Structure and Function of the Arabic Verb Maher Bahloul, 2007-08-07 Structure and Function of the Arabic Verb is a corpus based study that unveils the morpho syntax and the semantics of the Arabic verb Approaches to verbal grammatical categories the constituents of verbal systems often rely on either semantic pragmatic or syntactic analyses This research bridges the gap between these two distinct approaches through a detailed analysis of Taxis Aspect Tense and Modality in Standard Arabic This is accomplished by showing firstly some basic theoretical concerns shared by both schools of thought and secondly the extent to which semantic structures and invariant meanings mirror syntactic representations Maher Bahloul's findings also indicate that the basic constituents of the verbal system in Arabic namely the Perfect and the Imperfect are systematically differentiated through their invariant semantic features in a markedness relation Finally this study suggests that the syntactic derivation of verbal and nominal clauses are sensitive to whether or not verbal categories are specified for their feature values providing therefore a principled explanation to a long standing debate This reader friendly book will appeal to both specialists and students of Arabic linguistics language and syntax Arabic Idioms Ashraf Abdou, 2011-07-21 Idioms represent a fascinating linguistic phenomenon that has captured the attention of many linguists for decades This corpus based study of idioms in Modern Standard Arabic sheds light on their intricate nature establishes the major patterns of their linguistic behaviour and provides explanations for these patterns Adopting a descriptive framework the study addresses two main issues with regard to the discursive behaviour of idioms the discursive functions that they perform and the ways in which they contribute to the cohesion of their texts Examining primary data with regard to the semantic discursive lexical and grammatical properties of Arabic idioms the author touches on the ubiquity of these expressions in language use the wide range of functions they perform in discourse the problems they often cause in domains such as foreign

Reem Bassiouney,2015-01-27 Focussing on nationalist discourse before during and after the revolution of 2011 Reem Bassiouney explores the two way relationship between language in Egyptian public discourse and Egyptian identity Her sources include newspaper articles caricatures *The Dialect Laboratory* Gunther De Vogelaer,Guido Seiler,2012 Much theorizing in language change research is made without taking into account dialect data Yet dialects seem to be superior data to build a theory of linguistic change on since dialects are relatively free of standardization and therefore more tolerant of variant competition in grammar In addition as compared to most cross linguistic and diachronic data dialect data are unusually high in resolution This book shows that the study of dialect variation has indeed the potential perhaps even the duty to play a central role in the process of finding answers to fundamental questions of theoretical historical linguistics It includes contributions which relate a clearly formulated theoretical question of historical linguistic interest with a well defined solid empirical base The volume discusses phenomena from different domains of grammar phonology morphology and syntax and a wide variety of languages and language varieties in the light of several current theoretical frameworks

and physical environments the volume contributes to expanding our knowledge of the sociolinguistic educational political and social realities that occur in minoritized languages

The Politics of Written Language in the Arab World, 2017-07-31 The Politics of Written Language in the Arab World connects the fascinating field of contemporary written Arabic with the central sociolinguistic notions of language ideology and diglossia Focusing on Egypt and Morocco the authors combine large scale survey data on language attitudes with in depth analyses of actual language usage and explicit and implicit language ideology They show that writing practices as well as language attitudes in Egypt and Morocco are far more receptive to vernacular forms than has been assumed The individual chapters cover a wide variety of media from books and magazines to blogs and Tweets A central theme running through the contributions is the social and political function of doing informality in a changing public sphere steadily more permeated by written Arabic in a number of media
