Psychology and Cognitive Archaeology Tracy Henley, Matt Rossano, 2021-11-14 Psychology and Cognitive Archaeology demonstrates the potential of using cognitive archaeology framing to explore key issues in contemporary psychology and other behavioral sciences This edited volume features psychologists exploring archaeological data concerning specific themes such as the use of tools our child rearing practices our expressions of gender and sexuality our sleep patterns the nature of warfare cultural practices and the origins of religion Other chapters touch on cognitive archaeological methods the history of evolutionary approaches in psychology and relevant philosophical considerations to further illustrate the interdisciplinary potential between archaeology and psychology As a complementary counterpoint the book also includes an archaeologist s perspective on these same topical matters as well as robust introductory and concluding thoughts by the editors This book will be an illuminating read for students and scholars of psychology particularly theoretical social cognitive and evolutionary psychology as well as

philosophy archaeology and anthropology [The Oxford Handbook of Cognitive Archaeology](#) ,2024-03-12 Cognitive Archaeology is a relatively young though fast growing discipline The intellectual heart of cognitive archaeology is archaeology the discipline that investigates the only direct evidence of the actions and decisions of prehistoric people Its theories and methods are an eclectic mix of psychological neuroscientific paleoneurological philosophical anthropological ethnographic comparative aesthetic and experimental theories methods and models united only by their focus on cognition The Oxford Handbook of Cognitive Archaeology is a landmark publication showcasing the theories methods and accomplishments of archaeologists who investigate the human mind including its evolutionary development its ideation thoughts and beliefs and its very nature through material forms The volume encompasses the wide spectrum of the discipline showcasing contributions from more than 50 established and emerging scholars from Europe Africa Asia Australia and the Americas Prominent among these are contributions that discuss the epistemological frameworks of both the evolutionary and ideational approaches and the leading theories that ground interpretations Significantly the majority of chapters deliver substantive contributions that analyze specific examples of material culture from the oldest known stone tools to ceramic and rock art traditions of the recent millennium These examples include the gamut of methods and techniques including typology replication studies cha nes operatoires neuroarchaeology ethnographic comparison and the direct historical approach In addition the book begins with retrospective essays by several of the pioneers of cognitive archaeology presenting a broad range of state of the art investigations into cognitive abilities tackling thorny issues like the cognitive status of Neandertals and concluding with speculative essays about the future of an archaeology of mind and of the mind itself [The Oxford Handbook of 4E Cognition](#) Albert Newen,Leon De Bruin,Shaun Gallagher,2018-08-23 4E cognition embodied embedded enactive and extended is a relatively young and thriving field of interdisciplinary research It assumes that cognition is shaped and structured by dynamic interactions between the brain body and both the physical and social environments With essays from leading scholars and researchers The Oxford Handbook of 4E Cognition investigates this recent paradigm It addresses the central issues of embodied cognition by focusing on recent trends such as Bayesian inference and predictive coding and presenting new insights such as the development of false belief understanding The Oxford Handbook of 4E Cognition also introduces new theoretical paradigms for understanding emotion and conceptualizing the interactions between cognition language and culture With an entire section dedicated to the application of 4E cognition in disciplines such as psychiatry and robotics and critical notes aimed at stimulating discussion this Oxford handbook is the definitive guide to 4E cognition Aimed at neuroscientists psychologists psychiatrists and philosophers The Oxford Handbook of 4E Cognition will be essential reading for anyone with an interest in this young and thriving field [**The Cambridge Handbook of the Imagination**](#) Anna Abraham,2020-06-18 The human imagination manifests in countless different forms We imagine the possible and the impossible How do we do this so effortlessly Why did the capacity for imagination evolve and manifest with undeniably

manifold complexity uniquely in human beings. This handbook reflects on such questions by collecting perspectives on imagination from leading experts. It showcases a rich and detailed analysis on how the imagination is understood across several disciplines of study including anthropology, archaeology, medicine, neuroscience, psychology, philosophy, and the arts. An integrated theoretical, empirical, applied picture of the field is presented which stands to inform researchers, students, and practitioners about the issues of relevance across the board when considering the imagination. With each chapter the nature of human imagination is examined what it entails, how it evolved, and why it singularly defines us as a species.

