A History and Critique of Methodological Naturalism Joseph B. Onyango
Okello, 2016-07-21 Methodological naturalism is the thesis that only natural features can be factored into any legitimate explanation Moreover the thesis contends any attempt to explain natural phenomena by appealing to supernatural features is unscientific and therefore illegitimate This book argues that nothing inherently problematic afflicts possible appeals to supernatural agency in the attempt to explain select phenomena in nature Reputable philosophers of the ancient and medieval periods as well as prominent scientists of the early modern era invoked supernatural agency in their attempts to understand nature For them miraculous interventions in nature by a supernatural agent were not unreasonable However the super naturalistic worldview has been replaced by methodological naturalism The assumptions of two pivotal figures David Hume and Charles Darwin brought about this change This book shows that this change was motivated by unscientific means Hence the change itself remains inconsistent with the assumptions of methodological naturalism

Rhodes,1899 **History of the United States** James F. Rhodes,2009-01-01 This classic survey of one of the most dramatic eras in American history is most notable perhaps for the insight it offers into the mindset of the era itself First published from 1893 through 1906 in the immediate aftermath of the events it covers it was criticized even then for the author s clear bias Rhodes believed it was a mistake to have given black men the right to vote after the Civil War Today it remains a fascinating look at the times through a prism that is itself of historical interest This eight volume set is a replica of the 1920 new edition Volume IV covers the sieges of Yorktown and Vicksburg the Tax Act of 1862 the Emancipation Proclamation the surrender of Harper s Ferry the battles of Fredericksburg and Chancellorsville the Gettysburg Address French and English sympathy draft riots in New York Lincoln s reelection and much more After earning a fortune in iron coal and steel American author JAMES FORD RHODES 1848 1927 retired to write about history for which he won the Loubat Prize from the Berlin Academy of Sciences 1901 and the gold medal from the National Institute of Arts and Letters 1910 He is also the author of the single volume History of the Civil War 1861 1865 1918 available from Cosimo *Connecting the Dots in World History, A Teacher's Literacy Based Curriculum* Chris Edwards,2015-11-06 In his previously written articles and books Chris Edwards has argued that Teaching should be considered a field that is separate from both the field of Education and from the content area fields Teaching is a field which synthesizes content and method for classroom application All of the other major intellectual fields have a canon of works which practitioners can learn from and add to but Teaching does not The Connecting the Dots in World History A Teacher s Literacy Based Curriculum series changes this by showing how effective a teacher generated curriculum can be These books can inspire other teachers to create their own curriculums and inspire a change in the way that the public views teachers and teaching **A Dark History of Modern Philosophy** Bernard

Freydberg,2017-08-14 This provocative reassessment of modern philosophy explores its nonrational dimensions and connection to ancient mysteries Delving beneath the principal discourses of philosophy from Descartes through Kant Bernard

Freydberg plumbs the previously concealed dark forces that ignite the inner power of modern thought He contends that reason itself issues from an implicit and unconscious suppression of the nonrational Even the modern philosophical concerns of nature and limits are undergirded by a dark side that dwells in them and makes them possible Freydborg traces these dark sources to the poetry of Hesiod the fragments of Heraclitus and Parmenides and the Platonic dialogues and claims that they rear their heads again in the work of Spinoza Schelling and Nietzsche Freydborg does not set forth a critique of modern philosophy but explores its intrinsic continuity with its ancient roots

History of the United States: 1862-1864 James Ford Rhodes, 1899 *Mind, Brain, Quantum AI, and the Multiverse* Andreas Wichert, 2022-10-11 There is a long lasting controversy concerning our mind and consciousness Mind Brain Quantum AI and the Multiverse proposes a connection between the mind the brain and the multiverse The author introduces the main philosophical ideas concerning mind and freedom and explains the basic principles of computer science artificial intelligence of brain research quantum physics and quantum artificial intelligence He indicates how we can provide an answer to the problem of the mind and consciousness by describing the nature of the physical world His proposed explanation includes the Everett Many Worlds theory This book tries to avoid any non essential metaphysical speculations The text is an essential compilation of knowledge in philosophy computer science biology and quantum physics It is written for readers without any requirements in mathematics physics or computer science

Felling & Pining John Howard, 2020-11-03 Felling Pining depicts life death faith and doubt in the poorest and most pious parts of the United States With 430 original color images John Howard looks back to 19th and 20th century southern communities examines present day legacies and pines forward not toward a heavenly afterlife but a near future rife with progressive possibility The photobook contrasts nature s beauty with bleak histories of Native American expulsion African American slavery pernicious labor exploitation and persistent environmental degradation insisting that we can and must do better Punctuated with warm portraits of the Deep South s diverse peoples it honors their forebears and holds out hope for their heirs Felling Pining is an unusual and impassioned visual plea for social and economic justice
