How Novels Think The Limits Of Individualism From 1719 1900:

How Novels Think Nancy Armstrong, 2006-01-11 Nancy Armstrong argues that the history of the novel and the history of the modern individual are quite literally one and the same. She suggests that certain works of fiction created a subject one displaying wit, will, or energy capable of shifting the social order to grant the exceptional person a place commensurate with his or her individual worth. Once the novel had created this figure, readers understood themselves in terms of a narrative that produced a self-governing subject. In the decades following the revolutions in British North America and France, the major novelists distinguished themselves as authors by questioning the fantasy of a self-made individual. To show how novels by Defoe, Austen, Scott, Brontë, Dickens, Eliot, Hardy, Haggard, and Stoker participated in the process of making, updating, and perpetuating the figure of the individual, Armstrong puts them in dialogue with the writings of Locke, Hume, Rousseau, Malthus, Darwin, Kant, and Freud. Such theorists as Althusser, Balibar, Foucault, and Deleuze help her make the point that the individual was not one but several different figures. The delineation and potential of the modern subject depended as much upon what it had to incorporate as what alternatives it had to keep at bay to address the conflicts raging in and around the British novel.

The Age of Silver Ning Ma, 2017 *The Age of Silver* considers how commerce fueled the emergence of the novel around the globe, examining the evolution of epochal works of national literature from Don Quixote in 1605 to Robinson Crusoe in 1719.

Contemporary Literature and the End of the Novel P. Vermeulen, 2015-01-06 This book explores the paradoxical productivity of the idea of the end of the novel in contemporary fiction. It shows how this idea allows some of our most significant twenty-first century writers to re-imagine the ethics and politics of literature and to figure intractable forms of life and affect.

Talia Schaffer,2025-07-08 What we can learn about caregiving and community from the Victorian novel In *Communities of Care* Talia Schaffer explores Victorian fictional representations of care communities small voluntary groups that coalesce around someone in need Drawing lessons from Victorian sociality Schaffer proposes a theory of communal care and a mode of critical reading centered on an ethics of care In the Victorian era medical science offered little hope for cure of illness or disability and chronic invalidism and lengthy convalescences were common Small communities might gather around afflicted individuals to minister to their needs and palliate their suffering *Communities of Care* examines these groups in the novels of Jane Austen Charlotte Bront Charles Dickens George Eliot Henry James and Charlotte Yonge and studies the relationships that they exemplify How do carers become part of the community How do they negotiate status How do caring emotions develop And what does it mean to think of care as an activity rather than a feeling Contrasting the Victorian emphasis on

community and social structure with modern individualism and interiority Schaffer's sympathetic readings draw us closer to the worldview from which these novels emerged Schaffer also considers the ways in which these models of carework could inform and improve practice in criticism in teaching and in our daily lives Through the lens of care Schaffer discovers a vital form of communal relationship in the Victorian novel *Communities of Care* also demonstrates that literary criticism done well is the best care that scholars can give to texts

Still Life Elisha Cohn, 2016 Still Life Suspended Development in the Victorian Novel rethinks the nineteenth century aesthetics of agency through the Victorian novel's fascination with states of reverie trance and sleep These states challenge contemporary scientific and philosophical accounts of the perfectibility of the self which privileged reflective self awareness In dialogue with the field of literature and science studies and affect studies this book shows how Victorian writers used narrative form to respond to the analytical practices and knowledge production of those other disciplines Drawing upon canonical texts by Charlotte Brontë George Eliot George Meredith and Thomas Hardy Still Life contends that depictions of non purposive perceptual experience suspend the processes of self cultivation Bildung central to Victorian aesthetics science psychology and political theory as well as most critical accounts of the novel form Departing from the values of individual cultivation and moral revelation associated with the genre these writers offer an affective framework for understanding the subtly non instrumental powers of narrative Victorian novels ostensibly working within the parameters of the Bildungsroman are suspended by moments of still life a decentered lyricism associated with states of diminished consciousness They use this style to narrate what should be unnarratable experiences not dependent on reflective

consciousness which express a distinctive ambivalence toward dominant developmental frameworks of individual self culture

Liberalizing Contracts Anat Rosenberg, 2017-07-20 In *Liberalizing Contracts* Anat Rosenberg examines nineteenth century liberal thought in England as developed through and as it developed the concept of contract understood as the formal legal category of binding agreement and the relations and human practices at which it gestured most basically that of promise most broadly the capitalist market order She does so by placing canonical realist novels in conversation with legal historical knowledge about Victorian contracts Rosenberg argues that current understandings of the liberal effort in contracts need reconstructing from both ends of Henry Maine's famed aphorism which described a historical progress from status to contract On the side of contract historical accounts of its liberal content have been oscillating between atomism and social collective approaches missing out on forms of relationality in Victorian liberal conceptualizations of contracts which the book establishes in their complexity richness and wavering appeal On the side of status the expectation of a move from status has led to a split along the liberal radical fault line among those assessing liberalism's historical commitment to promote mobility and equality The split misses out on the possibility that liberalism functioned as a historical reinterpretation of statuses particularly gender and class rather than either an effort of their elimination or preservation As Rosenberg shows that reinterpretation effectively secured yet also altered gender and class hierarchies There is no teleology to such an account

The Art of Being Yi-Ping Ong, 2018-12-10 *The Art of Being* is a powerful account of how the literary form of the novel reorients philosophy toward the meaning of existence Yi Ping Ong shows that for Kierkegaard Sartre and Beauvoir the form of the novel in its classic phase yields the conditions for reconceptualizing the nature of self knowledge freedom and the world Their discovery gives rise to a radically new poetics of the nineteenth and twentieth century realist novel For the existentialists a paradox lies at the heart of the novel As a work of art the novel exists as a given totality At the same time the capacity of the novel to compel belief in the free and independent existence of its characters depends on the absence of any perspective from which their lives may be viewed as a consummated whole At stake in the poetics of the novel are the conditions under which knowledge of existence is possible Ong's reframing of foundational debates in novel theory takes us beyond old dichotomies of mind and world interiority and totality and form and mimesis It illuminates existential dimensions of novelistic realism overlooked by

empirical and sociological approaches Bringing together philosophy novel theory and intellectual history with groundbreaking readings of Tolstoy Eliot Austen James Flaubert and Zola *The Art of Being* reveals how the novel engages in its very form with philosophically rich notions of self knowledge freedom authority world and the unfinished character of human life

When Novels Were Books Jordan Alexander Stein, 2020-01-07 A literary scholar explains how eighteenth century novels were manufactured sold bought owned collected and read alongside Protestant religious texts As the novel developed into a mature genre it had to distinguish itself from these similar looking books and become what we now call literature Literary scholars have explained the rise of the Anglophone novel using a range of tools from Ian Watt's theories to James Watt's inventions Contrary to established narratives *When Novels Were Books* reveals that the genre beloved of so many readers today was not born secular national middle class or female For the first three centuries of their history novels came into readers' hands primarily as printed sheets ordered into a codex bound along one edge between boards or paper wrappers Consequently they shared some formal features of other codices such as almanacs and Protestant religious books produced by the same printers Novels are often mistakenly credited for developing a formal feature character that was in fact incubated in religious books The novel did not emerge all at once it had to differentiate itself from the goods with which it was in competition Though it was written for sequential reading the early novel's main technology for dissemination was the codex a platform designed for random access This peculiar circumstance led to the genre's insistence on continuous cover to cover reading even as the media platform it used encouraged readers to dip in and out at will and read discontinuously Jordan Alexander Stein traces this tangled history showing how the physical format of the book shaped the stories that were fit to print
