Last Oasis Facing Water Scarcity The Worldwatch Environmental Alert Series:

Last Oasis: Facing Water Scarcity: The Worldwatch Environmental Alert Series Sandra Postel, This Important Study Argues For A Rethinking About On Approach To Emerging Threat Of World Wide Water Scarcity Pleads For Use Of Latest Know How And Conservation Of Water Urgently *The Last Oasis* Sandra Postel, 2014-07-16 For decades now we have wasted and mismanaged the world's water supplies Today 27 countries are short of water a quarter of the world's population has no safe water 46 per cent have no proper sanitation and each year four million children die of water borne diseases As most of the world's major river systems cross several national boundaries the scope disputes and the threat to international security is becoming more and more real In *The Last Oasis* Sandra Postel examines the economic ecological and political factors affecting fresh water supply She confronts the issues of mismanagement and profligacy and analyses and dangers of confrontation both between nations and between rural and urban users She also emphasises that the technology and know how for effective water husbandry does exist With methods already in use farmers could cut their demand for water by 40-90 per cent and cities by one third without sacrificing economic output or quality of life Investing in water efficiency recycling and conservation help meet rising demands and stave off disaster But the priority is a common recognition of the gravity of the position and with that a widespread push for institutions to manage sustainable use of water **Last Oasis** Sandra Postel, 1992 Argues that a long history of mismanagement of water resources has endangered our water supplies suggests ways to conserve water and discusses the economic political and social aspects of water *Biodiversity Conservation in Transboundary Protected Areas* National Research Council, Policy and Global Affairs, Office of International Affairs, Office of Central Europe and Eurasia, 1996-10-27 Recognizing the increasing rate of species loss on a global scale and that neither pollution nor ecosystems respects political boundaries cooperation on many different levels is required to conserve biodiversity This volume uses four protected areas that Poland shares with its neighbors as case studies to explore opportunities to integrate science and management in transboundary protected areas in Central Europe for the conservation of biodiversity Specific topics include biodiversity conservation theories and strategies problems of wildlife management and impacts of tourism and recreational use on protected areas Water Resources in the Twenty-First Century Rosegrant, Mark W., 1997-03-01 In this paper Mark W Rosegrant assesses global water supply and demand describes in detail the forces contributing to water scarcity and lays out a number of strategies for managing water in the future Any solution Rosegrant asserts will need to involve both the careful exploitation of new sources of water and strong measures to stimulate more efficient use of water Policies must treat water not as a free good as they often do now but rather as a scarce commodity that comes at a price Cooperation between countries sharing the same water basin will also become increasingly important as water becomes more scarce Development Economics and Social Justice John Thoburn, 2017-11-28 Professor Ian Livingstone is one of a small group of British development economists who have achieved international renown and

recognition The objective of this book is to pay tribute to his life's work particularly those aspects which related to key but challenging development issues These issues include at a broad level the understanding of the economic forces determining the development of low income economies more detailed micro work on agricultural development irrigation in particular decentralisation and local government finance small scale enterprises and large scale manufacturing development Themes running through his work relate to his over-riding concern for rigour and for socio-economic justice Ian Livingstone consistently used the traditional tools of economic analysis as a means to increase understanding of development issues in a way which was itself just as radical as the contributions of political scientists and sociologists This volume has been produced with similar aims

Recent Library Additions, 1992 Managing Basin Interdependencies in a Heterogeneous, Highly Utilized and Data Scarce River Basin in Semi-Arid Africa Jeremiah Kipkulei Kiptala, 2020-04-30 For integrated water resources management both blue and green water resources in a river basin and their spatial and temporal distribution have to be considered This is because green and blue water uses are interdependent In sub-Saharan Africa the upper landscapes are often dominated by rainfed and supplementary irrigated agriculture that rely on green water resources Downstream most blue water uses are confined to the river channels mainly for hydropower and the environment Over time and due to population growth and increased demands for food and energy water use of both green and blue water has increased This book provides a quantitative assessment of green blue water use and their interactions The book makes a novel contribution by developing a hydrological model that can quantify not only green but also blue water use by many smallholder farmers scattered throughout the landscape The book provides an innovative framework for mapping ecological productivity where gross returns from water consumed in agricultural and natural vegetation are quantified The book provides a multi-objective optimization analysis involving green and blue water users including the environment The book also assesses the uncertainty levels of using remote sensing data in water resource management at river basin scale

Sacrificing the WHO to the Highest Bidder Theodore Macdonald, James Raftery, 2018-04-19 This remarkable book offers enlightening reading for everyone interested in international law human rights global health public health and health promotion Public health and health promotion professionals including international healthcare organisations care agencies and international charities will find the analysis illuminating It is also of great interest to policy makers and shapers in communities and government political activists and all those with an interest in equality and globalisation

