Country Size and Public Administration Marlene Jugl, 2022-07-07 Although countries differ tremendously in population size comparative public administration has not considered this context factor systematically This Element provides the most comprehensive theoretical and empirical account to date of the effects that country size has on the functioning of public administration It synthesizes existing literature and develops a theoretical framework that distinguishes the effects of small medium and large country size on administrative structures practices and public service performance Large states with larger administrations benefit from specialization but are prone to coordination problems whereas small states experience advantages and disadvantages linked to multifunctionalism and informal practices Midsize countries may achieve economies of scale while avoiding diseconomies of excessive size which potentially allows for highest performance Descriptive and causal statistical analyses of worldwide indicators and a qualitative comparison of three countries Luxembourg the Netherlands and Germany demonstrate the various ways in which size matters for public administrations around the world

Restraining Power through Institutions Alexandru V. Grigorescu, 2023-10-09 This book challenges the traditional view that meaningful analogies cannot be drawn between domestic and international politics Alexandru V Grigorescu shows that there are important parallels to be drawn across these two realms if political interactions among states over the past two centuries are compared to those within states going back about a thousand years He focuses specifically on the evolution of institutions

that restrain concentrated power such as courts assemblies and bureaucracies Restraining Power through Institutions begins by developing a set of theoretical arguments about the emergence change and consolidation of institutional restraints on power These are primarily derived from literature focusing on domestic politics going back to events such as those surrounding the signing of the Magna Carta and the emergence and evolution of the Curia Regis in England or of the Estates General and Parlements in France It then assesses the relevance of such arguments for the evolution of numerous international institutions international courts such as the Permanent Court of Arbitration International Court of Justice and International Criminal Court international assemblies and parliaments such as the Assembly of the League of Nations UN General Assembly and European Parliament and international secretariats such as those of the Central Commission for the Navigation of the Rhine League of Nations UN and World Bank The similarities between developments in the domestic and international realms lead to a number of important conclusions about future expectations for international institutions and for world politics more broadly In particular the book argues that complementing the traditional focus on efforts to acquire power with the Lockean focus on restraining power offers a more complete depiction of international politics This novel perspective consequently shifts the focus from the interests and actions of a handful of powerful states to those of virtually all states and groups of states regardless of how powerful they are *New Public Management in Africa* Benon C.

Basheka, Lukamba-Muhiya. Tshombe, 2017-08-25 The administrative sciences have been dominated by a turn to managerial perspectives in the late 20th and early 21st centuries and in the spirit of this turn New Public Management or NPM promises to produce efficient responsible and client oriented public services The reforms carried out in the pursuit of New Public Management are often accompanied by great optimism and rapid enthusiastic steps toward implementation Even in highly developed industrial countries however these fundamental reforms often overlook the political and cultural contexts of the implementing country New Public Management in Africa Emerging Issues and Lessons provides much needed theoretical foundations for NPM reforms in the African context and reflects on the success of existing reforms in the development of several African states The individual contributions in this timely volume provide important analyses of academic discourse practical policy achievements and desiderata The book as a whole however provides a valuable impetus for public administration research in and on African states sharing findings on the results of reforms to date and adjustments required for these reforms to succeed For public administration researchers outside of Africa this book offers a review of New Public Management case studies that are unavailable or difficult to find elsewhere contributing much to the exchange between African and Western administration science research and demonstrating that African administrative research is well prepared to help resolve global challenges **Shaping the World of Change**, 2024-06-03 This book sets out the theme of a

world that is changing rapidly and higher education being an important agent in shaping that change through knowledge generation transfer and innovation The chapters in this book focus on this shaping role of higher education along a number

of key areas governance sustainability teaching and learning student agency quality and internationalization From these different topics this volume presents ways in which higher education helps dealing with and shaping the educational and societal changes that we are facing in the aftermath of the pandemic and challenges that we are expecting in the near future Contributors are Victor M H Borden Bruno Broucker Edel Cassar B rbara Coelho Gabriel Cindy Cogswell Julia Draghi Brigitte Ecker P nar Eldemir Klaus Feldmann Cl udia Figueiredo Anne Gannon Jussi Kivist Manja Klemen i Theodor Leiber Nandarani Maistry Sara Moreno Pires Takalani Muloiwa Klenam Darlington Mutakwa Erna Nairz Wirth Ruaidhri Neavyn Jessica Nooij Mark O Hara Beate Pawle Alexandra Polido Maria P schl Silke Preymann Verena R gent Lotte Scheeren Kateryna Suprun Robertt Valente Floris J N van Berckel Smit Annemieke van der Horst and Sabine Weiss Handbook of Public Administration James L. Party Patronage and Party Government in European Democracies Petr Kopecký, Peter Mair, Maria Spirova, 2012-07-26 *Party Patronage and Party Government in European Democracies* brings together insights from the worlds of party politics and public administration in order to analyze the role of political parties in public appointments across contemporary Europe Based on an extensive new data gathered through expert interviews in fifteen European countries this book offers the first systematic comparative assessment of the scale of party patronage and its role in sustaining modern party governments Among the key findings are First patronage appointments tend to be increasingly dominated by the party in public office rather than being used or controlled by the party organization outside parliament Second rather than using appointments as rewards as used to be the case in more clientelistic systems in the past parties are now more likely to emphasize appointments that can help them to manage the infrastructure of government and the state In this way patronage becomes an organizational rather than an electoral resource Third patronage appointments are increasingly sourced from channels outside of the party thus helping to make parties look increasingly like network organizations primarily constituted by their leaders and their personal and political hinterlands

Amirkhanyan, Kristina T.

