Ham Radio's Technical Culture Kristen Haring,2007 A history of ham radio culture how ham radio enthusiasts formed identity and community through their technical hobby from the 1930s through the Cold War **Communities of Practice and Vintage Innovation** Francesco Schiavone,2013-09-25 This book focuses on the notion of vintage innovation and its application in various old technology based communities of practice Some communities of practice resist and react to technological change by adopting new technological products vintage products that extend the lifetime of their old favored products and practices There are a number of potential reasons for such strategic reactions which are analyzed by the author The book opens by reviewing the nature of technological change Old technology based communities of practice and their typical reactions to technological change are then discussed and the concept of vintage innovation introduced and explained The book presents four case studies of communities of users in which vintage innovation emerged analog photographers radio amateurs arcade videogame players and disc jockeys *The Wireless World* Simon J. Potter,David Clayton,Friederike Kind-Kovacs,Vincent Kuitenbrouwer,Nelson Ribeiro,Rebecca Scales,Andrea Stanton,2022-08-18 The Wireless World sets out a new research agenda for the history of international broadcasting and for radio history more generally It examines global and transnational histories of long distance wireless broadcasting combining perspectives from international history media and cultural history the history of technology and sound studies It is a co written book the result of more than five years of collaboration Bringing together their knowledge of a wide range of different countries languages and archives the co authors show how broadcasters and states deployed international broadcasting as a tool of international communication and persuasion They also demonstrate that by paying more attention to audiences programmes and soundscapes historians of international broadcasting can make important contributions to wider debates in social and cultural history Exploring the idea of a wireless world a globe connected both in imagination and reality by radio The Wireless World sheds new light on the transnational connections created by international broadcasting Bringing together all periods of international broadcasting within a single analytical frame including the pioneering days of wireless the Second World War the Cold War and the decades since the fall of the Berlin Wall the study reveals key continuities and transformations It looks at how wireless was shaped by internationalist ideas about the use of broadcasting to promote world peace and understanding at how empires used broadcasting to perpetuate colonialism and at how anti colonial movements harnessed radio as a weapon of decolonization Gaming the Iron Curtain Jaroslav Svelch,2023-09-19 How amateur programmers in 1980s Czechoslovakia discovered games as a medium using them not only for entertainment but also as a means of self expression Aside from the exceptional history of Tetris very little is known about gaming culture behind the Iron Curtain But despite the scarcity of home computers and the absence of hardware and software markets Czechoslovakia hosted a remarkably active DIY microcomputer scene in the 1980s producing more than two hundred games that were by turns creative inventive and

politically subversive In Gaming the Iron Curtain Jaroslav velch offers the first social history of gaming and game design in 1980s Czechoslovakia and the first book length treatment of computer gaming in any country of the Soviet bloc velch describes how amateur programmers in 1980s Czechoslovakia discovered games as a medium using them not only for entertainment but also as a means of self expression Sheltered in state supported computer clubs local programmers fashioned games into a medium of expression that unlike television or the press was neither regulated nor censored In the final years of Communist rule Czechoslovak programmers were among the first in the world to make activist games about current political events anticipating trends observed decades later in independent or experimental titles Drawing from extensive interviews as well as political economic and social history Gaming the Iron Curtain tells a compelling tale of gaming the system introducing us to individuals who used their ingenuity to be active be creative and be heard

Norton,2011-01-21 The fight for the future of the city street between pedestrians street railways and promoters of the automobile between 1915 and 1930 Before the advent of the automobile users of city streets were diverse and included children at play and pedestrians at large By 1930 most streets were primarily a motor thoroughfares where children did not belong and where pedestrians were condemned as jaywalkers In Fighting Traffic Peter Norton argues that to accommodate automobiles the American city required not only a physical change but also a social one before the city could be reconstructed for the sake of motorists its streets had to be socially reconstructed as places where motorists belonged It was not an evolution he writes but a bloody and sometimes violent revolution Norton describes how street users struggled to define and redefine what streets were for He examines developments in the crucial transitional years from the 1910s to the 1930s uncovering a broad anti automobile campaign that reviled motorists as road hogs or speed demons and cars as juggernauts or death cars He considers the perspectives of all users pedestrians police who had to become traffic cops street railways downtown businesses traffic engineers who often saw cars as the problem not the solution and automobile promoters He finds that pedestrians and parents campaigned in moral terms fighting for justice Cities and downtown businesses tried to regulate traffic in the name of efficiency Automotive interest groups meanwhile legitimized their claim to the streets by invoking freedom a rhetorical stance of particular power in the United States Fighting Traffic offers a new look at both the origins of the automotive city in America and how social groups shape technological change **Exploring the Early Digital** Thomas Haigh,2019-04-30 Changes in the present challenge us to reinterpret the past but historians have not yet come to grips with the convergence of computing media and communications technology Today these things are inextricably intertwined in technologies such as the smartphone and internet in convergent industries and in social practices Yet they remain three distinct historical subfields tilled by different groups of scholars using different tools We often call this conglomeration the digital recognizing its deep connection to the technology of digital computing Unfortunately interdisciplinary studies of digital practices digital methods or digital humanities have rarely been informed by deep engagement with the history of computing Contributors to this volume have come together to reexamine an apparently familiar era in the history of computing through new lenses exploring early digital computing and engineering practice as digital phenomena rather than as enginesof mathematics and logic Most focus on the period 1945 to 1960 the era in which the first electronic digital computers were created and the computer industry began to develop Because digitality is first and foremost a way of reading objects and encoding information within them we are foregrounding topics that have until now been viewed as peripheral in the history of computing betting odds calculators card file systems program and data storage programmable calculators and digital circuit design practices Reconceptualizing the history of computing as study of the early digital decenters the stored program computer repositioning it as one of many digital technologies **Techno-Fixers** Sean F. Johnston,2020-03-26 This is the story of a seductive idea

