**Contact Dermatitis** Peter J. Frosch, Torkil Menne, Jean-Pierre Lepoittevin, 2006-06-07 It is an unusual event for a textbook covering such a national and international networks and the use of highly specialized field as contact dermatitis to be standardized methodology a highly differentiated published in its fourth edition within a time period picture can now be painted we know the major part of 13 years When the European and Environmental fessions at risk as well as the influences of age and Contact Dermatitis Research Group was founded in various cofactors This is a solid basis for preventive 1985 one of the major goals was to edit a textbook of measures A new allergen described in one center high scientific standard written by renown experts can now be tested on a large scale in a short time and keep it regularly updated The greatest danger period If the data evaluation shows an unacceptably for a textbook is to become outdated then it stays high rate of sensitization in the exposed population on the bookshelf and is rarely consulted The continuing regulatory measures will be undertaken to protect usual flow of new medicaments the fascinating the consumer A recent example is the methylidib improvements in diagnostic image analysis and even more glutaronitrile story changing operative procedures are the reasons for These and other issues of importance are covered considerable knowledge deficits in old textbooks in depth in the newest edition of this textbook