Lambright, 2017-11-28 Citizen Participation in the Age of Contracting is based on a simple premise in democracies power originates with citizens While citizen participation in government remains a central tenet of democracy public service delivery structures are considerably more complex today than they were fifty years ago Today governments contract with private organizations to deliver a wide array of services Yet we know very little about how citizens influence government decisions and policies in the hollow state Based on nearly 100 interviews with public and private managers our findings about the state of citizen participation in contract governance are somewhat disheartening Public and private organizations engaged citizens in a number of ways However most of their efforts failed to shift the power structure in communities and did not give citizens a chance to fundamentally shape local priorities and programs Instead elected officials and professional staff largely maintained control over significant policy and administrative decisions Widespread but narrow in their forms and impact the participation practices we uncovered did not live up to the ideals of democracy and self governance Citizen Participation in the Age of Contracting is suitable for those who study public administration as well as in other closely related fields such as nonprofit management and organizational behavior Radicalization in Belgium and the Netherlands Nadia

Fadil, Francesco Ragazzi, Martijn de Koning, 2019-05-30 The concept of radicalization is now used to account for all forms of violent and non violent political Islam Used widely within the security services and picked up by academia the term was initially coined by the General Intelligence and Security Service of the Netherlands AIVD after the 9 11 and Pentagon attacks an origin that is rarely recognised This book comprises contributions from leading scholars in the field of critical security studies to trace the introduction adoption and dissemination of radicalization as a concept It is the first book to offer a critical analysis and history of the term as an empty signifier that is a word that might not necessarily refer to something existing in the real world The diverse contributions consider how the term has circulated since its emergence in the Netherlands and Belgium its appearance in academia its existence among the people categorized as radicals and its impact on relationships of trust between public officials and their clients Building on the traditions of critical security studies and critical studies on terrorism the book reaffirms the importance of a reflective approach to counter radicalization discourse and policies It will be essential reading for scholars of security studies political anthropology the study of Islam in the west and European studies The SAGE Handbook of Action Research Peter Reason, Hilary Bradbury, 2013-03-26 For anyone seeking to create meaning out of life inspire others with publication of research discoveries and insights and help the world become a better place within which to live and work action research holds great promise as an approach The challenge is to

do it well and with rigor The Handbook is a magnificent collection of articles that will help the reader do all of that Richard E Boyatzis Case Western Reserve University and ESADE This second volume will be a welcome extension of the landmark first volume of the SAGE Handbook of Action Research It effectively secures the field's second wave in a particularly powerful and creative articulation of well theorised practice It could not be more timely for a fast growing field that has attracted recent appreciation from parties as disparate as Shell 3M Australian Aboriginal women in outback Australia working to prevent harm to children and the Secretary General of the UN Yoland Wadsworth For anyone thinking about or doing action research this book is an obligatory point of reference If any one text both maps the action research paradigm and at the same time moves it on this is it Bill Cooke Manchester Business School Building on the strength of the seminal first edition the The SAGE Handbook of Action Research has been completely updated to bring chapters in line with the latest qualitative and quantitative approaches in this field of social inquiry Peter Reason and Hilary Bradbury have introduced new part commentaries that draw links between different contributions and show their interrelations Throughout the contributing authors really engage with the pragmatics of doing action research and demonstrate how this can be a rich and rewarding reflective practice They tackle questions of how to integrate knowledge with action how to collaborate with co researchers in the field and how to present the necessarily messy components in a coherent fashion The organization of the volume reflects the many different issues and levels of analysis represented This volume is an essential resource for scholars and professionals engaged in social and political inquiry organizational research and education

Lockean Liberalism in International Relations Alexandru V. Grigorescu, Claudio J. Katz, 2024-04-04 This Element applies a new version of liberalism to international relations IR one that derives from the political theory of John Locke It begins with a survey of liberal IR theories showing that the main variants of this approach have all glossed over classical liberalism's core concern fear of the state's concentrated power and the imperative of establishing institutions to restrain its inevitable abuse The authors tease out from Locke's work its realist elements his emphasis on politics power and restraints on power the Lockean tripod They then show how this Lockean approach 1 complements existing liberal

approaches and answers some of the existing critiques directed toward them 2 offers a broader analytical framework for several very different strands of IR literature and 3 has broad theoretical and practical implications for international relations