Over the past century the potential of new technology to solve social dilemmas has captivated modern culture From apps that encourage physical activity to airport scanners meant to prevent terrorism the concept that clever innovation can improve society is irresistible but faith in such technological fixes is seldom questioned Where did this idea come from what makes it so appealing and how does it endanger our future Techno Fixers traces the source of modern confidence in technology to engineering hubris radical utopian movements science fiction fanzines policy makers soundbites corporate marketing and optimistic consumer culture from the turn of the twentieth century until today Sean Johnston demonstrates that through the promotion of prominent government scientists technocrats entrepreneurs and popular media modern invention became the favourite tool for addressing human problems and society s ills Nonetheless when it comes to assessing the success of cigarette filters as the solution to safe smoking or DDT as the answer for agricultural productivity the evidence is sobering Cautioning that the rhetoric of technological fixes seldom matches reality Johnston examines how employing innovation to bypass traditional methods can foster as many problems as it solves A critical examination of modern faith in technology Techno Fixers evaluates past mistakes present implications and future opportunities for innovating societies **Our Frontier Is the World** Mischa Honeck,2018-05-15 Mischa Honeck s Our Frontier Is the World is a provocative account of how the Boy Scouts echoed and enabled American global expansion in the twentieth century The Boy Scouts of America BSA has long been a standard bearer for national identity The core values of the organization have since its founding in 1910 shaped what it means to be an American boy and man As Honeck shows those masculine values had implications that extended far beyond the borders of the United States Writing the global back into the history of one of the country s largest youth organizations Our Frontier Is the World details how the BSA operated as a vehicle of empire from the Progressive Era up to the countercultural moment of the 1960s American boys and men wearing the Scout uniform never simply hiked local trails to citizenship they forged ties with their international peers camped in foreign lands and started troops on overseas military bases Scouts traveled to Africa and even sailed to icy Antarctica hoisting the American flag and standing as models of loyalty obedience and bravery Through scouting America s complex engagements with the world were presented as honorable and playful masculine adventures abroad Innocent fun and earnest commitment to doing a good turn of course were not the whole story Honeck argues that the good natured Boy Scout was a ready means for soft power abroad and gentle influence where American values and democratic capitalism were at stake In other instances the BSA provided a pleasant cover for imperial interventions that required coercion and violence At Scouting s global frontiers the stern expression of empire often lurked behind the smile of a boy **Cultivating Science, Harvesting Power** Christopher R. Henke,2008-08-22 How agricultural scientists and growers in California have cooperated and struggled in shaping the state s multi billion dollar farm industry Just south of San Francisco lies California s Salinas Valley the heart of a multi billion dollar agricultural industry that dominates U S vegetable production How did the sleepy valley described in the stories of John

Steinbeck become the nation s salad bowl In Cultivating Science Harvesting Power Christopher R Henke explores the ways that science helped build the Salinas Valley and California s broader farm industry Henke focuses on the case of University of California farm advisors scientists stationed in counties throughout the state who have stepped forward to help growers deal with crises ranging from labor shortages to plagues of insects These disruptions in what Henke terms industrial agriculture s ecology of power provide a window onto how agricultural scientists and growers have collaborated and struggled in shaping this industry Through these interventions Henke argues science has served as a mechanism of repair for industrial agriculture Basing his analysis on detailed ethnographic and historical research Henke examines the history of state sponsored farm advising in particular its roots in Progressive Era politics and looks at both past and present practices by farm advisors in the Salinas Valley He goes on to examine specific examples including the resolution of a farm labor crisis during World War II at the Spreckels Sugar Company the use of field trials for promoting new farming practices and farm advisors and growers responses to environmental issues Beyond this Henke argues that the concept of repair is broadly applicable to other cases and that expertise can be deployed more generally to encourage change for the future of American agriculture **Guide to Unconventional Computing for Music** Eduardo Reck Miranda,2017-02-20 This pioneering text reference explores how innovative new modes of computation may provide exciting new directions for future developments in the music industry guiding the reader through the latest research in this emerging interdisciplinary field This work includes coverage of electronic music compositions and performances that incorporate unconventional interfacing hacking and circuit bending Features presents an introduction to unconventional computing in music discusses initiatives involving biophysical electronic music the work of self styled silicon luthiers and the intersection of music and quantum computing introduces the memristor a new electronic component with the potential to revolutionize how computers are built reviews experiments and practical applications of biological memristors in music describes IMUSIC an unconventional tone based programming language which enables the programming of computers using musical phrases includes review questions at the end of each chapter **The History of the Brain and Mind Sciences** Stephen T. Casper,Delia Gavrus,2017 This history explores the exceptionally complex scientific and medical techniques and practices that have allowed practitioners to claim expertise in the brain and mind sciences over the past two centuries Based on meticulous historical research essays in this volume reveal the richness of the history of the brain and mind sciences and show that this history cannot be reduced to an uncomplicated narrative of progressive discovery Rather the volume contributors collectively contend that it is in the seemingly obscure peripheral and marginal stories of the past that the medicine and science of the brain and the mind took shape **Tech Survivalist** Barrett Williams,ChatGPT,2025-05-30 Tech Survivalist Mastering HAM Radio for Unparalleled Emergency Preparedness Dare to explore the untapped power of HAM radios your ultimate tool for survival when conventional communications fall apart In Tech Survivalist delve into a comprehensive guide designed for both novices and seasoned radio
