Orser Jr.,2023-07-18 How do archaeologists think How do archaeologists take the scattered and fragmentary remains collected from past settlements and create meaningful reasonable interpretations of past human history In the second edition of *Archaeological Thinking* Charles E Orser Jr provides answers to these questions and more by explaining in non technical language the most basic elements of critical thinking in archaeology This book explores and explains such topics as the use of logic in framing argumentsthe curious issue of fact selectionthe use of analogiesthe role of archaeology in contemporary society and among present day communitiesapproaches to understanding the pastand the dangers of deceitful archaeological thinking Examples taken from the world of ancient aliens mythical sunken cities and mysterious creatures help readers learn how to separate reality from fiction regardless of their desire to become a professional archaeologist *International Handbook of Historical Archaeology* Teresita Majewski,David Gaimster,2009-06-07 In studying the past archaeologists have focused on the material remains of our ancestors Prehistorians generally have only artifacts to study and rely on the diverse material record for their understanding of past societies and their behavior Those involved in studying historically documented cultures not only have extensive material remains but also contemporary texts images and a range of investigative technologies to enable them to build a broader and more reflexive picture of how past societies communities and individuals operated and behaved Increasingly historical archaeology refers not to a particular period place or a method but rather an approach that interrogates the tensions between artifacts and texts irrespective of context In short historical archaeology provides direct evidence for how humans have shaped the world we live in today Historical archaeology is a branch of global archaeology that has grown in the last 40 years from its North American base into an increasingly global community of archaeologists each studying their area of the world in a historical context Where historical archaeology started as part of the study of the post Columbian societies of the United States and Canada it has now expanded to interface with the post medieval archaeologies of Europe and the diverse post imperial experiences of Africa Latin America and Australasia The 36 essays in the *International Handbook of Historical Archaeology* have been specially commissioned from the leading researchers in their fields creating a wide ranging digest of the increasingly global field of historical archaeology The volume is divided into two sections the first reviewing the key themes issues and approaches of historical archaeology today and the second containing a series of case studies charting the development and current state of historical

archaeological practice around the world This key reference work captures the energy and diversity of this global discipline today *Introducing Archaeology, Second Edition* Robert J. **The Historical Archaeology of Military Sites** Clarence Raymond Geier, Lawrence E. Babits, Douglas Dowell Scott, David G. Orr, 2010-12-15 The recent work of anthropologists historians and historical archaeologists has changed the very essence of military history While once preoccupied with great battles and the generals who commanded the armies and employed the tactics military history has begun to emphasize the importance of the common man for interpreting events As a result military historians have begun to see military forces and the people serving in them from different perspectives The Historical Archaeology of Military Sites has encouraged efforts to understand armies as human communities and to address the lives of those who composed them Tying a group of combatants to the successes and failures of their military commanders leads to a failure to understand such groups as distinct social units and in some instances self supporting societies structured around a defined social and political hierarchy regulated by law needing to be supplied and nurtured and often at odds with the human community whose lands they occupied be they those of friend or foe The Historical Archaeology of Military Sites will afford students professionals dealing with military sites and the interested public examples of the latest techniques and proven field methods to aid understanding and conservation of these vital pieces of the world's heritage

*Archaeologies of Mobility and Movement* Mary C Beaudry, Travis G. Parno, 2013-02-06 This collection of essays in *Archaeologies of Mobility and Movement* draws inspiration from current archaeological interest in the movement of individuals things and ideas in the recent past Movement is fundamentally concerned with the relationship s among time object person and space The volume argues that understanding movement in the past requires a shift away from traditional fieldwork based archaeological ontologies towards fluid trajectory based studies Archaeology by its very nature locates objects frozen in space literally in their three dimensional matrices at sites that are often stripped of people An archaeology of movement must break away from this stasis and cut new pathways that trace the boundary crossing contextuality inherent in object person mobility Essays in this volume build on these new approaches confronting issues of movement from a variety of perspectives They are divided into four sections based on how the act of moving is framed The groups into which these chapters are placed are not meant to be unyielding or definitive The first section *Objects in Motion* includes case studies that follow the paths of material culture and its interactions with groups of people The second section of this volume *People in Motion* features chapters that explore the shifting material traces of

