American Public Education and the Responsibility of its Citizens Sarah M. Stitzlein, 2017-06-01 Public school systems are central to a flourishing democracy where children learn how to solve problems together build shared identities and come to value justice and liberty for all However as citizen support for public schools steadily declines our democratic way of life is increasingly at risk Often we hear about the poor performances of students and teachers in the public school system but as author Sarah M Stitzlein asserts in her compelling new volume the current educational crisis is not about accountability but rather citizen responsibility Now more than ever citizens increasingly do not feel as though public schools are our schools forgetting that we have influence over their outcomes and are responsible for their success In effect accountability becomes more and more about finding failure and casting blame on our school administrators and teachers rather than taking

responsibility as citizens for shaping our expectations of the classroom determining the criteria we use to measure its success and supporting our public schools as they nurture our children for the future American Public Education and the Responsibility of its Citizens sheds an important light on recent shifts in the link between education and citizenship helping readers to understand not only how schools now work but also how citizens can take an active and influential role in shaping them Moving from philosophical critique of these changes to practical suggestions for action Stitzlein provides readers with the tools habits practices and knowledge necessary to support public education Further by sharing examples of citizens and successful communities that are effectively working with their school systems Stitzlein offers a torch of hope to sustain citizens through this difficult work in order to keep our democracy strong
