Educational Statistics Using Microsoft Excel and SPSS Martin Lee Abbott,2014-08-21 Utilizing the latest software this book presents the essential statistical procedures for drawing valuable results from data in the social sciences Mobilizing interesting real world examples from the field of education Understanding Educational Statistics Using Microsoft Excel and

SPSS supplies a seamless presentation that identifies valuable connections between statistical applications and research design. Class tested to ensure an accessible presentation, the book combines clear step by step explanations and the use of software packages that are accessible to both the novice and professional alike to present the fundamental statistical practices for organizing, understanding and drawing conclusions from educational research data. The book begins with an introduction to descriptive and inferential statistics and then proceeds to acquaint readers with the various functions for working with quantitative data in the Microsoft Excel environment such as spreadsheet navigation, sorting and filtering and creating pivot tables. Subsequent chapters treat the procedures that are commonly employed when working with data across various fields of social science research including Single sample tests, Repeated measure tests, Independent t tests, One way ANOVA and factorial ANOVA, Correlation, Bivariate regression, Chi square, Multiple regression. Individual chapters are devoted to specific procedures, each ending with a lab exercise that highlights the importance of that procedure by posing a research question, examining the question through its application in Excel and SPSS and concluding with a brief research report that outlines key findings drawn from the results. Real world examples and data from modern educational research are used throughout the book and a related Web site features additional data sets, examples and labs allowing readers to reinforce their comprehension of the material. Bridging traditional statistical topics with the latest software and applications in the field of education, *Understanding Educational Statistics Using Microsoft Excel and SPSS* is an excellent book for courses on educational research methods and introductory statistics in the social sciences at the upper undergraduate and graduate levels. It also serves as a valuable resource for researchers and practitioners in the fields of education, psychology and the social sciences who require a statistical background to work with data in their everyday work. *Data Algorithms* Mahmoud Parsian, 2015-07-13. If you are ready to dive into the MapReduce framework for processing large datasets, this practical book takes you step by step through the algorithms and tools you need to build distributed MapReduce applications with Apache Hadoop or Apache Spark. Each chapter provides a recipe for solving a massive computational problem such as building a recommendation system. You'll learn how to implement the appropriate MapReduce solution with code that you can use in your projects. Dr. Mahmoud Parsian covers basic design patterns, optimization techniques and data mining and machine learning solutions for problems in bioinformatics, genomics, statistics and social network analysis. This book also includes an overview of MapReduce, Hadoop and Spark. Topics include Market basket analysis for a large set of transactions, Data mining algorithms, K means, KNN and Naive Bayes. Using huge genomic data to sequence DNA and RNA, Naive Bayes theorem and Markov chains for data and market prediction, Recommendation algorithms and pairwise document similarity, Linear regression, Cox regression and Pearson correlation, Allelic frequency and mining DNA, Social network analysis, recommendation systems, counting triangles, sentiment analysis. *Excel 2016 All-in-One For Dummies* Greg Harvey, 2015-11-16.
