Language and Power Norman Fairclough, 2013-10-11 This ground breaking introduction to critical discourse analysis has been revised and updated to take into account changing power relations in contemporary society **Living Together** Suzanne Majhanovich, Christine Fox, Adila Pasalic Kreso, 2009-04-30 SUZANNE MAJHANOVICH and CHRISTINE FOX Originally published in the journal International Review of Education Volume 54 Nos 3 4 287 297 DOI 10 1007 s11159 008 9097 9 Springer Science Business Media B V 2008 The papers in this collection have been selected from over 800 presentations given at the XIIIth World Congress of Comparative Education Societies held at the University of Sarajevo Bosnia and Herzegovina from 3 to 7 September 2007 The Congress was hosted on behalf of the WCCES by the Mediterranean Society of Comparative Education and in association with the International Association of Intercultural Education For such an international gathering it was appropriate that the theme chosen was Living Together Education and Intercultural Dialogue providing scope for contributions by participating scholars policy makers and practitioners in education from some 70 countries The presenters approached contemporary educational issues with knowledge and insights about a world characterized by the tensions and demands of global and local interests by regional conflicts and post conflict deliberations and by the global diaspora with cultural religious and linguistic diversity within both small and large states Only a very few papers could be included for this collection but they represent some of the key topics under discussion during the Congress The papers were selected from the recommendations of the convenors of the 13 Thematic Groups the keynote addresses and several symposia Media Power and Global Television News Saba Bebawi, 2016-01-05 The Middle East has been a particular focus of global crisis reporting Yet international coverage of these conflicts has historically been presented through a Western perspective The absence of Arab voices in the global public sphere has created a discursive gap between the Middle East and the rest of the world The arrival of Al Jazeera English might therefore be regarded as an attempt to bridge this gap by broadcasting discourses from and about the Arab world Using a framing analysis of selected news reports by Al Jazeera English before and after the so called Arab Spring protests this book considers Al Jazeera English's position in the global news environment and identifies the extent to which it addresses this gap between the Arab and global spheres

Approaches to Discourses of Marriage Laura L. Paterson, Georgina Turner, 2023-09-26 How do people talk about marriage Who gets to do the talking When why where and how do these things change From the experiences of women forced to marry as children to those of older women who never married from investigations of cross border marriage applications to Christian pastors sermons on divorce from oppositional media discussions of same sex marriage to pro marriage equality protest signs this collection presents research from across the globe addressing the often shifting context specific ways that we talk about marriage Developed from the work of the UK based Discourses of Marriage Research Group and a two day conference drawing together scholars interested in talk of marriage and related topics this interdisciplinary volume brings together

linguists psychologists and film makers and draws on data from the UK Germany Taiwan the US Belgium and Turkey It is intended both as a survey of some contemporary trends in research on marriage and as a foundation for further research The chapters in this book except for chapters 1 and 7 were originally published as a special issue of the journal Critical Discourse Studies This volume comes with a new introduction

Feminist Critical Discourse Analysis M. Lazar, 2005-01-07 The first collection to bring together well known scholars writing from feminist perspectives within Critical Discourse Analysis The theoretical structure of CDA is illustrated with empirical research from a range of locations from Europe to Asia the USA to Australasia and domains from parliament to the classroom the media to the workplace

Speaking through the Silence Laine A. Berman, 1998-10-08 Uncovering the structures and functions of conversational narratives uttered within natural social networks Laine Berman shows how working class Javanese women discursively construct identity and meaning within the rigid constraints of an hierarchical social order She does this by identifying the silences the unsaid and by revealing both the structure and function of silence in terms of its indexical reference to local meaning It is here that the force of the Javanese language as used in everyday interaction shows itself to be an extremely potent philosophical entity as well as a means of social control Thus at least in regard to the urban poor the book boldly questions the difference between traditional definitions of Javanese elegance and oppression This study will contribute to our understanding of the social consequences of language use to the linguistic knowledge of Indonesia and Java and to such basic linguistic issues as narrative structure and function speech levels and styles and indexicality features

