Landscapes Groundwork For College Reading New 1st Editions In Developmental English:

Landscapes: Groundwork for College Reading Christine Evans Carter, 2012-01-01 LANDSCAPES is a comprehensive college reading preparatory text spanning grade levels 8 10 that takes a metacognitive approach and focuses on how the brain processes information often referred to as brain based learning Since metacognition can best be understood as thinking about thinking the text consistently presents new information with written think alouds to model the thought process involved in applying skills and strategies to reading passages Based on the premise that the brain learns best through organization of information the text presents the recognition of text structure and organization as a fundamental skill one that is especially important for students who have limited prior knowledge of a subject This focus on text structure provides a scaffold onto which developmental level readers can apply new knowledge Information is presented in a carefully crafted sequence that serves to build upon prior knowledge and expand understanding of skills and strategies in a recursive manner The knowledge of how we learn the focus of the first chapter permeates the text and informs the selection of strategies and skills to be introduced and mastered in a specific order In addition learning is treated as incremental with the reader gradually taking more responsibility with each new chapter While each chapter emphasizes carefully selected reading skills and strategies thematic content for each chapter establishes solid background knowledge of and interest in the subject matter Specific and relevant study skills and vocabulary skills are integrated within each chapter as well Important Notice Media content referenced within the product description or the product text may not be available in the ebook version

Advances in Teacher Emotion Research Paul A. Schutz, Michalinos Zembylas, 2009-08-14 Some reports estimate that nearly 50% of teachers entering the profession leave within the first five years Alliance for Excellent Education 2004 Ingersoll 2003 Quality Counts 2000 One explanation of why teachers leave the profession so early in their career might be related to the emotional nature of the teaching profession For example teaching is an occupation that involves considerable emotional labor Emotional labor involves the effort planning and control teachers need to express organizationally desired

emotions during interpersonal transactions As such emotional labor has been associated with job dissatisfaction health symptoms and emotional exhaustion which are key components of burnout and related to teachers who drop out of the profession Research into emotional labor in teaching and other aspects of teachers emotions is becoming increasingly important not only because of the growing number of teachers leaving the profession but also because unpleasant classroom emotions have considerable implications for student learning school climate and the quality of education in general Using a variety of different methodological and theoretical approaches the authors in this edited volume *Advances in Teacher Emotion Research The Impact on Teachers Lives* provide a systematic overview that enriches our understanding of the role of emotions in teachers professional lives and work More specifically the authors discuss inquiry related to teachers emotions in educational reform teacher identity student involvement race class gender issues school administration and inspection emotional labor teacher burnout and several other related issues This volume then represents the accumulation of different epistemological and theoretical positions related to inquiry on teachers emotions acknowledging that emotions are core components of teachers lives *Advances in Teacher Emotion Research* takes an eclectic look at teacher emotions presenting current research from diverse perspectives thereby making this volume a significant contribution to the field
