Gertler,Julide Koracin,2009-01-14 Any alteration of the natural processes occurring on a piece of land will have expected as well as unanticipated effects and those effects have little regard for arbitrary human boundaries Consequently it is not enough for land managers to consider only how they might maintain the parcels for which they are responsible they must also anticipate      *Water Politics and Political Culture* Onur Oktem,2015-10-19 This book presents an analysis of the main traits of the Turkish political culture and articulates some of the most important deeply embedded social qualifications of political life in Turkey It reveals that when water management is historically and socially shaped by heavily technical knowledge systems of engineering it becomes a particularly useful tool for various political interests The book analyses how Turkish freshwater management is socially constructed as both an engineering discourse and a paternalistic bureaucratic transaction Such a construction stands in stark contrast to the water management discourse of the European Water

Framework Directive WFD the European Union's common water policy Of all the issues faced in Turkish water management none are as important and problematic as the issue of complying with European Union EU accession criteria Not only is water socially economically and environmentally important its water management is a useful prism through which the EU accession process can be viewed as a whole It showcases the complementarities and divergences between Turkish and EU bureaucratic constructs and value systems
