Optional Equipment

The optional hydraulic-controlled corner roller wheel turns the hay in the center of the windrow and can easily be folded out when not in use.

Easy Adjustments

Rake settings are simple and straight forward. The cross telescopic is easily set to the raking width using the pins, and the rake angle is quickly adjusted to suit the conditions with by adjusting the verticillies.

High Clearance

The raised frame and high-clearance roller pins provide more uniform crop flow, which is essential for clean raking and evenly formed windrows.

Superior Suspension

The unique suspension system adapts the flexure of the roller wheels to changing speed and ground conditions for more consistent raking. This also reduces the wear and protects the crop yields.
