Handbook Of Implementation Science For:

Handbook on Implementation Science Per Nilsen, Sarah A. Birken, 2020-05-29 The Handbook on Implementation Science provides an overview of the field's multidisciplinary history, theoretical approaches, key concepts, perspectives, and methods. By drawing on knowledge concerning learning, habits, organizational theory, improvement science, and policy research, the Handbook offers novel perspectives from a broad group of international experts in the field representing diverse disciplines. The editors seek to advance implementation science through careful consideration of current thinking and recommendations for future directions. Handbook of Implementation Science for Psychology in Education Barbara Kelly, Daniel F.

Perkins, 2012-08-20 This book aims to help policy makers, stakeholders, practitioners, and teachers in psychology and education provide more effective interventions in educational contexts. It responds to disappointment and global concern about the failure to implement psychological and other interventions successfully in real-world contexts. Often, interventions carefully designed and trialed under controlled conditions prove unpredictable or ineffective in uncontrolled real-life situations. This book looks at why this is the case and pulls together evidence from a range of sources to create original frameworks and guidelines for effective implementation of interventions. *Handbook of Implementation Science for Psychology in Education* Barbara Kelly, Daniel F. Survival Guide for Early Career Researchers Dominika Kwasnicka, Alden Yuanhong Lai, 2022-11-08. Navigating research careers is often highly challenging for early career researchers (ECRs) in the social sciences. The ability to thrive in research careers is complex and requires soft people and management skills and resilience that often cannot be formally taught through university coursework. Written from a peer perspective, this book provides guidance and establishes emotional rapport on topical issues relevant for ECRs in academia and industry. The authors are ECRs who have been successful in navigating their careers and they seek to connect with readers in a supportive and collegial manner. Each chapter includes elements of story telling and scientific thinking and is organized into three parts: 1. a personal story that is relevant to the topic; 2. key content on professional and personal effectiveness based on evidence in the psychological, sociological and/or management sciences; and 3. action points and practical recommendations. The topics covered are specifically curated for people considering undertaking research careers or already working in research, including: Work Hard, Snore Hard: Recovery from Work for Early Career Researchers; Networking and Collaborating in Academia; Increasing Your Scientific Impact and Having Fun in the Process; Accelerating Your Research Career with Open Science; Engaging with the Press and Media; Make Your Science Go Viral; How to Maximize the Impact of Your Research; Exploring the Horizon; Navigating Research Careers Outside of Academia; Thinking like an Implementation Scientist; and Applying Your Research in Practice. *Survival Guide for Early Career Researchers* summarizes relevant evidence based research to offer advice in strategic but also supportive ways to ECRs. It is an essential go to practical resource for PhD students, postdoctoral fellows and junior faculty. This book will also benefit senior researchers who are serving as mentors or delivering professional development programs, administrators and educators in institutions of higher learning and anyone with an interest in building a successful research career.
