A.L.A. Catalog ,1904 **What Species Mean** Julia D. Sigwart,2018-10-29 Everyone uses species All human cultures whether using science or not name species Species are the basic units for science from ecosystems to model organisms Yet there are communication gaps between the scientists who name species called taxonomists or systematists and those who

use species names everyone else This book opens the black box of species names to explain the tricks of the name makers to the name users Species are real and have macroevolutionary meaning and it follows that systematists use a broadly macroevolution oriented approach in describing diversity But scientific names are used by all areas of science including many fields such as ecology that focus on timescales more dominated by microevolutionary processes This book explores why different groups of scientists understand and use the names given to species in very different ways and the consequences for measuring and understanding biodiversity Key selling features Explains the modern multi disciplinary approach to studying species evolution and species discovery and the role of species names in diverse fields throughout the life sciences Documents the importance and urgent need for high quality taxonomic work to address today s most pressing problems Summarises controversies in combining different sometimes quite different datasets used to estimate global biodiversity Focusses throughout on a central theme the disconnect between the makers and the users of names and seeks to create the rhetorical foundation needed to bridge this disconnect Anticipates the future of taxonomy and its role in studies of global biodiversity

Home Garden and Flower Grower , 1925 **Ghost Birds** Stephen Lyn Bales, 2010-10-21 Everyone who is interested in the ivory billed woodpecker will want to read this book from scientists who wish to examine the data from all the places Tanner explored to the average person who just wants to read a compelling story Tim Gallagher author of *The Grail Bird The Rediscovery of the Ivory billed Woodpecker* In 1935 naturalist James T Tanner was a twenty one year old graduate student when he saw his first ivory billed woodpecker one of America s rarest birds in a remote swamp in northern Louisiana At the time he was part of an ambitious expedition traveling across the country to record and photograph as many avian species as possible a trip organized by Dr Arthur Allen founder of

the famed Cornell Lab of Ornithology Two years later Tanner hit the road again this time by himself and in search of only one species that ever elusive ivory bill Sponsored by Cornell and the Audubon Society Jim Tanner s work would result in some of the most extensive field research ever conducted on the magnificent woodpecker Drawing on Tanner s personal journals and written with the cooperation of his widow Nancy Ghost Birds recounts in fascinating detail the scientist s dogged quest for the ivory bill as he chased down leads in eight southern states With Stephen Lyn Bales as our guide we experience the same awe and excitement that Tanner felt when he returned to the Louisiana wetland he had visited earlier and was able to observe and document several of the ghost birds including a nestling that he handled banded and photographed at close range Investigating the ivory bill was particularly urgent because it was a fast vanishing species the victim of indiscriminant specimen hunting and widespread logging that was destroying its habitat As sightings became rarer and rarer in the decades following Tanner s remarkable research the bird was feared to have become extinct Since 2005 reports of sightings in Arkansas and Florida made headlines and have given new hope to ornithologists and bird lovers although extensive subsequent investigations have yet to produce definitive confirmation Before he died in 1991 Jim Tanner himself had come to believe that the majestic woodpeckers were probably gone forever but he remained hopeful that someone would prove him wrong This book fully captures Tanner s determined spirit as he tracked down what was then as now one of ornithology s true Holy Grails STEPHEN LYN BALES is a naturalist at the Ijams Nature Center in Knoxville Tennessee He is the author of Natural Histories published by UT Press in 2007 *The Quartier Latin* Trist Wood,1898
