"It's Just Easier Not to Go to School" Lori Olafson, 2006 Textbook

Guiding Curriculum Development M. Scott Norton, 2016-11-02 Top down mandates concerning the curriculum of the school leave no room for program creativity and program commitment Yet principals and teachers are held accountable for student achievement results Constitutionally powers not granted to the United States are reserved to the States or to the people The book's primary purposes center on the need for placing the responsibility for determining student curriculum and academic achievement the local school level whereby school personnel determine the individual student's personal interests and needs and design a curricular program for each student that fosters personnel success The creative abilities of teachers are inhibited in attempts to implement top down mandates that set forth academic content and instructional methods set forth by federal and state agencies If learning programs and instructional methods are to be designed to meet the individual interests and needs of the learner who is in the best position to determine such needs We believe that the social mental and physical needs of children and youth are determined best by local educational professionals This book sets forth the foundations of practice that will serve these purposes

Teacher, Teacher! An Elementary Teacher's Experience Ida Weibel, 2007

Optimizing Student Learning Betty Ziskovsky, Joe Ziskovsky, 2019-02-13 This book is a fictionalized account of how a licensed school teacher developed implemented and refined the application of Lean principles and applied them to her classroom instructional practice to complete the delivery of her assigned curriculum while at the same time ensuring her students achieved mastery learning of the material presented While the first edition focused on instructional process improvement this second edition expands on that foundation to include application of the Lean principles and strategies to enable students to improve their individual learning processes and thus become more successful learners This second edition lays out a blueprint for schools and teachers across the USA

and indeed around the world who are struggling with how to use traditional education techniques to improve student learning outcomes This elusive goal has been the number one focus of the American education industry and trillions of dollars of investment for the past 50 years Up until the previous decade educators refused to look outside their own industry for solutions But financial challenges have forced them to look outside that box Many schools and districts are now discovering the benefits of adopting Lean into their business model to achieve greater efficiency with taxpayer dollars on the administrative side Some larger districts have established Lean offices or departments within their organization This has helped with budgeting but the model has not yet been used on a large scale to improve student learning performance every school district s primary mission This book lays out the blueprint for teachers and administrators to use simple Lean strategies and tools to achieve that elusive goal The application is no longer theoretical It has been proven to be effective by those who have used it Lean principles and strategies as applied to education through this real life case study are explained in easy to understand terms not in manufacturing Lean jargon Scenarios used are from real life events common to all educators Examples of forms tools adapted to the needs of educators and results are included The book is written in an easy to understand narrative style Reviewers of the original version educators who knew nothing about Lean stated they could easily understand the concepts presented and implement the model using nothing more than the book as a guide The book s presentation eliminates teacher procrastination resulting from having to figure something out and how to apply it to your work yourself when you have no extra time available for that purpose It also eliminates the need to hire a Lean consultant a plus for districts strapped for cash but desiring to implement an improvement solution
