Dimensions of the Americas Shifra M. Goldman, 1994 Acclaimed art historian Shifra Goldman here provides the first overview of the social history of modern and contemporary Latin American and Latino art Long needed in the field of art history this collection of thirty three essays focuses on Latin American artists throughout Mexico Central and South America

the Caribbean and the United States Goldman's extensive introduction provides an up to date chronology of modern Latin American art a history of social art history in the United States and synopses of recent theoretical and historical writings by major scholars from Mexico Cuba Brazil Peru Uruguay Chile and the United States In her essays Goldman discusses a vast array of topics including the influence of the Mexican muralists on the American continent the political and artistic significance of poster art and printmaking in Cuba Puerto Rico and among Chicanos the role of women artists such as Guatemalan painter Isabel Ruiz and the increasingly important role of politics and multinational businesses in the art world of the 1970s and 1980s She explores the reception of Latin American and Latino art in the United States focusing on major historical exhibits as well as on exhibits by artists such as Chilean Alfredo Jaar and Argentinian Leandro Katz Finally she examines the significance of nationalist and ethnic themes in Latin American and Latino art Written in a straightforward style equally accessible to specialists students and general audiences this book will become essential reading for anyone

interested in understanding the importance of Latin American art and the complex dynamic shaping it *Anthropology, Art and Cultural Production* Maruska Svasek, 2007-02-20 This book provides an introduction to anthropological perspectives on art Svasek defines art as a social process We study not only the artefacts themselves and the values attributed to them but also the process of production and its wider context Providing a critical overview of various anthropological theories of art Svasek offers a new perspective which centres on the analysis of commoditisation aestheticisation and object agency She explores the process of collecting and exhibiting art works and how this relates to art's production distribution and consumption in an increasingly global market The book outlines the significance of art and aesthetics in everyday life and examines the shifting boundaries between art and other categories such as kitsch souvenirs propaganda and pornography Finally Svasek argues for an anthropological perspective that links the production and consumption of artefacts to political religious and other cultural processes Ideal as a teaching text this book gives a detailed overview of themes that are central to the fields of art history art sociology and cultural studies *The Death of Authentic Primitive Art* Shelly

Errington, 2023-09-01 In this lucid witty and forceful book Shelly Errington argues that Primitive Art was invented as a new type of art object at the beginning of the twentieth century but that now at the century's end it has died a double but contradictory death Authenticity and primitivism both attacked by cultural critics have died as concepts At the same time the penetration of nation states the tourist industry and transnational corporations into regions that formerly produced these artifacts has severely reduced supplies of primitive art bringing about a second death Errington argues that the construction of the primitive in the nineteenth and twentieth centuries and the kinds of objects chosen to exemplify it must be understood as a product of discourses of progress from the nineteenth century European narrative of technological progress to the twentieth century narrative of modernism to the late twentieth century narrative of the triumph of the free market In Part One she charts a provocative argument ranging through the worlds of museums art theorists mail order catalogs boutiques

tourism and world events tracing a loosely historical account of the transformations of meanings of primitive art in this century In Part Two she explores an eclectic collection of public sites in Mexico and Indonesia a national museum of anthropology a cultural theme park an airport and a ninth century Buddhist monument newly refurbished to show how the idea of the primitive can be used in the interests of promoting nationalism and economic development Errington's dissection of discourses about progress and primitivism in the contemporary world is both a lively introduction to anthropological studies of art institutions and a dramatic new contribution to the growing field of cultural studies **Dante and Byzantium**

E. D. Karampetsos, 2009 Later Byzantine Painting Robert S. Nelson, 2024-10-28 Written over nearly three decades the fifteen essays involve the three aspects of the title art agency and appreciation The first refers to the general subject matter of the book Byzantine art chiefly painting of the twelfth through the fourteenth centuries the second to its often human like agency and the last to its historical reception Responding to different issues and perspectives that have animated art history and Byzantine studies in recent decades the essays have wide theoretical range from art historical formalism iconography archaeology and its manuscript equivalent codicology to statistics patronage narratology and the histories of science and collecting The series begins with art works themselves and with the imagery and iconography of church decoration and manuscript illumination shifts to the ways that objects act in the world and affect their beholders and concludes with more general appreciations of Byzantine art in case studies from the thirteenth century to the present *Singular Women* Kristen Frederickson, 2003-03-04 Contemporary art historians all of them women probe the dilemmas and complexities of writing about the woman artist past and present These 13 essays address the work and history of specific artists beginning with the Renaissance and ending with the present day
