Histoire Modernité Sonore Jonathan Sterne:

Exciting the Body Sonsoles Hernández Barbosa, 2025-01-23 This book uncovers how during the origins of modernity in the nineteenth century the senses were mobilised to sell more both through the popularisation of objects aimed at the senses such as panoramas optical boxes automatons music boxes and pianolas and also through marketing mechanisms for example advertising and window dressing All these novel objects and spaces had one thing in common the aim of attracting the public by stimulating the senses By examining practices that mobilised the senses in the emerging fields of advertising marketing and the leisure industry and through an approach that involves elements from the history of the senses visual studies sound studies and aesthetics this book explores what this new sensory driven mass culture was all about The basis of English translation of this book originally in Spanish *Vidas excitadas Sensorialidad y capitalismo en la cultura moderna* 2022 was facilitated by artificial intelligence The author with the support of Lucille Banham has subsequently revised the text further in an endeavour to refine the work stylistically Czech and Polish Sound Memories of the Second World War Radmila Švaříčková Slabáková, Marcin Filipowicz, Dobrawa Lisak-Gębala, Sławomir Wieczorek, Andrea Hanáčková, 2025-11-03 This book investigates the crucial yet often overlooked role of sound in shaping the memory of the Second World War Through an interdisciplinary and transnational approach this volume addresses a notable gap in memory studies and argues that auditory experiences are central to how war is remembered commemorated and narrated By placing sound at the heart of collective remembrance this book reveals how sonic elements influence public discourse shape collective identities and contribute to the evolving transformation of war memory Bringing together scholars from the Czech Republic and Poland this volume examines how the Second World War has been remembered through sound since the 1990s across three distinct media museum exhibitions prose fiction and sound art including soundwalks and field recordings This innovative framework underscores the importance of exploring how different media evoke and reproduce sound to grasp the complexity and diversity of wartime memory in Central Europe Focusing on Czech and Polish memory cultures the book demonstrates that sound may function in multiple and sometimes contradictory ways as a means of reinforcing national narratives as a tool for critical engagement or as a medium for experimental and marginal perspectives This volume is essential reading for scholars in memory studies sound studies cultural and public history museology literary theory and musicology as well as for museum professionals and anyone interested in how the past resonates literally and metaphorically through sound