Rural Livelihoods and Poverty Reduction Policies Frank Ellis, H. Ade Freeman, 2004-08-02 This important new collection of contributions brings together current thinking on poverty reduction and rural livelihoods in developing countries As well as leading economists in the field such as Frank Ellis and Chris Barrett there are a number of contributors from developing countries themselves The book examines both macroeconomic and microeconomic phenomena and contains wide range of case studies Skilfully exposing the gap that exists between the rhetoric of poverty reduction strategies in capital cities and the practice of public sector delivery in rural

areas this key text will be essential reading for advanced students and researchers in the fields of rural development rural livelihoods poverty reduction strategies and Sub Saharan Africa development as well as advisors and practitioners in international organizations

Violence Through Environmental Discrimination Günther Baechler, 2013-03-09 Since all out interstate wars for the time being seem to belong to the past conflict studies focus more and more on domestic conflicts This is a broad field not only because the arbitrary line between war and sub war violence disappears and the analyst is confronted with phenomena reaching from criminal violence and clashes between communities to violent conflicts of long duration and civil wars with massacres and genocides as their characteristics It is also because there are so many different types of conflicts to be analyzed so many different types of behavior to be studied whereas there is often little information available on what is really going on Against the background of internal conflicts which tend to be as protracted as diffuse in terms of time intensity actors and their goals this study aims to follow a specific pathway through the current thicket of violent circumstances It focuses on causation patterns by exploring the causal role of the environmental factor in the genesis of violent conflicts occurring today and probably even more so tomorrow This approach which for once does not focus on a specific level of the conflict system on one area in the conflict geography or on a specific category of actors analyzes causation dynamics

Sustainable Cities in Developing Countries Cedric Pugh, 2013-12-16 This text addresses the difficulties of balancing the imperatives of sustainability with the pressing challenges facing some of the world's most underdeveloped areas Various perspectives are brought to bear on issues from economics and theories of health through to the foundations of sustainability All the key contemporary developments are dealt with the growth in international law and agreements on controlling greenhouse gases the effect of reforms in finance governance and methods of appraisal on the areas of waste management and the theoretical advances in the community development aspects of health and the neighbourhood environment guided by the experiences of the World Bank WHO and UNEP The text is intended as a guidebook for those responsible for re-shaping cities in the 21st century

The Workbook, 1992 *Economic Development and Environmental Sustainability* Ramón López, Michael A. Toman, 2006 Publisher description

Streams and Ground Waters Jeremy B. Jones, Patrick J. Mulholland, 1999-12-06 Streams around the world flow toward the sea in floodplains All along this transit there is exchange of water between the stream itself and the surrounding sediments which form the floodplain Many chemical biological and geological processes occur when water moves back and forth between streams and these flood plain sediments Streams and Groundwaters focuses on the consequences of water flow between streams their underlying sediments and surrounding landscapes Certain to appeal to anyone interested in stream ecology the management of stream ecosystems or landscape ecology this volume should become a oft opened reference

The Economics of Groundwater Management in Arid Countries Manuel Schiffler, 2014-06-03 Groundwater is being depleted on a large scale in many arid and semi arid parts of the world The author asks whether it should be avoided at any price or if

it is desirable in certain circumstances by undertaking an economic analysis and considering the political and hydrological aspects of water management Managing Salinization Waltina Scheumann,2012-12-06 Salinization of soils is a major threat to irrigated agriculture and counteracts the targets of costly public infrastructure investments In this study salinization is regarded as the outcome of an institutional arrangement which impedes the effective implementation of well known and well established control measures be they technical managerial or economic In public irrigation systems neither the management units nor the farmers are offered any incentives towards the control of high groundwater levels and salinization if the management units are embedded in a highly centralized non market institutional setting The author answers the question under which conditions management units and irrigators are active in halting and reversing the process of salinization **Water Resources Action Plan for the Near East** United States. Agency for International Development. Bureau for the Near East,1993 *The Institutional Economics of Water* R. Maria Saleth,Ariel Dinar,2004-01-01 This publication examines issues of water sector reform and performance from the perspectives of institutional economics and political economic studies The authors develop an alternative quantitative assessment methodology based on the principle of institutional ecology as well as data collected from 127 water experts from 43 countries and regions around the world using a cross country review of recent water sector reforms within an institutional transaction cost framework **Full House** Lester Russell Brown,Hal Kane,1995 Exploring the link between population growth and the availability of food stocks this study warns of the seriousness of the problem if future food stores are depleted or fail to provide enough for all The authors argue that effective long term population policies must be adopted rapidly
