Histoire Naturelle Sous Familles Endemiques Madagascar:

The New Natural History of Madagascar Steven M. Goodman, 2022-11-15 A marvelously illustrated reference to the natural wonders of one of the most spectacular places on earth Separated from Africa's mainland for tens of millions of years Madagascar has evolved a breathtaking wealth of biodiversity becoming home to thousands of species found nowhere else on the planet The New Natural History of Madagascar provides the most comprehensive up to date synthesis available of this island nation's priceless biological treasures Now fully revised and expanded this beautifully illustrated compendium features contributions by more than 600 globally renowned experts who cover the history of scientific exploration in Madagascar as well as the island's geology and soils climate forest ecology human ecology marine and coastal ecosystems plants invertebrates fishes amphibians reptiles birds and mammals This invaluable two volume reference also includes detailed discussions of conservation efforts in Madagascar that showcase several successful protected area programs that can serve as models for threatened ecosystems throughout the world Provides the most comprehensive overview of Madagascar's rich natural history Coedited by 18 different specialists Features hundreds of new contributions by world class experts Includes hundreds of new illustrations Covers a broad array of topics from geology and climate to animals plants and marine life Sheds light on newly discovered species and draws on the latest science An essential resource for anyone interested in Madagascar or tropical ecosystems in general from biologists and conservationists to ecotourists and armchair naturalists

Conservation and Environmental Management in Madagascar Ivan R. Scales, 2014-03-14 Madagascar is one of the most biologically diverse places on the planet the result of 160 million years of isolation from the African mainland More than 80% of its species are not found anywhere else on Earth However this highly diverse flora and fauna is threatened by habitat loss and fragmentation and the island has been classified as one of the world's highest conservation priorities Drawing on insights from geography anthropology sustainable development political science and ecology this book provides a comprehensive assessment of the status of conservation and environmental management in Madagascar It describes how conservation organisations have been experimenting with new forms of protected areas community based resource management ecotourism and payments for ecosystem services But the country must also deal with pressing human needs The problems of poverty development environmental justice natural resource use and biodiversity conservation are shown to be interlinked in complex ways Authors address key questions such as who are the winners and losers in attempts to conserve biodiversity And what are the implications of new forms of conservation for rural livelihoods and environmental justice The Birds of Africa: Volume VIII Roger Safford, Frank Hawkins, 2013-07-25 Universally recognised as by far the most authoritative work ever published on the subject The Birds of Africa is a superb multi contributor reference work with encyclopaedic species texts stunning paintings of all species and numerous subspecies hundreds of informative line drawings detailed range maps and extensive bibliographies This eighth and final volume covers the Malagasy region which comprises Madagascar and the

various islands and archipelagos of the Indian Ocean including the Seychelles the Comoros Mauritius and Réunion Every resident and migrant species is covered in full detail comparable to other volumes in the series and with a colour map for each species Vagrants are treated in less detail All species are illustrated on a beautiful series of 64 colour plates with original artwork from John Gale and Brian Small *Chamberlain's Birds of the Indian Ocean Islands* Ian Sinclair, 2013-07-17 *Birds of the Indian Ocean Islands* is a comprehensive guide to the bird life of Madagascar the Seychelles the Comoros and the Mascarenes an area that boasts high levels of endemism This new expanded edition is fully updated to reflect taxonomic changes and now describes and illustrates 502 species The species accounts cover the birds appearance basic behaviour preferred habitats geographical distribution and IUCN threat status The text is complemented by newly designed plates with labels pinpointing key differentiating features The introduction includes maps for each island lists the region's 211 endemic species and gives pointers on where to go bird watching **Parcours de recherche à Madagascar** Christian