Making a Killing Alicia Gaspar de Alba, Georgina Guzmán, 2010-11-01 Since 1993 more than five hundred women and girls have been murdered in Ciudad Juarez across the border from El Paso Texas At least a third have been sexually violated and mutilated as well Thousands more have been reported missing and remain unaccounted for The crimes have been poorly investigated and have gone unpunished and unresolved by Mexican authorities thus creating an epidemic of misogynist violence on an increasingly globalized U S Mexico border This book the first anthology to focus exclusively on the Ju rez femicides as the crimes have come to be known compiles several different scholarly interventions from diverse perspectives including feminism Marxism critical race theory semiotics and textual analysis Editor Alicia Gaspar de Alba shapes a multidisciplinary analytical framework for considering the interconnections between gender violence and the U S Mexico border The essays examine the social and cultural conditions that have led to the heinous victimization of women on the border from globalization free trade agreements exploitative maquiladora working conditions and border politics to the sexist attitudes that pervade the social discourse about the victims The book also explores the evolving social movement that has been created by NGOs mothers organizing efforts and other grassroots forms of activism related to the crimes Contributors include U S and Mexican scholars and activists as well as personal testimonies of two mothers of femicide victims

Language as Symbolic Power Claire Kramsch, 2020-10-29 Kramsch combines insights from linguistics anthropology and sociology to show how language

represents and constructs social reality **Language from Below** Caoimhghin Ó Croidheáin, 2006 This book critically investigates the relationship between the Irish language and politics through a survey of individuals and movements associated with the language This approach takes into account competing socialist and nationalist perspectives on language and society to demonstrate the different motivations for and class interest in Irish The increasing power of the global market has the negative effect of reducing the well being and autonomy of national populations The study examines the decline of the Irish language as part of a global neo liberal system that homogenises markets by reducing national and linguistic boundaries It is argued that the struggle for rights is transformational and that the struggle for language rights by individuals and communities is an essential part of this transformation **Discourse, Ideology and Specialized**

Communication Giuliana Garzone, Srikanth Sarangi, 2008 This book approaches the issue of ideology in specialized communication in professional institutional and disciplinary settings across domains as diverse as law healthcare corporate management migration NGOs etc What unites the contributors is their commitment to a discourse view of language use i e the view that organisational and professional practices are rooted in social ideological orders although a variety of perspectives on the exact nature of the relationship between ideology and discourse can be discerned in individual chapters The acts of interpretation by participants and analysts alike are invested in ideology explicitly or implicitly This manifest hidden duality surrounding ideology in discourse constitutes the main focus Challenging the traditional presumption of objectivity impersonality and non involvement that has often characterized research on Language for Specific Purposes this book demonstrates how the specialized communication setting is a critical site where ideology is intrinsically embodied in discursive practices **Remembrance and Denial** Richard G. Hovannisian, 1998 A fresh look at the forgotten genocide of

world history The Armenian Genocide that began in World War I during the drive to transform the plural Ottoman Empire into a monoethnic Turkey removed a people from its homeland and erased most evidence of their 3000 year old material and spiritual culture For the rest of this century changing world events calculated silence and active suppression of memory have overshadowed the initial global outrage and have threatened to make this calamity the forgotten genocide of world history Fourteen leading scholars here examine the Armenian Genocide from a variety of perspectives to refute those efforts and show how remembrance and denial have shaped perceptions of the event Many of the chapters draw on archival records and court proceedings to review the precursors and process of the genocide examine German complicity and share the responses of victims perpetrators and bystanders **Language education and the university: fostering socially-just practices in**

undergraduate contexts. Volume 1: language, culture and discourse Daniel de Mello Ferraz, Ana Paula Martinez Duboc, Organizadores Daniel de Mello Ferraz Ana Paula Martinez Duboc We don't know what the future holds among so much polarization hybrid wars movements to disassemble public education but the role of a teacher educator who is engaged and aware of its representation in the society cannot be denied and vanished On the contrary a teacher educator in the

complexity of his/her role will inevitably be reference of resistance creating discursive and theoretical opportunities legitimizing knowledge other than those which comes top down Certainly this book will trigger other similar projects and contribute meaningfully to critical teacher education Fabr cio Ono ISBN 978 65 5939 053 3 brochura 978 65 5939 054 0 eBook DOI 10 31560 pimentacultural 2020 540

