**Handbook of Children's Rights** Martin D. Ruck,Michele Peterson-Badali,Michael Freeman,2016-12-08 While the notion of young people as individuals worthy or capable of having rights is of relatively recent origin over the past several decades there has been a substantial increase in both social and political commitment to children s rights as well as a tendency to grant young people some of the rights that were typically accorded only to adults In addition there has been a noticeable shift in orientation from a focus on children s protection and provision to an emphasis on children s participation and self determination With contributions from a wide range of international scholars the Handbook of Children s Rights brings together research theory and practice from diverse perspectives on children s rights This volume constitutes a comprehensive treatment of critical

perspectives concerning children's rights in their various forms. Its contributions address some of the major scholarly tensions and policy debates comprising the current discourse on children's rights including the best interests of the child, evolving capacities of the child, states' rights versus children's rights, rights of children versus parental or family rights, children as citizens, children's rights versus children's responsibilities, and balancing protection and participation. In addition to its multidisciplinary focus, the handbook includes perspectives from social science domains in which children's rights scholarship has evolved largely independently due to distinct and seemingly competing assumptions and disciplinary approaches, e.g., childhood studies, developmental psychology, sociology of childhood, anthropology, and political science. The handbook also brings together diverse methodological approaches to the study of children's rights including both quantitative and qualitative perspectives and policy analysis. This comprehensive, cosmopolitan, and timely volume serves as an important reference for both scholarly and policy-driven interest in the voices and perspectives of children and youth.

**New Civics, New Citizens**, 2023-05-25. A 2023 CIES Book of the Month pick. How we think about civic participation has changed dramatically and informs our understanding of how civic education is being transformed. Nations globally are redefining what is needed to be a good citizen and how they should create them. Civic participation increasingly extends beyond voting in elections to informal and unconventional action. Making one's voice heard involves diverse communication media and wide-ranging skills. Young people are motivated to engagement by concern about climate change and the rights of marginalised people. Social media empower but bring the threat of extremism. Civic education. New Civics must channel and foster these trends. To create critical, active, and responsible citizenship, knowledge alone is not enough; young people need to be able to take critical perspectives on a wide range of social and political issues and to acquire the social, cognitive, and organizational skills to do so. How is new civics pedagogy being manifested? What traditional practices are under scrutiny? In this volume, sixteen projects in eight countries address questions in research, practices, policy, and professional development. What is civic identity and how does participation reflect it? Where do new discourses and definitions come from? How do contemporary social and cultural debates and issues intersect with practice and precepts?

**Civic Engagement of Asian American Student Leaders**, Ma. Glenda Lopez Wui, Cameron S. White, 2022-11-23. Civic Engagement of Asian American Student Leaders examines the civic lives of Asian American youth and analyzes their civic engagement through in-depth interviews with fifteen student leaders from a Tier One university in Southeast Texas. This book provides a counter narrative to the portrayal of Asian Americans as apolitical and less interested in civic matters. Such depictions arise from the characterization of Asian Americans as model minority who mainly focus on economic success and are socially and economically integrated in American society. However, the stories of the student leaders cultivated by Ma Glenda Lopez Wui and Cameron S. White illustrate that their challenging racialized experiences inspired their civic involvement. Their civic engagement creates empowerment in terms of asserting their ethnic identity, imbibing leadership qualities, and long-term

commitment to civic engagement and subverting stereotypes against Asian Americans The book paints a more varied picture of Asian American youth civic engagement that is not entirely anchored in ethnic identity or non political involvement contrary to articulations of existing studies Wui and White hope that the student leaders narratives shed better light on the civic commitments of Asian Americans to American society especially in these times when there is increased bias and racial prejudice in the current atmosphere and culture

*Civic Education in the Twenty-First Century* Donald M. Gooch, Michael T. Rogers, 2015-09-18 Imagine an America where politicians governmental institutions schools new technologies and interest groups work together to promote informed engaged citizens Civic Education in the Twenty First Century brings together scholars from various disciplines to show how such a United States is possible today Inspired by Alexis de Tocqueville's analysis of American democracy in the early 1800s this edited volume represents a multidimensional evaluation of civic education in its new and varied forms While some lament a civics crisis in America today Civic Education in the Twenty First Century raises hope that we can have an informed and active citizenry We find the activities of a number of politicians government institutions schools and interest groups as promising developments in the struggle to educate and engage Americans in their democracy New technologies and new innovations in civic education have laid the foundation for a revitalized American civic ecology With Civic Education in the Twenty First Century we call for the United States to make these practices less isolated and more common throughout the country The volume is broken into three major sections First there are four chapters exploring the history and philosophical debates about civic education particularly with respect to its role in America's educational institutions Then the second section provides seven groundbreaking inquiries into how politicians and political institutions can promote civic education and engagement through their routine operations As some examples this section explores how politicians through campaigns and judiciaries through community programs enhance civic knowledge and encourage civic engagement This section also explores how new technologies like the Internet and social media are increasingly used by government institutions and other entities to encourage a more politically informed and engaged citizenry Finally the third section contains six chapters that explore programs and practices in higher education that are enhancing civic education engagement and our knowledge of them From the virtual civics campus of Fort Hayes State to citizens academies throughout the country this section shows the possibilities for schools today to once again be civics actors and promoters
