Hans Von Ohain Elegance In Flight General Publication:

Hans Von Ohain Margaret Conner, 2001 This is the first book ever to chronicle the life and work of Dr Hans von Ohain the brilliant physicist who invented the first turbojet engine that flew on 27 August 1939 The book follows him from childhood through his education the first turbojet development and his work at the Heinkel Company where his dream of elegance in flight was ultimately realized with the flight of the Heinkel He 178 powered by the turbojet engine he created It also presents his immigration to the United States and his career with the United States Air Force whereupon he became one of the top scientists in the field of advanced propulsion The book is a historical document but it is also evidence of a mans dream coming true in the creation of elegance in flight and its impact on mankind **Powering the World's Airliners** Reiner

Decher, 2020-02-28 From propellers to turboprops this illustrated history of engines will be of interest to modelers and aviation historians alike AMPS Indianapolis The first efforts of man to fly were limited by his ability to generate sufficient power to lift a heavier than air machine off the ground Propulsion and thrust have therefore been the most fundamental elements in the development of aircraft engines From the simple propellers of the first airliners of the 1920s and 1930s to the turboprops and turbojets of the modern era the engines used in airliners have undergone dramatic development over a century of remarkable change These advances are examined in detail by aeronautical engineer Reiner Decher who provides a layman s guide to the engines that have and continue to power the aircraft that carry millions of travelers across millions of miles each year Decher also looks at the development of aero engines during the Second World War and how that conflict drove innovation and explains the nature of wing design from the early twentieth century to the present To enable an easy understanding of this intriguing subject Powering the World s Airliners is profusely illustrated transporting readers back to the time of each major development and introducing them to the key individuals of the aero industry in each era After reading this comprehensive yet engaging story of the machines that power the aircraft in which we fly no journey will ever seem quite the same again **Aerospace America** , 2003 The Jet Race and the Second World War S. Mike

Pavelec, 2007-02-28 In the 1930s as nations braced for war the German military build up caught Britain and the United States off guard particularly in aviation technology The unending quest for speed resulted in the need for radical alternatives to piston engines In Germany Dr Hans von Ohain was the first to complete a flight worthy turbojet engine for aircraft It was installed in a Heinkel designed aircraft and the Germans began the jet age on August 27 1939 The Germans led the jet race throughout the war and were the first to produce jet aircraft for combat operations In England the doggedly determined Frank Whittle also developed a turbojet engine but without the support enjoyed by his German counterpart The British came second in the jet race when Whittle s engine powered the Gloster Pioneer on May 15 1941 The Whittle Gloster relationship continued and produced the only Allied combat jet aircraft during the war the Meteor which was relegated to Home Defense in Britain In America General Electric copied the Whittle designs and Bell Aircraft contracted to build the first American jet

plane On October 1 1942 a lackluster performance from the Bell Airacomet ushered in the American jet age The Yanks forged ahead and had numerous engine and airframe programs in development by the end of the war But the Germans did it right and did it first while the Allies lagged throughout the war only rising to technological prominence on the ashes of the German defeat Pavelec s analysis of the jet race uncovers all the excitement in the high stakes race to develop effective jet engines for warfare and transport **AIAA Journal** American Institute of Aeronautics and Astronautics,2005 *The AOPA Pilot* ,2002 **Choice** ,2002 *Subject Guide to Books in Print* ,1971