The Language of Employability Maria Fotiadou,2022-10-01 This book employs a corpus based Critical Discourse Analysis CDA methodology to analyse the language used by university careers services in the UK Drawing on a corpus which includes the public facing websites of careers services from 24 Russell Group and 34 Post 92 universities the author highlights some of the potentially problematic common sense views and ideas that are currently promoted to students using these services She argues that the language used by university websites promotes neoliberal ideology and encourages the denaturalisation of such language This book will be of interest to linguists sociologists education scholars and scholars who are otherwise interested in the notion of employability

American Images of China Oliver Turner,2014-04-16 The United States and China are arguably the most globally consequential actors of the early twenty first century and look set to remain so into the foreseeable future This volume seeks to highlight that American images of China are responsible for constructing certain truths and realities about that country and its people It also introduces the understanding that these images have always been inextricable from the enactment and justification of US China policies in Washington and that those policies themselves are active in the production and reproduction of imagery and in the protection of American identity when seemingly threatened by that of China Demonstrating how past American images of China are vital to understanding the nature and significance of those which circulate today Turner addresses three key questions What have been the dominant American images of China and the Chinese across the full lifespan of Sino US relations How have historical and contemporary American images of China and the Chinese enabled and justified US China policy What role does US China policy play in the production and reproduction of American images of China Exploring and evaluating a wide ranging variety of sources including films and television programmes newspaper and magazine articles the records and journals of politicians and diplomats and governmental documents including speeches and legal declarations this work will be of great interest to students and scholars of US foreign policy American politics China studies and international relations

Discourse and Political Culture Michael Kranert,2019-10-15 This book presents a new approach to comparative politico linguistic discourse analysis It takes a transdisciplinary stance and combines analytical tools from linguistic discourse analysis keywords metaphors argumentation genre and political science political culture comparative politics ideologies It is comprehensive in its introduction of approaches from the German tradition of politico linguistics This tradition has not thus far been accessible to a non German speaking readership and hence the volume adds insights into the mechanics of political discourse from a diverse set of viewpoints The book analyses the modernisation discourses in social democratic parties in Britain and Germany between 1994 and 2003 a project that was named Third Way It demonstrates how political language

and political culture are related and how politicians will adapt a global ideology to local political circumstances in order to convince the electorate At the same time the book presents new insights into the German political culture and the version of Third Way discourses in the Social Democratic Party of Germany SPD under the leadership of Gerhard Schröder which have played a key role in shaping current political discourse in Germany It concludes with a model for the study of political discourse which makes the work relevant to scholars in Social Sciences and beyond **Lost to the State** Elena

Khlinovskaya Rockhill, 2010-12-01 Childhood held a special place in Soviet society seen as the key to a better future children were imagined as the only privileged class Therefore the rapid emergence in post Soviet Russia of the vast numbers of vulnerable social orphans or children who have living relatives but grow up in residential care institutions caught the public by surprise leading to discussions of the role and place of childhood in the new society Based on an in depth study the author explores dissonance between new post Soviet forms of family and economy and lingering Soviet attitudes revealing social orphans as an embodiment of a long standing power struggle between the state and the family The author uncovers parallels between post Soviet and Western practices in child welfare and attitudes towards bad mothers and proposes a new way of interpreting kinship where the state is an integral member Dimensions of Change Lars Bo Henriksen, 2004 Since

Heraclitus change has baffled perplexed and bemused Organisational change is no exception such change is an empirical fact but the extant conventional literature largely fails to enhance our understanding of this phenomenon Conventional theories models and methods do not possess the means of facilitating real understanding for either practitioners or researchers This book is a contribution to the development of theory and method on organisational change through interactions with real people in real organisations Grounded in a theory of reality based on a particular conceptualising method and illustrated with reference to real case studies the authors explicate how to do both theory and method on organisational change in a novel concise and very readable way Reality is constructed by integrating four key dimensions facts logic values and communication these provide the material for the introductory chapters with the overall understanding of method emerging as one works through the remaining chapters Insights from mainly continental philosophy and social science are used to illustrate the key arguments throughout Conventional approaches are usually concerned with definitions and outcomes in contrast this book strongly emphasises the change process itself the discourse of change with respect to both real actors and observants and how new realities are constructed The book admirably fills the gap between the what is of conventional theory and how to of a much more pragmatic critically modernist approach to both studying and doing organisational change Book jacket *Taking Journalism Seriously* Barbie Zelizer, 2004-04-29 Barbie Zelizer provides enormous service to students and scholars with this comprehensive and highly persuasive critique of the literature in and about journalism as both process and practice as a profession and an industry Zelizer takes a step back to look at what we know about news and she does not pull her punches in pointing out what we do not know Linda Steiner Rutgers University Zelizer's encyclopedic review of

