History Journal 11 Cartographic Military:

Air University Library Index to Military Periodicals, 1999 **The Book at War** Andrew Pettegree, 2023-12-05 A magisterial Sunday Times history of how books were used in war across the twentieth century both as weapons and as agents for peace We tend not to talk about books and war in the same breath one ranks among humanity's greatest inventions the other among its most terrible But as esteemed literary historian Andrew Pettegree demonstrates the two are deeply intertwined The Book at War explores the various roles that books have played in conflicts throughout the globe Winston Churchill used a travel guide to plan the invasion of Norway lonely families turned to libraries while their loved ones were fighting in the trenches and during the Cold War both sides used books to spread their visions of how the world should be run As solace or instruction manual as critique or propaganda books have shaped modern military history for both good and ill With precise historical analysis and sparkling prose The Book at War accounts for the power and the ambivalence of words at war **Military Geosciences in the Twenty-First Century** Russell S. Harmon, Sophie E. Baker, Eric V. McDonald, 2014-08-22 Eighteen chapters address the complex yet critical aspects of the role of geosciences in military undertakings The chapters cover a wide range of expertise drawn from the broad area of geology geomorphology geography geophysics engineering geology hydrogeology cartography environmental science remote sensing soil science geoinformatics and related disciplines that reflect the multidisciplinary nature of military geology *Mapping the Sensible* Erica Carter, Bettina Malcomess, Eileen Rositzka, 2022-12-19 Die Reihe Cinemoetics Essay erkundet poetische Logiken audiovisueller Bilder wobei die behandelten Gegenstände thematisch eng gefasst aus persönlicher Perspektive beleuchtet oder unter einem bestimmten ästhetischen kulturhistorischen oder theoretischen Gesichtspunkt betrachtet werden Die Reihe bietet einer breiten Leserschaft in kompakter Form Zugänge zu Figurationen medialer Erfahrung und führt sie auf diese Weise an ein Verständnis der Vielfalt filmischen Denkens heran Bitte beachten Sie auch die englischsprachige https://www.degruyter.com/serial/CINE_E_B/html und die deutschsprachige Cinemoetics Schriftenreihe https://www.degruyter.com/serial/CINE_B/html **The History of Cartography, Volume 6** Mark Monmonier, 2015-05-18 For more than thirty years the History of Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century continues this tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects

of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often based on their own participation in the developments they describe and interpretations of larger trends in cartography Designed for use by both scholars and the general public this definitive volume is a reference work of first resort for all who study and love maps

Soldiers and Scholars Carol Reardon, 1990 The use and abuse of military history is the theme of this book The author scrutinizes the army's first systematic attempt to use military history to educate its future leaders and traces the army's struggle from the end of the Civil War to claim intellectual authority over the study of war

The History of Cartography, Volume 4 Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography encompassed a wide variety of processes for making circulating and using maps of different types The volume's more than four hundred encyclopedic articles explore the era's mapping covering topics both detailed such as geodetic surveying thematic mapping and map collecting and broad such as women and cartography cartography and the economy and the art and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the detailed entries
