Berend, 2020-02-28 This book presents the sharp regional differences within the integrating European continent Four regions Northwestern Europe Southern Europe Central Europe and Eastern Southeastern Europe represent high medium and relatively less developed levels of economic advancement These disparities have emerged as a result of historical differences that produced and reinforced cultural and behavioral differences The author examines the distinctions between the regions looks at how these differences transpired and became so retrenched and answers the question of why some countries were able to elevate to higher levels of economic development while others could not This book is unique in that it provides a timely historical analysis of the main causes of the most pressing conflicts in Europe today Readers will come away from this book with a deeper understanding of the sharp divergence in economic standing between the four different regions of Europe as well as knowledge about how institutional corruption and other cultural features exacerbated these variations The book also offers a better understanding of major European Union conflicts between member countries and between member and nonmember countries as well as the rise of autocratic regimes in certain countries The book begins with a short history of European integration throughout European civilization and then goes on to discuss the modern reality of integration and attempts to homogenize the Continent that divided into four different macro regions It will primarily appeal to scholars researchers and students studying Europe from various fields including economics business history political science and sociology as well as a general readership interested in Europe's past present and future *Europe's Growth Champion* Marcin Piatkowski, 2025-09-03 What makes countries rich What makes countries poor Europe's Growth Champion Insights from the Economic Rise of Poland seeks to answer these questions and many more through a study of one of the biggest and least heard about economic success stories Over the last thirty years Poland has transitioned from a perennially backward poor and peripheral country to unexpectedly join the ranks of the world's high income countries Europe's Growth Champion is about the lessons learned from Poland's remarkable experience the conditions that keep countries poor and the challenges that countries need to face in order to grow It defines a new growth

model that Poland and its Eastern European peers need to adopt in order to continue to grow and catch up with their Western counterparts Europe's Growth Champion emphasizes the importance of the fundamental sources of growth institutions culture ideas and leaders in economic development It argues that a shift from an extractive society where the few rule for the benefit of the few to an inclusive society where many rule for the benefit of many was the key to Poland's success It asserts that a newly emerged inclusive society will support further convergence of Poland and the rest of Central and Eastern Europe with the West and help to sustain the region's Golden Age It also acknowledges the future challenges that Poland faces and that moving to the core of the European economy will require further reforms and changes in Poland's developmental character This new edition analyses what has changed in the global and Polish economy since 2018 In particular it discusses the effects of the COVID 19 pandemic climate change Russia's aggression against Ukraine and the ongoing restructuring of the global value chains It also diagnoses new opportunities and challenges for the future of Poland

Two Roads Diverge Christopher A. Hartwell, 2016-09-26 The dramatic events of Maidan in February 2014 shone a spotlight on the immense problems facing Ukraine At the same time that Ukraine was undergoing turmoil its western neighbor Poland was celebrating twenty five years of post communism with a rosy economic outlook and projections of continued growth How could two countries who shared similar linguistic cultural economic and political heritages diverge so wildly in economic performance in such a short span of time The main argument of this book is that institutions and more specifically the evolution or neglect of the particular institutions needed for a market economy explain the economic divergence between Ukraine and Poland This book discusses the evolution of key institutions such as property rights trade and the role of the executive branch of government to explain the recent relative performance of the two countries

American Empire A. G. Hopkins, 2018-02-20 A new history of the United States that turns American exceptionalism on its head American Empire is a panoramic work of scholarship that presents a bold new global perspective on the history of the United States Drawing on his expertise in economic history and the imperial histories of Britain and Europe A G Hopkins takes readers from the colonial era to today to show how far from diverging the United States and Western Europe followed similar trajectories throughout this long period and how America's dependency on Britain and Europe extended much later into the nineteenth century than previously understood In a sweeping narrative spanning three centuries Hopkins describes how the revolt of the mainland colonies was the product of a crisis that afflicted the imperial states of Europe generally and how the history of the American republic between 1783 and 1865 was a response not to the termination of British influence but to its continued expansion He traces how the creation of a U S industrial nation state after the Civil War paralleled developments in Western Europe fostered similar destabilizing influences and found an outlet in imperialism through the acquisition of an insular empire in the Caribbean and Pacific The period of colonial rule that followed reflected the history of the European empires in its ideological justifications economic relations and administrative principles After 1945 a profound

shift in the character of globalization brought the age of the great territorial empires to an end American Empire goes beyond the myth of American exceptionalism to place the United States within the wider context of the global historical forces that shaped the Western empires and the world

Communist Parties Revisited Rüdiger Bergien, Jens Gieseke, 2018-01-31 The ruling communist parties of the postwar Soviet Bloc possessed nearly unprecedented power to shape every level of society perhaps in part because of this they have been routinely depicted as monolithic austere and even opaque institutions Communist Parties Revisited takes a markedly different approach investigating everyday life within basic organizations to illuminate the inner workings of Eastern Bloc parties Ranging across national and transnational contexts the contributions assembled here reconstruct the rituals of party meetings functionaries informal practices intra party power struggles and the social production of ideology to give a detailed account of state socialist policymaking on a micro historical scale

Franz Liszt Erika Quinn, 2014-08-07 This biography of the musician Franz Liszt contributes to our understanding of national identity formation and its interaction with cosmopolitanism Liszt exemplified the nineteenth century quest for subjective definition and fulfillment Seeking to gain agency authority and community Liszt experimented with various subject positions from which to forward his goals The stances he selected anchored in ideas about nation religion and art allowed him to retain his cosmopolitan sensibility while making specific aesthetic and creative claims Quinn s analysis of Liszt s correspondence and musical criticism as well as of contemporary reviews of his performances compositions and essays demonstrates the lack of a nationalist exclusivity in Liszt s life was a historical phenomenon rather than a personal quirk as previous scholarship has often claimed

Condemned to Repeat it Sheldon R. Anderson, 2008-01-01 Condemned to Repeat It examines the historical myths that underwrote U S containment policy during the Cold War Anderson argues that the historical record does not support the applicability of lessons learned from nineteenth century great power diplomacy peacemaking at the end of World War One the Munich Agreement and the Yalta Conference

Entangled Histories of the Balkans - Volume Two Roumen Daskalov, Diana Mishkova, 2013-11-14 Modern Balkan history has traditionally been studied by national historians in terms of separate national histories taking place within bounded state territories The authors in this volume take a different approach They all seek to treat the modern history of the region from a transnational and relational perspective in terms of shared and connected as well as entangled histories transfers and crossings This goes along with an interest in the way ideas institutions and techniques were selected transferred and adapted to Balkan conditions and how they interacted with those conditions resulting in *mélanges* and hybridization The volume also invites reflection on the interacting entities in the very process of their creation and consecutive transformations rather than taking them as givens Contributors include Diana Mishkova Alexander Vezhenkov Constantin Iordachi Roumen Daskalov Tchavdar Marinov Blagovest Njagulov
