Handbook of Corrosion Data Bruce D.

Craig, David S. Anderson, 1994-12-31 This book makes it easy for you to find what effect environment has on the corrosion of metals and alloys. However, this volume offers information on additional environments including concrete, soil, groundwater, distilled water, sodium acetate, and more. There are also updated and expanded coverage of previously discussed environments as well as information on environments which deal with the dairy, food, brewing, aerospace, petrochemical, and building industries. The environments are listed alphabetically. Each listing includes a general description of the conditions, a comment on the corrosion characteristics of various alloys in such a situation, a bibliography of recent articles specific to the environment, tables consolidating and comparing corrosion rates at various temperatures and concentrations for various alloys, and graphical information. Also included are summaries on the general corrosion characteristics of major metals and alloys.

Ship-Shaped Offshore Installations Jeom Kee Paik, Anil Kumar Thayamballi, 2007-01-15 Ship shaped offshore units are some of the more economical systems for the development of offshore oil and gas and are often preferred in marginal fields. These systems are especially attractive to develop oil and gas fields in deep and ultra deep water areas and remote locations away from existing pipeline infrastructures. Recently the ship shaped offshore units have been applied to near shore oil and gas terminals. This 2007 text is an ideal reference on the technologies for design, building, and operation of ship shaped offshore units within inevitable space requirements. The book includes a range of topics from the initial contracting strategy to decommissioning and the removal of the units concerned. Coverage includes both fundamental theory and principles of the individual technologies. This book will be useful to students who will be approaching the subject for the first time as well as designers working on the engineering for ship shaped offshore installations.
