Handbook Of Shale Gas Law And Policy:

Handbook of Shale Gas Law and Policy Tina Hunter, 2016 To date petroleum law and policy in Europe has focused offshore Over the last fifty years it has been driven by the development and regulation of vast oil and gas resources in the North Sea However a new source of petroleum is now emerging in Europe that of the unconventional resource of shale gas Since 2011 the UK has been striving to undertake the development of shale gas through the granting of a consent to drill Concentrating solely on shale gas this book is structured around five themes namely an overview and introduction to shale gas activities shale gas economics and energy security access to shale gas resources shale gas law and regulation and the future of shale gas It examines the fundamental principles and provides the reader with a practical applicable analysis of shale gas exploration and extraction Looking at the legal scientific and economic issues relating to shale gas extraction from the perspective of developed United States and Canada developing Australia and emerging jurisdictions United Kingdom this book provides unique perspectives that the reader can apply to their own jurisdiction With contributions by Roberto F Aguilera David Campin Simone Fraser Andrew Garnett Tina Hunter Allan Ingelson Andrey Konoplyanik Steven Latta Alastair R Lucas Cristelle Maurin David M Ong John Paterson Marian Radetzki Slawomir Raszewski Peter Styles Emre senmez Vlado Vivoda Michael Weir and Hannah J Wiseman Dr Tina Hunter is a Professor in Energy Law and the Director of the Centre for Energy Law University of Aberdeen United Kingdom *Shale Gas, the Environment and Energy Security* Ruven Fleming, 2017-09-29 This pioneering and in depth study into the regulation of shale gas extraction examines how changes in the constitutional set ups of EU Member States over the last 25 years have substantially altered the legal leverage of environmental protection and energy security as state objectives As well as offering the first formal assessment of the legality of fracking bans and moratoria Ruven Fleming further proposes a new methodology for the development of legally sound regulation of new energy technologies in the context of the energy transition [Agricultural Land Use and Natural Gas Extraction Conflicts](#) Madeline Taylor, Tina Hunter, 2018-11-02 Onshore unconventional gas operations in most jurisdictions operate on the legal principle that all activities during exploration and extraction are temporary in nature The concept that the onshore unconventional gas industry has a temporary effect on the land on which it operates creates a regulatory paradox On one hand unconventional gas activities create energy security national wealth and a burgeoning export industry On the other agricultural land and agriculturalists may be significantly disadvantaged by unconventional gas activities potentially producing permanent damage to non renewable fertile soils and spoiling the underground water tables Thus threatening future food security and food sovereignty This book explores the socio regulatory dimensions of coexistence between agricultural and onshore unconventional gas land uses in the jurisdictions with the highest concentration of proven unconventional gas reserves Australia Canada the USA the UK France Poland and China In exploring the differing regulatory standpoints of unconventional gas land uses on productive farming land in the chosen jurisdictions this book provides an

original three part categorisation of regulatory approaches addressing the coexistence of agricultural land and unconventional gas namely adaptive management precautionary and finally statism It offers a timely and topical approach to socio legal natural resource governance theory based on the participation transparency and empowerment for agricultural landholders examining how differing frameworks such as the collective bargaining framework can create equitable and sustainable contractual arrangements with unconventional gas companies

Chinese-Japanese Competition and the East Asian Security Complex Jeffrey Reeves, Jeffrey Hornung, Kerry Lynn Nankivell, 2017-07-14 This volume examines contemporary diplomatic economic and security competition between China and Japan in the Asia Pacific region The book outlines the role that Sino Japanese competition plays in East Asian security an area of study largely overlooked in contemporary writing on Asian security which tends to focus on US China relations and or US hegemony in Asia The volume focuses on Chinese and Japanese foreign policy under President Xi Jinping and Prime Minister Shinz Abe and regional security dynamics within and between Asian states institutions since 2012 It employs regional security complex theory as a theoretical framework to view Chinese and Japanese competition in the Asian region In doing so the volume draws on a levels of analysis approach to demonstrate the value in looking at security in the Asia Pacific from a regional rather than global perspective The vast majority of existing research on the region s security tends to focus on great power relations and treats Asia as a sub region within the larger global security architecture In contrast this volume shows how competition between the two largest Asian economies shapes East Asia s security environment and drives security priorities across Asia s sub regions As such this collection provides an important

Local Autonomy as a Human Right

Joshua B. Forrest, 2021-08-27 Local Autonomy as a Human Right contends that local communities struggle to preserve their territorial autonomy over time despite changes to the broader political and geographic contexts within which they are embedded Forrest argues that this both reflects and is evidence of a worldwide embrace of local control as a key political and social value indeed of such importance that it should be embraced and codified as a human right This study weaves together evidence grounded in a variety of disciplines history geography comparative politics sociology public policy anthropology international jurisprudence rural studies urban studies to make clear that a presumed inherent moral right to local self determination has been manifested in many different historical and social contexts This book constructs a compelling argument favoring a human right to local autonomy It identifies practical factors that help to account for the relative success of communities that are able to assert local control over time Here particular attention is paid to whether localities are able to generate policy and organizational capacity Forrest suggests that a focus on local policy and organizational capacity can help to explain why some communities attempting to assert greater local control are more successful than others Local Autonomy as a Human Right contributes to scholarly debates regarding the varied impacts of globalization with the place based perspective and moral emphasis on territorial centered rights put forth herein offering a necessary counter narrative to the often presumed predominance of global forces
