The chapters written by widely acclaimed specialists provide concise and comprehensive information on the phonological, morphological and syntactic characteristics of each variety discussed. The articles are followed by exercises and study questions. The exercises are geared towards students and can be used for classroom assignments as well as for self study in preparation for exams. Instructors can use the exercises, sound samples and interactive maps to enhance their classroom presentations and to highlight important language features.

Language and Literature Studies Linguistics grade 1.0 A RWTH Aachen University Political Science language English abstract At the beginning of the third millennium English has clearly established itself as the leading language of the world. It is spoken around the globe as either first or second language and this widespread use and distribution has quite led to the emergence of several distinct varieties so that the global situation today is comparable to the fragmentation of single countries like Great Britain into dialect areas.

Language in the British Isles David Britain, 2007-08-23 The British Isles are home to a vast range of different spoken and signed languages and dialects. Language continues to evolve rapidly in its diversity in the number and the backgrounds of its speakers and in the repercussions it has had for political and educational affairs. This book provides a comprehensive survey of the dominant languages and dialects used in the British Isles. Topics covered include the history of English, the relationship between Standard and Non Standard Englishes, the major non standard varieties spoken on the islands and the history of multilingualism and the educational and planning implications of linguistic diversity in the British Isles. Among the many dialects and languages surveyed by the volume are British Black English, Celtic languages, Chinese, Indian, European migrant languages, British Sign Language and Anglo Romani. Clear and accessible in its approach, it will be welcomed by students in sociolinguistics, English language and dialectology as well as anyone interested more generally in language within British society.

Over the past few decades the book series *Linguistische Arbeiten* Linguistic Studies comprising over 500 volumes has made a significant contribution to the development of linguistic theory both in Germany and internationally. The series will continue to deliver new impulses for research and maintain the central insight of linguistics that progress can only be made in acquiring new knowledge about human languages both synchronically and diachronically by closely combining empirical and theoretical analyses. To this end we invite submission of high quality linguistic studies from all the central areas of general linguistics and the linguistics of individual languages which address topical questions, discuss new data and advance the

Essays on Language in Societal Transformation Tunde Opeibi, Josef Schmied, Tope Omoniyi, Kofo Adediji, 2015-01-30 This paper generally lends support to the arguments advanced by Awonusi 1989 1990 2004 and others in favour of an endonormative as opposed to an exonormative standard for English pronunciation in Nigeria They include the fact that the existing exonormative standard British Received Pronunciation RP has undergone and is still undergoing changes in its homeland and is not homogeneous The heightened social mobility of today's world perhaps works against the demarcation and homogenization of language varieties and this is all the more true of the varieties or lects that have been proposed for Nigerian English when these are related more or less explicitly to educational attainment Major attention is given in the paper to a schema of basilect mesolect and acrolect presented by Ugorji 2010 with a focus on his account of vowels and his presentation of a mechanism derived from optimality theory for evaluating vowels in contention The basilect and the mesolect are found to be so close to each other that they might be combined There would then be just two varieties In contrast the acrolect is close to British RP albeit with many variants due to the conflict of two standardising forces i.e. British RP and the basilect mesolect The vowel system of an officially adopted endonormative standard Nigerian RP would mainly be the same as that of British RP but the optimality mechanism could be employed to give preference to some of the Nigerian variants for inclusion in it
