Landscapes And Landforms Of South Africa World Geomorphological Landscapes:

Landscapes and Landforms of South Africa Stefan Grab, Jasper Knight, 2015-03-05 This book presents a beautifully illustrated overview of the most prominent landscapes of South Africa and the distinctive landforms associated with them. It describes the processes, origins, and the environmental significance of those landscapes, including their relationships to human activity of the past and present. The sites described in this book include, amongst others, the Blyde River Canyon, Au-grabies Falls, Kruger National Park, Kalahari desert landscapes, the Great Escarpment, Sterkfontein caves and karst system, Table Mountain, Cape winelands, coastal dunes, rocky coasts, Boer War battlefield sites, and Vredefort impact structure. *Landscapes and Landforms of South Africa* provides a new perspective on South Africa's scenic landscapes by considering their diversity, long and short term histories, and importance for geoconservation and geotourism. This book will be relevant to those interested in the geology, physical geography, and history of South Africa, climate change, and landscape tourism.

Landscapes and Landforms of Nigeria Adetoye Faniran, Lawrence Kosoko Jeje, Olutoyin A. Fashae, Adeyemi O. Olusola, 2023-02-28 The book deals with the most striking landscapes and landforms of Nigeria. Attention is paid to the diversity of geomorphic features found in the country from the coast to the extreme north, approached geographically at the national, regional, and local scales, with a view to highlight the combined influence of geological, climatic, biotic, and anthropogenic influences, as well as geoheritage potentials. The topics and sites described range from the mainly depositional coastal lagoons and inlets, the most prominent of which is the oil-rich Niger Delta, characterized by the mangrove and rain forest, both of which have been seriously modified by human impact, through the coastal lowlands and associated hill country with derived deciduous and dry forest vegetation, the very prominent Niger-Benue Trough, and associated features, the savanna, semi-desert, covered high plains of the north, and the Chad Basin, each of which features spectacular landscapes and landforms, including human-made forms such as cities and cityscapes. The book provides the readers with the opportunity to explore the variety of Nigerian landscapes and landforms through informative texts, illustrated with color maps and photos. It will be relevant to scientists, scholars, as well as others interested in the geology, physical geography, geomorphology, landscape tourism, and other geoheritage-related information about the country. *Landscapes and Landforms of Botswana*

Frank D. Eckardt, 2022-05-17 This volume contains 22 chapters introducing a wide range of semi-arid and geologic landscapes. Botswana, a thinly populated nation the size of France, is a Southern African keystone country at the heart of the Kalahari, sharing some of the major sub-continental drainage basins such as the Limpopo, Zambezi, Orange, and Okavango, with its neighbouring countries. The extensive Kalahari Sand surface has been sculptured by numerous past processes which have produced subtle but regional landforms consisting of extensive dunes and shorelines. Incipient rifting has created the dynamic Okavango and Makgadikgadi fan basin systems which produce iconic wetlands with a world heritage status. Geological outcrops, in particular to the east, expose highly denuded basement lithologies which produce numerous

inselbergs that are home to a rich archaeological heritage The book also examines the geomorphology of mineral and water resources which sustain the economy and population and also features dedicated chapters that cover diamondiferous kimberlites caves pans dams duricrusts and wildlife Chapter 6 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com

Geomorphological Landscapes of the World Piotr Migon, 2010-01-22 Physical landscapes are one of the most fascinating facets of our Planet which tell stories about the evolution of the surface of the Earth This book provides up to date information about the geomorphology of the selected classic sites from around the world and shows the variety of geomorphological landscapes as moulded by different sets of processes acting over different timescales from millions of years to days The volume is written by nearly fifty geomorphologists from more than twenty countries who for many years have researched some of the unique sceneries on the planet The thirty six chapters present each continent of the world They describe landscapes of different origin so that the reader can learn about the complexity of processes behind the sceneries This is a useful reference book linking geomorphology with global initiatives focused on nature conservation

