Clinical Image-Based Procedures. Translational Research in Medical Imaging Marius George Linguraru, Cristina Oyarzun Laura, Raj Shekhar, Stefan Wesarg, Miguel Ángel González Ballester, Klaus Drechsler, Yoshinobu Sato, Marius Erdt, 2014-12-08 This book constitutes revised selected papers from the Third International Workshop on Clinical Image Based Procedures CLIP 2014 held in conjunction with MICCAI 2014 in Boston MA USA in September 2014 The 19 papers presented in this volume were carefully reviewed and selected from 26 submissions New strategies are essential to ensure a smooth and effective translation of computational image based techniques into the clinic For these reasons CLIP 2014 s major focus is on translational research filling the gaps between basic science and clinical applications A highlight of the workshop is the subject of strategies for personalized medicine to enhance diagnosis treatment and interventions Authors are encouraged to submit work centered on specific clinical applications including techniques and procedures based on comprehensive clinical image data Submissions related to applications already in use and evaluated by clinical users are particularly encouraged The event will bring together world class specialists to present ways to strengthen links between computer scientists and engineers and clinicians

Shallow High-resolution Reflection Seismics Jan Brouwer, Klaus Helbig, 1998 The book covers all aspects of acquisition processing and interpretation of shallow reflection seismic data for geotechnical and environmental purposes Chapter 1 provides a thorough exposition of i the mathematical foundations of digital seismics ii the physics of wave propagation in solids iii the mathematical tools for the analysis of wave fields This theoretical part is based extensively on first principles thus the book can be used as a stand alone reference to all aspects of shallow reflection seismics Chapter 2 describes the field instruments including the physical principles underlying them and their modern implementation and the acquisition techniques that allow to obtain the best data under the given technical and operational constraints Chapters 3 5 describe the processing required to maintain the resolution of seismic data without sacrificing other attributes of the data The discussion is particularly thorough in where the required techniques go beyond the standard processing steps known from exploration seismics Chapters 6 10 describe the use of portable vibrators in geotechnical surveying that was pioneered by the authors and their colleagues The first four of these chapters that describe the special techniques required and some of the opportunities offered by the use of these tools are based on experience with

the portable P vibrator while chapter 10 was added after the recent introduction of the portable S vibrator to shallow surveying All five chapters are accompanied by data from actual surveys The book closes with six case histories from different settings in Western Europe based on impact sources weight drop and explosives
