Handbook of Space Engineering, Archaeology, and Heritage Ann Darrin, Beth L. O'Leary, 2009-06-26 Some might think that the 27 thousand tons of material launched by earthlings into outer space is nothing more than floating piles of debris However when looking at these artifacts through the eyes of historians and anthropologists instead of celestial pollution they are seen as links to human history and heritage Space The New Frontier for Ar Handbook of Vehicle-Road Interaction David Cebon, 2000-01-01 This handbook discusses tyre road contact forces generated by heavy vehicles covering their influence on road surface and bridge response and damage as well as ways of regulating and improving vehicles so as to minimize road damage The main incentive for understanding vehicle road interaction is the possibility of reducing the road damage caused by heavy vehicles and the very high associated costs This may be achieved by highway authorities through improved design and construction of roads by government agencies through regulations intended to encourage the use of more road friendly vehicles or by vehicle engineers through design of improved vehicle configurations and suspensions which minimize road damage The book provides a unified mechanistic approach to the entire subject covering vehicle dynamics dynamic tyre forces weigh in motion pavement and bridge response damage mechanisms of paving materials vehicle guideway interaction suspension design to minimize road damage and assessing road damaging potential of vehicles for regulatory purposes It includes 25 literature reviews covering topics from asphalt deformation to weigh in motion and citing over 500 references In addition it discusses both the fundamental mechanics of the mechanical and civil engineering systems as well as practical and implementation issues Proceedings of the International Conference on Advanced Mechanical Engineering, Automation, and Sustainable Development 2021 (AMAS2021) Banh Tien Long, Hyung Sun Kim, Kozo Ishizaki, Nguyen Duc Toan, Ivan A.