Landscapes and Landforms of the Horn of Africa Paolo Billi, 2022-09-30 This book focuses on regions for which until now the geomorphology was very poorly studied and relatively unknown Nevertheless the landforms and landscapes of the Horn of Africa are highly attractive diverse and in a few cases unique since they span very different environments from highland plateaus and mountains to lowlands even below sea level and coastlines with a high degree of diversity and from monsoon to arid climate conditions The main topics addressed in the book include the links between the geological evolution and the current large scale geomorphology of the Horn of Africa the large differences between the highlands and lowlands climate river hydrology and their variation through time within a climate change perspective This part of the world was home of the very first hominids The landscape in which they lived and evolved throughout the Pleistocene is described in comparison with the arid and inhospitable though immensely scenic environment of today Perennial and ephemeral rivers with very different morphology processes and hydrology drain the area and in combination with the past and recent uplift substantially contributed to provide the region with peculiar landscapes and landforms Long lasting weathering and erosion processes result in a typical inselberg landscape such as the Bur region or the currently exposed flatland of old peneplain surfaces Their changes through time induced by both natural and anthropogenic factors are addressed by a couple of case studies Though the region has few inhabitants they had to struggle to find their livelihood in a land that offers poor resources This resulted in landscape change and land degradation Examples of human impact on the landscape are presented at different scales This book provides readers interested in geography and geomorphology with essential scientific and educational information on the Landscapes and Landforms of Eritrea Djibouti and Somalia through simple though scientifically rigorous texts illustrated with several color maps and photos One main prerogative of this book is therefore to give an insight into a region of the world where for

geographical and historical constraints geomorphological investigation was very limited thus enriching its intrinsic informative value

Landscapes and Landforms of the Central Sahara Jasper Knight, Stefania Merlo, Andrea Zerboni, 2024-01-02 This book describes the Central Sahara region bringing together an unprecedented combination of diverse and often historic research published in different languages in order to describe its varied landscapes and landforms The Central Sahara region consists of Libya Algeria Mali Niger and Chad countries that share similar landscape histories and common landscape traits including massifs sand seas paleowater features and large depressions Furthermore human settlement of this region goes hand in hand with climate and environmental changes and landscape evolution during the Holocene and earlier hence Central Saharan landscapes and landforms provide valuable insights into landscape human relationships over long timescales The book offers a comprehensive yet accessible reference source drawing on both past and present interdisciplinary research and gathering the insights of authors from many different countries to explore a region that has largely been overlooked in available literature

Landscapes and Landforms of Namibia Andrew Goudie, Heather Viles, 2014-10-15 The landscapes of Namibia are of world class quality in beauty diversity and interest This book provides the first ever overview of the most important of these landscapes explains why they look as they do and evaluates why they are of note Writing from a geomorphological perspective the authors introduce the key processes and controls which influence landscape and landform development in Namibia Geological and tectonic background climate now and in the past vegetation and animals including humans are all identified as crucial factors influencing the landscape of Namibia today The book presents twenty one richly illustrated case studies of the most significant landscapes of Namibia ranging from the iconic Etosha Pan at the heart of the biggest wildlife conservation area in the north to the famous dunes and ephemeral river at Sossus Vlei in the heart of the Namib desert Each case study also contains a full list of the key references to the scientific work on that landscape The authors provide an assessment of the current state of conservation of these landscapes and their importance to tourism The book is recommended reading for anyone with a professional or amateur interest in the spectacular and intriguing landscapes of this part of southern Africa It provides a useful handbook for those travelling around Namibia and an invaluable reference guide for those interested in how landscapes develop and change

Rocky Landscapes of the World with Google Earth Andrew Goudie, 2024-12-20 This book provides an introduction to rocky landscapes through carefully selected images from Google Earth discussing what they show and provides references to the sites portrayed so that readers can go deeper if they wish Google Earth GE is remarkably useful for examining and appreciating phenomena on the face of the Earth This book demonstrates its value for understanding the landscapes associated with particular rock types and structures and for appreciating their aesthetics The text describes the features concerned their location and their origin often accompanied by ground images taken by the author

GeoTourism for Social Sustainability and Ecological Justice in Sub-Saharan Africa Khodani Matshusa, Llewellyn Leonard, 2024-12-02