human mobility Chapters in the third section of this book Movement through Spaces illustrate the effects that particular spaces have on the people and objects who pass through them Finally there is an afterward that cohesively addresses the issue of studying movement in the recent past At the heart of Archaeologies of Mobility and Movement is a concern with the hybridity of people and things affordances of objects and spaces contemporary heritage issues and the effects of movement on archaeological subjects in the recent and contemporary past

**Practices of Archaeological Stratigraphy** Edward C. Harris, 2014-06-28 Practices of Archaeological Stratigraphy brings together a number of examples which illustrate the development and use of the Harris Matrix in describing and interpreting archaeological sites This matrix the theory of which is described in two editions of the previous book by Harris Principles of Archaeological Stratigraphy made possible for the first time a simple diagrammatic representation of the stratigraphic sequence of a site no matter how complex The Harris Matrix by showing in one diagram all three linear dimensions plus time represents a quantum leap over the older methods which relied on sample sections only In this book 17

essays present a sample of new work demonstrating the strengths and uses of the Harris Matrix the first ever published collection of papers devoted solely to stratigraphy in archaeology The crucial relationships between the Harris methods open area excavation techniques the interpretation of interfaces and the use of single context plans and recording sheets is clarified by reference to specific sites These sites range from medieval Europe through Mayan civilizations to Colonial Williamsburg Virginia This book will be of great value to all those involved in excavating and recording archaeological sites and should help to ensure that the maximum amount of stratigraphic information can be gathered from future investigations Presents case studies which illuminate the Harris matrix method invented by Edward C Harris Senior editor is the inventor of this method and principle in the field Serves as a companion volume to Harris s Principles of Archaeological Stratigraphy

Trends and Traditions in Southeastern Zooarchaeology Tanya M. Peres, 2014-02-25 While most works of southeastern archaeology focus on stone artifacts or ceramics this volume is the first to bring together past and current trends in zooarchaeological studies Faunal reports are often relegated to appendices and not synthesized with the rest of the archaeological data but Trends and Traditions in Southeastern Zooarchaeology calls attention to the diversity of information that faunal remains can reveal about rituals ideologies socio economic organization trade and past environments These essays by leading practitioners in this developing field highlight the differences between the archaeological focus on animals as the food source of their time and the belief among zooarchaeologists that animals represent a far more complex ecology With broad methodological and interpretive analysis of sites throughout the region the essays range in topic from the enduring symbolism of shells for more than 5 000 years to the domesticated dog cemeteries of Spirit Hill in Jackson County Alabama and to the subsistence strategies of Confederate soldiers at the Florence Stockade in South Carolina Ultimately challenging traditional concepts of the roles animals have played in the social and economic development of southeastern cultures this book is a groundbreaking and seminal archaeological study

**Archaeological Practice as Politics and Ethics** John Carman, 2024-08-29 This book is of relevance to all archaeologists and all others concerned with how an interest in the past impacts on the present This book explores the manner in which archaeology as a discipline and a field of endeavour contributes to the modern world The focus throughout the book is on practices the range of different things that archaeologists do and how they do and have done it in order to explore the field as a distinctive aspect of social practice over time It also concerns the structures social political economic professional philosophical in which archaeology is performed and the consequences for the discipline and its practitioners Throughout there is a concern especially with archaeology as a field of political and ethical decision making aspects well recognised by practitioners but rarely emphasised The book both asks and answers questions about the perception of archaeology from both within and outside the field The book draws widely on previous work by the author and others looking at the techniques of the field the people involved the political and social impacts both on and by the field In doing so it seeks to bring these different perspectives together to create a more

holistic idea of what archaeology is has been and could be The book is offered to those outside the field as a justification for archaeology a field coming under increasing pressure from those who consider it as so many humanities and social science disciplines as an expensive luxury