Craft and Design Practice from an Embodied Perspective Nithikul Nimkulrat, Camilla Groth, 2024-07-01 This book brings together contributors from multiple disciplines such as crafts design, art education, cognitive philosophy, and sociology to discuss craft and design practice from an embodied perspective. Through theoretical overviews of embodied cognition and research based cases that involve the researchers making experiences different phenomena of human material interaction are presented, analysed, and discussed. The practical cases exemplify ways in which embodied notions show up in action. Contributors examine topics such as the embodied basis of craft activities and material manipulation, experiential knowledge and skill learning, reflection in and on action, and material dialogues. Several chapters specifically discuss the hybrid forms of analogue and digital crafting that increasingly takes place in the field of crafts and design, and the changed notions of material engagement that this entails. The book will appeal to scholars of crafts design, art education, anthropology, and sociology. [Exploring Contextualism and Performativity](#) Alessandro Capone, Assunta Penna, 2022-12-15 This edited volume on contextualism and pragmatics is interdisciplinary in character and contains contributions from linguistics, cognitive science, and socio pragmatics. Going beyond conventional contextual matters of truth conditions and pragmatic intrusion, this text deals with a variety of issues including hyperbole, synonymy, reference, argumentation, schizophrenia, rationality, morality, silence, and clinical pragmatics. Contributions also address the semantics pragmatics debate and show to what extent the theory of contextualism can be applied. This volume is based on a unitary research project financed by the University of Messina and appeals to students and researchers working in linguistics and the philosophy of language.

The Mind-Technology Problem Robert W. Clowes, Klaus Grtner, Ins Hipolito, 2021-09-28 This edited book deepens the engagement between 21st century philosophy of mind and the emerging technologies which are transforming our environment. Many new technologies appear to have important implications for the human mind, the nature of our cognition, our sense of identity, and even perhaps what we think human beings are. They prompt questions such as: Would an uploaded mind be me? Does our reliance on smart phones or wearable gadgets enhance or diminish the human mind? And how does our deep reliance upon ambient artificial intelligence change the shape of the human mind? Readers will discover the best philosophical analysis of what current and near future

21st technology means for the metaphysics of mind Important questions are addressed on matters relating to the extended mind and the distributed self Expert authors explore the role that the ubiquitous smart phone might have in creating new forms of self knowledge They consider machine consciousness brain enhancement and smart ambient technology and what they can tell us about phenomenal consciousness While ideas of artificial general intelligence cognitive enhancements and the smart environment are widely commented on serious analysis of their philosophical implications is only getting started These contributions from top scholars are therefore very timely and are of particular relevance to students and scholars of the philosophy of mind philosophy of technology computer science and psychology

Special Objects

Maria J. García-Encinas,Fernando Martínez-Manrique,2025-03-05 This book proposes a different perspective on actual queries within the field of ontology Focusing on non standard objects it offers original answers to classic problems in metaphysics such as individuation reference existence and non existence The chosen ontological fields are for this purpose ontologies that essentially involve human social practices such as intentional objects fictions mental illnesses or social entities Even though the papers can be read independently readers will discover a number of original intersections that provide fresh points of entry to contemporary metaphysical issues By dealing with entities that are not so frequently addressed in related works the book also contributes to broaden their perspective on ontology Both scholars and students will find it particularly useful to have a survey about non standard abstract entities that can provide new topics for their research

The Oxford Handbook of Human Symbolic Evolution

Nathalie Gontier,Andy Lock,Chris Sinha,2024 The Oxford Handbook of Human Symbolic Evolution explores the origins of our characteristically human abilities our ability to speak create images play music and read and write The book investigates how symbolization evolved in human evolution and how symbolism is expressed across the various areas of human life