scholarly studies of journalism fills an important need for researchers and comparing that scholarship across disciplines generations and countries makes it even more valuable Her analyses will be invaluable for media research and should also spur interest in journalism among the social science and other disciplines she studied The book is an impressive achievement Herbert J Gans Columbia University and author of Democracy and the News Taking Journalism Seriously is a refulgent analysis of the condition of journalism studies Zelizer has produced a critical and lasting contribution to our understanding of the position of news journalism and journalism practice within the disciplines of political science sociology psychology philosophy language and cultural studies This excellent book is an engaging and sophisticated treatise on both the historical and contemporary theoretical perspectives of journalism scholarship Howard Tumber City University London How have scholars tended to conceptualize news newsmaking journalism journalists and the news media Which explanatory frames have they used to explore journalistic practice From which fields of inquiry have they borrowed in shaping their assumptions about how journalism works In Taking Journalism Seriously News and the Academy author Barbie Zelizer discusses questions about the viability of the field of journalism scholarship and examines journalism as a discipline a profession a practice and a cultural phenomenon Taking Journalism Seriously argues that scholars have remained too entrenched within their own disciplinary areas resulting in isolated bodies of scholarship This is the first book to critically survey journalism scholarship in one volume and organize it by disparate fields The book reviews existing journalism research in such diverse fields as sociology history language studies political science and cultural analysis and dissects the most prevalent and understated research in each discipline The author provides a critical mapping of the field of journalism studies and encourages academics to look at journalism from various disciplinary perspectives Taking Journalism Seriously advocates a realignment of the ways in which journalism has traditionally been conceptualized and urges scholars to think anew about what journalism is as well as reflect on why they see it as they do Taking Journalism Seriously is designed for undergraduate and graduate students in advanced courses on Journalism and Journalism Studies It will also be of interest to scholars academics and researchers in the fields of Journalism Communication Media Studies Sociology and Cultural Studies Racism Without Racists Eduardo Bonilla-Silva,2010 This edition includes a chapter examining the Obama mystery the election of a black President even though racial progress has stagnated in the country since the 1980s Bonilla Silva argues that this development is not a breakthrough in race relations but a continuation of racial trends in the last 40 years including the sedimentation of color blind racism as the dominant ideology in the nation **Using and Abusing Science** Cyril Besson,Véronique Molinari,2016-05-11 Over the last two centuries as politics has evolved from the status of amateurship to that of profession political discourse together with its practices and their validity has been increasingly subject to questioning Politicians as illustrated by the low turnouts that have recently characterised general elections and a general lack of interest in politics throughout Western countries enjoy less than ever the trust of the electorate and their discourse is

now often criticised for being both hollow and untrustworthy. Conversely, by evolving from the status of enlightened amateur to that of expert, the figure of the scientist has over recent centuries gained credibility with the general public. Even though the traditional view of science as the expression of reality has regularly been challenged, science continues to be held in high regard and is believed to provide a reliable form of knowledge. Summoning science has thus often been a way in everyday life, advertising and the popular media to lend authority to a discourse and imply that one's claims are beyond dispute. That politicians should have occasionally been tempted to do the same and make up for the deficit of legitimacy of their discourse through the instrumentalisation of scientific arguments or participation in contemporaneous debates on scientific issues is therefore not surprising. The issue at stake in this volume is to examine how and to what extent this process may have been taking place in the past three centuries. In order to accomplish this, the contributions cover various fields of expertise ranging from the hard sciences to more controversial types of science, investigating the intricate relations of science and political discourse.
