Hired For Youth Fired For Age Taking Charge Of Your Career At 5:

Youth Transitions among Descendants of Turkish Immigrants in Amsterdam and Strasbourg: Elif Keskiner, 2019-04-16
This open access book maps the youth transitions of descendants of migrants from Turkey living in Amsterdam and Strasbourg through a comparative mixed methods research design. As such, it is of interest to discussions in youth sociology, social mobility, and second generation research. The book follows transition trajectories of the second generation from school to activity or inactivity in the labour market to marriage or further study and deepens our understanding of transitions by unravelling the macro and micro mechanisms behind individual pathways. On the one hand, the author reveals the ongoing significance of distinct macro institutional settings as well as social structures such as social class, ethnicity, and gender in shaping the youth transition experience. On the other, she shows that youth transitions are not predestined to social reproduction when institutional and social structures create conditions for the development of resources necessary for social mobility. Therefore, through an examination of how immigrants' descendants develop forms of capital in their social trajectories in relation to institutional and social structures, the book advances the theoretical discussion on Bourdieu's capital theory. Moreover, in times when native born descendants of immigrants are at the forefront of public debate, being subjected to normative integration demands, the book significantly shifts the lens and draws our attention to the daily challenges and realities faced by ethnic minority youth.

Work, Retire, Repeat Teresa Ghilarducci, 2024-03-06. The issue of the future of Social Security on which millions of Americans depend produced great political theater at the State of the Union address. That highlighted a bigger problem of financing retirement as baby boomers seek to retire often with limited resources. Many argue that the solution to the problem is for people to work longer. Teresa Ghilarducci, a noted expert on retirement, argues that the working longer idea is wrong, unnecessary, and discriminates against people who work in lower wage occupations. Ghilarducci pushes for a national plan to finance retirement that would draw on contributions by both employers and employees to replace our privatized and ramshackle personal retirement system and make changes in the tax system that supports Social

Security to give people a real choice whether to retire or continue to work in their later years This book tells the stories of people locked into jobs later in life not because they love to work but because they must work She demonstrates how relatively low cost changes in the way we manage and finance retirement will enable people in their so called golden years to choose how to spend their time Ghilarducci has a good public platform writes for Bloomberg and other outlets and is passionate about her ideas and reaching as broad a public as possible The book is for the growing number of people in the public and policy community who are worried about their retirement and engaged in the renewed debate about Social Security and Medicare Country Reports on Human Rights Practices for 2005 United States.