Exploring Ancient Sounds and Places

Margarita Díaz-Andreu,Neemias Santos da Rosa,2024-12-31 Archaeoacoustics studies historical sound merging archaeology anthropology and psychology to reveal insights about ancient music and acoustic environments Exploring Ancient Sounds and Places Theoretical and Methodological Approaches to Archaeoacoustics brings together scholars from diverse academic fields including archaeology anthropology architecture classics history art history and sound engineering to shed light on the role of sound and acoustics in the cultural practices of past societies from various chronologies and locations around the world This innovative volume covers a broad spectrum of topics such as the genesis of archaeological investigations into sound the emergence of speech and song in early humans the cognitive effects of music in ritualistic contexts the acoustic dimensions of rock art sites and the emotional responses elicited by sonorous activities experienced in these decorated spaces Additionally the book delves into the study of prehistoric musical instruments the use of ethnohistorical sources in archaeoacoustic research the analysis of sound imagery in medieval frescoes and explores historical approaches to the study of specific acoustic parameters and the sonic properties of urban environments Each chapter not only aggregates a wealth of academic perspectives but also

bridges the gap between theoretical concepts and the most advanced methods used in this field of research Case studies from all over the world illustrate the different ways in which ancient communities perceived and engaged with sound and the acoustics of the landscapes in which they were immersed Exploring Ancient Sounds and Places is an essential resource for scholars and students interested in archaeoacoustics and how sound has shaped the cognitive cultural and spiritual facets of human societies across time and space **The New Lives of Images** Adrian J. Ivakhiv,2025-09-30 In this ambitious new work eco philosopher and cultural theorist Adrian Ivakhiv presents an incisive new way of thinking about images and imagination Drawing upon an immense range of materials Ivakhiv reassesses the place of imagination in cultural life analyzing how people have interacted with images in the past and the ways that digital media are profoundly altering these relationships today The book contributes powerfully to the study of visual culture and digital media and provides provocative interpretations of a range of important artists and media movements from the work of photographer Edward Burtynsky the ambitious multi screen installations of John Akomfrah the abstract art of Swedish spiritualist Hilma af Klint and the Afrofuturism of jazz musicians like Sun Ra and poet Alexis Pauline Gumbs to the ever expanding universe of animal videos on YouTube Along the way the book delves into animacy and religious imagery iconophilia and iconoclasm divination and prophecy truthiness and enchantment networks online communities and artificial intelligence the political and affective economies of digital media and the role of utopian futurism in the present climate colonial Anthropocene predicament The result is a vital contribution toward a more empowering conception of the creative imagination and its possibilities in today's emerging digital ecology **Eurasia at the Dawn of History** Manuel Fernández-Götz,Dirk Krausse,2017-01-16 Our current world is characterized by life in cities the existence of social inequalities and increasing individualization When and how did these phenomena arise What was the social and economic background for the development of hierarchies and the first cities The authors of this volume analyze the processes of centralization cultural interaction and social differentiation that led to the development of the first urban centres and early state formations of ancient Eurasia from the Atlantic coasts to China The chronological framework spans a period from the Neolithic to the Late Iron Age with a special focus on the early first millennium BC By adopting an interdisciplinary approach structured around the concepts of identity and materiality this book addresses the appearance of a range of key phenomena that continue to shape our world **Death Rituals and Social Order in the Ancient World** Colin Renfrew,Michael J. Boyd,Iain Morley,2016 This volume with essays by leading archaeologists and prehistorians considers how prehistoric humans attempted to recognise understand and conceptualise death **The Extended Theory of Cognitive Creativity** Antonino Pennisi,Alessandra Falzone,2019-09-25 This edited volume focuses on the hypothesis that performativity is not a property confined to certain specific human skills or to certain specific acts of language nor an accidental enrichment due to creative intelligence Instead the executive and motor component of cognitive behavior should be considered an intrinsic part of the physiological functioning of the mind and as endowed with

self generative power Performativity in this theoretical context can be defined as a constituent component of cognitive processes The material action allowing us to interact with reality is both the means by which the subject knows the surrounding world and one through which he experiments with the possibilities of his body This proposal is rooted in models now widely accepted in the philosophy of mind and language in fact it focuses on a space of awareness that is not in the individual or outside it but is determined by the species specific ways in which the body acts on the world This theoretical hypothesis will be pursued through the latest interdisciplinary methodology typical of cognitive science that coincide with the five sections in which the book is organized Embodied enactivist philosophical approaches Aesthetics approaches Naturalistic and evolutionary approaches Neuroscientific approaches Linguistics approaches This book is intended for linguists philosophers psychologists cognitive scientists scholars of art and aesthetics performing artists researchers in embodied cognition especially enactivists and students of the extended mind