This book provides a comprehensive overview of the potential of geotourism in sub Saharan Africa for promoting social sustainability and ecological justice It examines the challenges facing the region for geotourism development and the innovative approaches and best practices for overcoming these Drawing on case studies from the region the book provides innovative insights that explore the intersection of geotourism with poverty alleviation and job creation Thematically it engages with a range of critical issues from leveraging geotourism for local socio economic development to the intersection of geotourism with environmental conservation efforts The book delves into the intricacies of geoheritage and geotourism threats in the face of climate change and extractive industries By examining the untapped potential of geoheritage sites this book seeks to shed light on opportunities for promoting local sustainable development in economic social and environmental dimensions The book will be of great interest to academic scholars including undergraduate and postgraduate students industry governments and tourism and conservation organisations It will be of appeal to individuals in the fields of geotourism ecotourism cultural tourism sustainable tourism development geoeducation and geoscience

Landscapes and Landforms of Ethiopia Paolo Billi, 2015-03-23 This book provides a succinct but comprehensive presentation of key geomorphological locations and topics including information about geomorphological heritage and maps to visit the most important sites Apart from often being remarkably scenic landscapes reveal stories that often can be traced back in time tens of million years and include unique events This is particularly true for Ethiopia where spectacular examples of different landforms are present Its geomorphology varies from highlands marked by high volcanoes and incised by deep river gorges to the rift valley lakes endorheic systems and the below sea level lowlands with characteristic landscapes which are unique in the world Landscapes and Landforms of Ethiopia highlights all these topics including essential information about geology and tectonic framework past and present climate hydrology geographical regions and long term geomorphological history It is a highly informative book providing insight for readers with an interest in geography and geomorphology

Landscapes and Landforms of France Monique Fort, Marie-Françoise André, 2013-08-23 The Landforms and Landscapes of France provides an informative and attractive overview of the most scenic landscapes of France The geodiversity of France is emphasized for example the glacial landscapes of the Mont Blanc Massif the volcanoes of the French Massif Central the chalk cliffs and sand dunes of the Atlantic coast the granitic landscapes of Corsica or the lagoons and coral reefs of French Polynesia The objectives are to provide the reader with an enjoyable and informative description of the selected sites within their regional geographical and geological settings to offer an up to date survey of the evolution of France s landscape and to give additional information on the cultural value of the selected sites wherever appropriate prehistoric paintings legends related to sites famous vineyards etc The book is a richly illustrated reference work that makes accessible for the first time a wealth of information currently scattered among many national and regional journals It will be of benefit to earth scientists environmental scientists tourism geographers and conservationists

Ecology of Angola Brian John Huntley, 2023-03-07

This open access book richly illustrates the first and comprehensive account of the country's biomes and ecoregions the driving forces that account for their diversity and vulnerability and the ecological principles that provide an understanding of the patterns and processes that have shaped landscapes ecoregions and ecosystems Angola encompasses the greatest diversity of terrestrial biomes and is the second richest in terms of ecoregions of any African country Yet its biodiversity and the structure and functioning of its ecosystems are largely undocumented The author draws on personal field observations from over 50 years of involvement in ecological and conservation studies in Angola and across Southern Africa The vast recent literature published by researchers in neighboring better resourced countries provides depth to the accounts of ecological principles and processes relevant to Angola and thus contributing to the understanding and sustainable management of its natural resources

Landscapes and Landforms of England and Wales Andrew Goudie, Piotr Migoń, 2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists in landscape research geoconservation tourism and environmental protection

Landscapes and Landforms of India Vishwas S. Kale, 2014-05-23 The proposed monograph on Geomorphological Landscapes of India will aim to describe and explain in simple words the geomorphological characteristics and the origin of the above mentioned landforms and landscapes The proposed monograph will provide the background information about the geology climate and tectonic framework of the Indian region as well as cover Indian climates of the present and the past It will mainly cover the four main morphotectonic regions of India and about 15-20 distinct landforms of the Indian region as well as the major geomorphosites in India
