Exploring Aesthetic Approaches to Arts Integration Marina Sotiropoulou-Zormpala, 2025-05-30. This book re-examines the role of arts integration in the preschool and primary school curricula, arguing for the creation of an educational environment where children can process every taught subject as an aesthetic stimulus. Deriving from the author's earlier work, this scholarly volume attempts to develop novel criteria for arts integration curricula through examining the effects of different indicative arts integration activities implemented in preschool and primary classrooms. Taking a pedagogical approach, chapters enable readers to connect theoretical insights, implementation strategies, and corresponding methodological guidelines. Ultimately, this book argues that the aesthetic integration of the arts into the curricula of preschool and primary schools has three distinct important effects on the educational process: fostering a more creative and productive education through a multilevel approach; creating opportunities for holistic education by enhancing children's multifaceted learning involvement; and promoting multimodal and inclusive education by providing diverse resources of meaning-making. This book will be of interest to researchers, postgraduate students, and academics in the fields of primary education, curriculum studies, teacher education, and arts education. Educational policymakers and teacher trainers may also benefit from this volume more broadly.

Community Arts Education Ching-Chiu Lin, Anita Sinner, Rita L. Irwin, 2023-08-14. This edited collection offers global perspectives on the transverse boundary-blurring possibilities of community arts education. Invoking transversality as an overarching theoretical framework and a methodological structure, 55 contributors—community professionals, scholars, artists, educators, and activists from sixteen countries—offer studies and practical cases exploring the complexities of community arts education at all levels. Such complexities include challenges created by globalizing phenomena such as the COVID-19 pandemic; ongoing efforts to achieve justice for Indigenous peoples; continuing movement of immigrants and refugees; growing recognition of issues related to equity, diversity, and inclusion in the workplace; and the increasing impact of grassroots movements and organizations. Chapters are grouped into four thematic clusters: Connections, Practices, Spaces, and Relations, that map these and other intersecting assemblages of transversality. Thinking transversally about community art education not only shifts our understanding of knowledge from a passive

construct to an active component of social life but redefines art education as a distinctive practice emerging from the complex relationships that form community
