Nelson's Encyclopaedia, 1907 **Palaces of Time** Elisheva Carlebach, 2011-04-04 Palaces of Time resurrects the seemingly banal calendar as a means to understand early modern Jewish life Elisheva Carlebach has unearthed a trove of beautifully illustrated calendars to show how Jewish men and women both adapted to the Christian world and also forged their own meanings through time

Astronomy and History Selected Essays O. Neugebauer, 2013-11-11 The collection of papers assembled here on a variety of topics in ancient and medieval astronomy was originally suggested by Noel Swerdlow of the University of Chicago He was also instrumental in making a selection which would in general be on the same level as my book *The Exact Sciences in Antiquity* It may also provide a general background for my more technical *History of Ancient Mathematical Astronomy* and for my edition of *Astronomical Cuneiform Texts* Several of these republished articles were written because I wanted to put to rest well entrenched historical myths which could not withstand close scrutiny of the sources Examples are the supposed astronomical origin of the Egyptian calendar see 9 the discovery of precession by the Babylonians 16 and the simplification of the Ptolemaic system in Copernicus *De Revolutionibus* 40 In all of my work I have striven to present as accurately as I could what the original sources reveal which is often very different from the received view Thus in 32 discussion of the technical terminology illuminates the meaning of an ancient passage which has been frequently misused to support modern theories about ancient heliocentrism in 33 an almost isolated instance reveals how Greek world maps really looked and in 43 the Alexandrian Easter computus held in awe by many historians is shown from Ethiopic sources to be based on very simple procedures
