Possibilities, Challenges, and Changes in English Teacher Education Today Heidi L. Hallman, Kristen Pastore-Capua, Donna L. Pasternak, 2019-05-24 This book focuses on English teacher educators experiences concerning professionalization and teacher identity The term professionalization itself can be problematized Popkewitz 1994 as it connotes adherence to realities to professional norms that are based within particular histories Yet teacher educators must confront how to mentor prospective teachers into the field and how changes to the field manifest changes to what it means to be a professional In research about changes in English teacher education over the past twenty years Pasternak Caughlan Hallman Renzi and Rush 2017 presented five distinct foci of ELA programs that have evolved 1

changes to field experiences within teacher education programs 2 altered conceptions of teaching literature and literacy within the context of ELA 3 increased adherence to standardization 4 changing demographics of students in K 12 classrooms and 5 increased expectations for use of technology within ELA These foci impact how professionals in ELA are viewed both from inside and outside the profession and how they navigate these tensions in teacher education programs to define what it means to identify as an English teacher Throughout the book chapter authors articulate dilemmas that focus around professionalization and teacher identity questioning what it means to be an English teacher today While some chapters suggest methods for increased awareness of tensions within practice other chapters approach professionalization and teacher identity by asking what the limits of methods classes and teacher education might be in preparing ELA teachers and supporting them to remain in the profession Today's political environment devalues teachers and teaching a situation that has critics deriding the educational standards at institutes of higher education while concurrently lauding alternative programs that do not have to adhere to the same rigorous teacher certification requirements English teacher educators are now being asked to design programs soften requirements and recruit and mentor teacher candidates to a profession that in the past certified more new English teachers than it could employ The chapters in this book explore what it means to educate and be an English teacher educator under these conditions

Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works

Zen and the Practice of Teaching English Robert Tremmel, 1999 This book represents the first serious attempt by an educator to combine the practice of teaching English with fundamental principles of Zen in an effort to help teachers achieve a new perspective on their professional lives It is a personal book based on personal knowledge inviting readers to consider the possibility that the foundations of teaching practice are the very foundations of life and that

life inside and outside the classroom is more like one life than two Zen and the Practice of Teaching English originates in Robert Tremmel's struggles as a teacher and teacher educator. His book reaches out and rests on three important grounding points that define his life as a teacher: school because everything the author has to say is based on his daily work with students, student teachers and secondary teachers, professional knowledge because Tremmel believes no one can live fully as a professional without maintaining contact with and participating in ongoing conversations with other professionals, spiritual practice which is connected in this book to teaching practice and all the practices of living. Preservice teachers will come away from this book with a clearer understanding of their decision to teach and the disciplines and abilities they must cultivate for a solid beginning. Experienced teachers will gain a deeper appreciation of their own commitment and accomplishments and a renewed sense of fellowship with their colleagues throughout the profession. As Tremmel writes, "My purpose in writing this book is not to add to what I see as an already more than healthy and growing supply of scholarship about teaching. Instead, I want to focus on what I finally found in my own teaching practice that helped me start making sense of the confusion that was my own but that I know is felt also by others who have teaching in their blood."
