This revised edition of Nevalainen and Raumolin-Brunberg's ground-breaking work discusses the grammatical developments that shaped English in the early modern period, presents the sociolinguistic factors affecting linguistic change in Tudor and Stuart English, including gender, social status, and regional variation, showcases the authors' research into personal letters from the people who were the driving force behind these changes, and demonstrates how historical linguists can make use of social and demographic history to analyse linguistic variation over an extended period of time. Historical Linguistics and Endangered Languages Patience Epps, Danny Law, Na'ama Pat-El, 2021-07-28. This collection showcases the contributions of the study of endangered and understudied languages to historical linguistic analysis and the broader relevance of diachronic approaches toward developing better informed approaches to language documentation and description. The volume brings together perspectives from both established and up-and-coming scholars and represents a globally and linguistically diverse range of languages. The collected papers demonstrate the ways in which endangered languages can challenge existing models of language change based on more commonly studied languages and can generate innovative insights into linguistic phenomena such as pathways of grammaticalization, forms and dynamics of contact-driven change, and the diachronic relationship between lexical and grammatical categories. In so doing, the book highlights the idea that processes and outcomes of language change, long held to be universally relevant, may be more sensitive to cultural and typological variability than previously assumed. Taken as a whole, this collection brings together perspectives from language documentation and historical linguistics to point the way forward for richer understandings of both language change and documentary descriptive approaches, making this key reading for scholars in these fields.
