Language As Disclosure Carolyn Slaughter, 2015-12-23 Written in the 1980 s heyday of Deconstruction in university English Departments Carolyn Norman Slaughter s study probes the ways that language works in the literature of a few American modernist authors Slaughter s purpose is not to prove the futility and meaninglessness of language as Deconstruction was striving to do at the time but instead to recover the first order importance and power of language its radical effects as set out in the philosophy of Martin Heidegger where language works to disclose reveal unfold Erschliessen However German philosopher Martin Heidegger 1889 1976 seems an unlikely hero to introduce into the 21st Century His 1930 s Nazi stain his misplaced hopes for and brief affiliation with the early Nazi movement and his mid century ostracism from American and Continental literary studies during the Deconstruction period served to minimize or mute his influence during the last decades of the 20th Century Moreover his private black notebooks written from 1931 into the 70 s have recently come to light prompting yet another problematic re assessment of his life and thought and legacy Slaughter however remains undaunted She has refocused her book Minimizing the scholarly trappings she presents Heideggerian readings of five familiar books that will inspire readers to reread the American works closely with clarity intensity and pleasure Language As Disclosure could be beneficially read in college literature classes or in any reader s own personal armchair In any case its disclosures may work anew to reawaken and stir original human questions to excite and energize the readers who can ask them

extensively on the Oppen archive with its thousands of pages of largely unpublished notes and drafts for poems in doing so he is able to map the distinctive contours of Oppen's poetic thinking and to investigate the complex origins of many of his poems Oppen emerges from this study as a writer of mercurial intensities for whom every poem constitutes a beginning again a freeing of the mind from thoughts known in advance A strikingly innovative and challenging poetics results from Oppen's attempt to avoid what he regards as the errors of the modernist avant garde and to create instead a designedly impoverished aesthetic which keeps poetry close to the grain of experience and to the political and ethical dilemmas it constantly poses

Travel, Modernism and Modernity Robert Burden, 2016-03-09 Focusing on the significance of travel in Joseph Conrad E M Forster D H Lawrence Henry James and Edith Wharton Robert Burden shows how travel enabled a new consciousness of mobility and borders during the modernist period For these authors Burden suggests travel becomes a narrative paradigm and dominant trope by which they explore questions of identity and otherness related to deep seated concerns with the crisis of national cultural identity He pays particular attention to the important distinction between travel and tourism at the same time that he attends to the slippage between seeing and sightseeing between the local character and the stereotype between art and kitsch and between older and newer ways of storytelling in the representational crisis of modernism Burden argues that the greater awareness of cultural difference that characterizes both the travel writing and fiction of these expatriate writers became a defining feature of literary modernism resulting in a consciousness of cultural difference that challenged the ethnographic project of empire
