Formal Semantics in Modern Type

Theories Stergios Chatzikyriakidis,Zhaohui Luo,2021-02-17 This book studies formal semantics in modern type theories MTTsemantics Compared with simple type theory MTTs have much richer type structures and provide powerful means for adequate semantic constructions This offers a serious alternative to the traditional settheoretical foundation for linguistic semantics and opens up a new avenue for developing formal semantics that is both model theoretic and proof theoretic which was not available before the development of MTTsemantics This book provides a reader friendly and precise description of MTTs and offers a comprehensive introduction to MTT semantics It develops several case studies such as adjectival modification and copredication to exemplify the attractiveness of using MTTs for the study of linguistic meaning It also examines existing proof assistant technology based on MTT semantics for the verification of semantic constructions and reasoning in natural language Several advanced topics are also briefly studied including dependent event types an application of dependent typing to event semantics
