies on the predictable decay of radioactive isotopes to estimate the age of rocks and minerals The book also explores the range of biblical interpretations from young

Earth creationism to old Earth models all seeking to reconcile faith and science The book begins by outlining the fundamental principles of radiometric dating and the range of views on the biblical timeline It progresses by examining various dating methods analyzing their assumptions and limitations and then interpreting geological formations and events like the Grand Canyon and the fossil record through different lenses This approach offers readers a balanced perspective encouraging them to form their own informed conclusions on the Earth age debate by understanding both scientific and theological viewpoints Ultimately understanding this debate has implications for science education environmental stewardship and interfaith dialogue
