What is Sexualized Violence? Jana Schäfer, 2024-02-29 What is Sexualized Violence Intersectional Readings uses an intersectional queer and subject oriented approach to examine how societies constitute subjects as abilitized and vulnerabilized with respect to sexualized violence Contributing to our thinking about the dynamic relationship between social structure subject formation intersubjectivity and violence this text deploys an intersectional reading to engage with the complex social topography that both offers and imposes violence as a socially mediated practice Instead of discussing one particular group at the intersection of race and gender this book discusses the constitution of positionalities through systems of oppression and includes racialization gender

sexuality disability and age Moreover the text is also interested in explicitly engaging with how the history of disciplines institutions and organizations contributed to the current constitution of opportunities for violence It gives us modes of thinking to confront sexualized violence as a social problem and challenge the discourses and social structures that uphold it This book is meant to offer questions and approaches for students and scholars practitioners and policy makers and survivors of sexualized violence who have an interest in an intersectional perspective on sexualized violence *Today's Transgender Youth* Ryan J. Watson, Jaimie F. Veale, 2020-06-29 This book focuses on resiliency among gender expansive young people in different cultures exploring how they engage with and leverage school media and religious contexts The contributions in this volume advance the scholarship regarding the health and well being of gender expansive young people at a time where a plethora of recent legislation has limited and removed sundry rights of transgender individuals While previous scholarship identified disparities among transgender youth this book approaches resiliency from multiple lenses from school based clubs as tools for engagement in advocacy to proactivity and self care as strategies to mitigate struggles These empirical chapters focus on diverse contexts across different countries including Canada the USA and Australia The book also includes important commentaries from leading scholars in the field debating the controversial issue of transgender youth desisting to no longer be transgender This book will be of interest to those studying recent legislation on transgender rights as well as to those with a broader interest in studying gender in different contexts This book was originally published as a special issue of the *International Journal of Transgenderism* **Closing the Rights Gap** LaDawn Haglund, Robin Stryker, 2015-03-21 Rights language and practices have been used increasingly in the last decade to address conditions of economic social and cultural marginalization It is still unclear however whether such efforts have been effective at promoting transformative social change Have rights as embodied in constitutions statutory and judicial law international conventions resolutions and treaties fostered demonstrative improvements in the lives of the excluded When where how and under what conditions This volume explores these questions through a systematic comparison of the mechanisms actors and pathways MAPs operating in a diversity of cases analyzed by established scholars from different disciplinary backgrounds The MAPs comparative approach provides insights into the conditions under which and institutions through which rights on the books are more or less effectively translated into substantive rights realization We suggest multiple pathways in which litigation may combine with non legal mechanisms and strategies including institutionalized and non institutionalized politics and global and local networks and advocacy The volume is unique in its synthesis and advancement of parallel issues and debates across different disciplines and geographic regions it likewise brings into dialogue scholars of economic social and cultural rights with the scholarship on civil and political rights These cross fertilizations allow us to conclude by proposing a series of testable hypotheses about how economic and social rights might be realized as well as an agenda for future research to broaden and deepen empirical integration and theoretical synthesis in ways that can facilitate human rights realization worldwide

What accounts for the divergent trajectories of LGBTQ rights recognition in different states and regions of the world? How is expanding access to the Internet and persistent government censorship and queerphobia changing LGBTQ identities, visibilities and activism? Via their engagements with the questions outlined above, this book amply demonstrates not just the relevance of scholarship about LGBTQ communities and activism for both area studies and queer studies but the ongoing need to interrogate existing political economies of knowledge production The chapters in this book were originally published in *Central Asian Survey* and are accompanied by a new Foreword, an updated Introduction, an Epilogue and an Afterword **Cultural Anthropology** Jack David Eller, 2020-05-10 *Cultural Anthropology: Global Forces, Local Lives* is an exceptionally clear and readable introduction that helps students understand the application of anthropological concepts to the contemporary world and everyday life It provides thorough treatment of key subjects such as colonialism and post colonialism, ethnicity, the environment, cultural change, economic development and globalization This fourth edition has a fresh thematic focus on the future with material relating to planning, decision making, design and invention, hope and waiting More space is devoted to contemporary topics and there is new coverage of subjects ranging from white nationalism, right wing populism and natural disasters to surgical training, hacker conferences and the gig economy Each chapter contains a rich variety of case studies that have been updated throughout The book includes a number
